

# THE ROYAL SOCIETY OF HEALTH

FOR THE PROMOTION

Founded 1876

## LIBRARY REGULATIONS

(a) Books, periodicals and pamphlets may be borrowed by Fellows, Ordinary Members, Associates and Affiliates personally or by a messenger producing a written order. The person to whom such publications are delivered shall sign a receipt for them in a book provided for that purpose.

(b) Publications may be borrowed through the post, or by other means of carriage, upon a written order. The postage or carriage of publications returned to the Society shall be defrayed by the borrower.

(c) A borrower may not have more than three publications in his possession at one time.

(d) A borrower will be considered liable for the value of any publication lost or damaged while on loan to him, and, if it be a single volume or part of a set, for the value of the whole work thereby rendered imperfect. Marking or writing in the publications is not permitted, and borrowers are requested to call attention to damage of this character.

(e) Books and pamphlets may be retained for twenty-eight days. Periodicals may be retained for fourteen days. Applications for extension of the loan period must be in writing before its expiry. No publication may be kept longer than three months.

(f) Books and pamphlets added to the library will not be lent until after the expiry of one month from the date received. The current number of a periodical may not be borrowed.

(g) Borrowers retaining publications longer than the time specified, and neglecting to return them when demanded, forfeit the right to borrow until they be returned, and for such further time as may be ordered by the Council.

Any borrower failing to comply with a request for the return of a publication shall be considered liable for the cost of replacing it, and the Council may, after giving due notice to him, order it to be replaced at his expense.

No publication may be reissued to the same borrower until at least seven days have elapsed after its return, neither may it be transferred by one borrower to another.

(h) Publications may not be taken or sent out of the United Kingdom.

(i) Publications returned through the post must be securely packed in a box or otherwise adequately protected.

(j) The Library may be used for reference by Fellows, Ordinary Members, Associates and Affiliates during the office hours of the Society.

(k) Parcels should be addressed:

---

*General Register Office, Charlemont House,*

*Dublin, 26th April, 1900.*

During the quarter ended 31st March last, there were registered in the 829 Registrars' Districts in Ireland 26,345 births—a number equal to an annual birth-rate of 23·4 in every 1,000 of the estimated population—and 31,178 deaths, representing an annual rate of 27·7 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 5,302 persons emigrated. A decrease of 10,135 would, therefore, appear to have taken place in the population. The population estimated to the middle of the year is 4,504,025.\*

In England last quarter, the birth-rate represented was 22·6 in every 1,000 of the estimated population, and the death-rate 29·9 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 under the average rate for the corresponding quarter of the ten years 1890–99, but 0·6 over the rate for the first quarter of 1899. The deaths exceed

\* See page 15.

those registered in the corresponding quarter of 1899 by 9,267 ; the death-rate is 8·4 over the rate for that quarter, and 5·7 over the average for the first quarter of the ten years 1890–99.

Compared with those for the corresponding quarter of 1899, the returns of pauperism, furnished by the Local Government Board, show a decrease of 691 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 2,410, or 4·1 per cent., in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1890–99 the number of Workhouse inmates shows an increase of 484, and the number of persons on out-door relief a decrease of 601, the total under both heads being 0·1 per cent. below the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·1 per cent.

The annual marriage-rate (4·5 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1899 is 0·1 over the average rate for the corresponding quarter of the preceding ten years.

\* The rates for the total of Ireland are calculated on the estimated population in the middle of the year ; those for the provinces and counties on the population according to the Census of 1891. See note (\*), page 17.

**MARRIAGES.**

The marriages (5,067) registered in Ireland during the fourth quarter of 1899 are equivalent to an annual rate of 4·5 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of the year 1898, and 0·1 over the average rate for the fourth quarter of the ten years 1889–98. Of the total number of marriages 3,235 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,832 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 3·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·6 per 1,000 of the members of all other religious persuasions. Compared with the averages for the corresponding period of the preceding ten years, the rate under the former heading shows an increase of 0·2, while that under the latter is equal to the average. Of the 22,192 marriages registered last year 6,602 were registered in the first quarter, 5,433 in the second, 5,090 in the third, and 5,067 in the fourth.

TABLE II.—Showing by **Quarterly Periods**, the **Marriages** registered in Ireland in each of the eleven years 1889–99, with the average numbers for the ten years 1889–98.

**BIRTHS.**

The number of births registered during the quarter ended 31st March last was 26,345—13,429 boys and 12,916 girls—being equal to an annual ratio of 1 in every 42·7, or 23·4 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1890–99 was 27,412, equivalent to an annual rate of 23·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 22·1 per 1,000 of the population, according to the Census of 1891; Munster, 20·9; Ulster, 24·4; and Connaught, 20·7.

The highest county birth-rate\* is 32·0 for Antrim, and the lowest 16·7 for Monaghan. Of the intermediate rates the highest five are—Down, 28·7; Dublin, 28·5; Kerry, 23·3; Mayo, 23·0; and Londonderry, 22·2; and the lowest five are—Meath, 16·8; Cavan, 17·0; Westmeath, 17·1; Longford, 17·4; and Queen's, 17·7.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 31,178—14,927 males and 16,251 females—affording an annual ratio of 1 in every 36·1, or 27·7 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1890–99 was 22·0 per 1,000.

The death-rate in Leinster was 30·0 per 1,000 of the population according to the Census of 1891; in Munster, 25·8; in Ulster, 27·6; and in Connaught, 19·6.

The county death-rates\* range from 18·1 in Mayo to 37·4 in Dublin. Between these rates the lowest five are—Roscommon, 18·5; Sligo, 18·5; Leitrim, 19·9; Donegal, 20·1; and Kerry, 21·1; and the highest five are—Antrim, 31·4; Down, 29·7; Longford, 28·9; Tyrone, 28·6; and Limerick, 28·6.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1890–99, and the average number for that period; also the number registered during each quarter of the year 1899:—

\* See note on page 2.

**Ages.**—Of the 31,178 deaths registered last quarter, 3,261, or 10·5 per cent., were of children under 1 year old; and 15,496, or 49·7 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 123·8 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 11·0 per cent. of the total deaths registered therein; in Munster, 10·1 per cent.; in Ulster, 10·7 per cent.; and in Connaught, 9·1 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 45·8 per cent.; in Munster to 52·6 per cent.; in Ulster to 48·7 per cent.; and in Connaught to 56·5 per cent. of the total deaths registered in the province.

#### HEALTH OF THE PEOPLE.

The number of deaths registered during the quarter, 31,178, was 5,829 above the average of the corresponding quarter of the last ten years, and 11,864 over the number of deaths registered during the previous quarter, or 27·7 per 1,000 of the estimated population. The cause of the high death rate must be found in the ravages of influenza, with its complications, during a prolonged and severe winter.

**Diseases.**—The total number of deaths from the principal zymotic diseases\* registered is 1,049, equivalent to an annual rate of 0·9 per 1,000 living, being 0·5 under the rate for the preceding three months, and equal to that for the first quarter of last year, and 0·2 under the average rate for the first quarter of the ten years 1890–99.

**Small-pox.**—No death from small-pox occurred in Ireland during the quarter.

**Measles.**—There were 260 deaths from measles, being 335 less than the number that occurred in the last quarter of 1899, but 65 in excess of the number of deaths from this disease in the corresponding quarter of last year. 58 deaths occurred in the Unions of Dublin North and Dublin South, 39 in Athy Registrar's District, and 14 in Belfast.

**Scarlatina.**—Sixty deaths took place in 24 of the Unions of Ireland—in number 159—8 in South Dublin, being the highest figure recorded. There were 59 deaths from scarlatina in the corresponding quarter of last year, and 106 in the first quarter of 1898. This number (60) is 68 under the average for the corresponding quarter of the last five years.

**Typhus.**—Twenty deaths were caused by this disease. Of those 7 took place in Sligo, and the other 13 were distributed over thirteen Unions throughout the country, the respective number of deaths for the four provinces being Leinster, 3; Munster, 6; Ulster, 3; and Connaught, 8. The number of deaths caused by typhus in the corresponding quarter of last year was 32, and the average for the first quarter of the past five years 46.

**Whooping-cough,** which caused 395 and 273 deaths respectively in the first quarters of the years 1898–1899, has fallen to 214 for last

\* See note (†) on page 7.

quarter, or 150 below the average of the first quarter of the last five years. Again one-fourth of the deaths occurred in Belfast Union, 7 in Dublin North, 13 in Dublin South, 11 in Cookstown, 7 in Tuam, 6 in Waterford, 5 in Newtownards, 6 in New Ross, 9 in Lurgan, 8 in Fermoy, 7 in Dungarvan, 7 in Downpatrick, and 8 in Ballina.

**Diphtheria.**—There were 108 deaths from diphtheria, being 11 over the average for the corresponding quarter of the last five years, and 4 over the number in the last quarter of 1899, and 8 over the number in the first or corresponding quarter of 1899. The provinces furnished the following to the total:—Leinster, 42; Munster, 13; Ulster, 47; Connaught, 6. Sixteen deaths from diphtheria occurred in Belfast Union, 10 in Dublin North, 10 in Dublin South, 6 in Rathdown, 5 in Kilkenny, and 5 in Armagh.

**Simple continued and ill-defined Fever.**—19 deaths were returned under this heading—5 in Leinster, 9 in Munster, 4 in Ulster, and 1 in Connaught. This number is 7 under the average for the corresponding quarter of the last five years.

**Enteric Fever.**—The deaths from enteric fever, which rose from 157 in the June quarter of last year to 230 in the September quarter, and to 247 in the last quarter of 1899, subsided to 157, which is 10 less than the number for the corresponding quarter of last year, and 31 under the average for the first quarter of the past five years. The provinces supplied the following number:—Leinster, 36; Munster, 37; Ulster, 77; Connaught, 7. In Belfast Union 40 deaths took place, or slightly over one-fourth of the total; 27 in the Unions of Dublin North and Dublin South; 6 in Ballyshannon Union, and 5 in Lisburn.

**Diarrhoea.**—The deaths from diarrhoea, 207, are less by 134, compared with the last quarter of 1899, but 42 in excess of the corresponding quarter of last year, and 39 in excess of the average for the first quarter of the past five years. The provinces furnished the total as following:—Leinster, 62; Munster, 55; Ulster, 79; Connaught, 11.

**Cholera, English.**—As in the previous quarter, four deaths occurred from this disease—1 in Ballinrobe Union, 1 in Dublin South, 1 in Kilmallock, 1 in Tralee.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 72 districts, scarlatina in 14, whooping-cough in 19, diphtheria in 7, fever in 14 (typhus 3 and enteric 11), influenza in 293, and mumps in 3.

**Inquests.**—There were 679 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 46 of the total deaths registered.

In Leinster there was 1 inquest to every 39 deaths registered, in Munster 1 to 71, in Ulster 1 to 38, and in Connaught 1 to 82.

**Deaths in Public Institutions.**—Of the 31,178 deaths registered, 5,357, or 17·2 per cent., occurred in public institutions. In Leinster the percentage was 23·3, in Munster 22·0, in Ulster 11·1, and in Connaught 10·7.

The following table (Table IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1900, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.											Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple and ill-defined Fever.	Enteric Fever.	Diarrhoea.	Simple Cholera.	Total.

### URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V. The death-rate for last quarter in these districts, which contain about one-fourth of the total population of the country, was 35·2, and the birth-rate 32·3 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 23·7 and the birth-rate 19·2 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Districts during the quarter was 1·7 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the rate was 0·6 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1900, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—"The Dublin Registration Area," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Districts of Dublin, Clontarf, Drumcondra Clonliffe and Glasnevin, New Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Booterstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by Registrars and relate to the thirteen weeks ending Saturday, 31st March, 1900.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, and simple cholera.

† The rates for Belfast have been calculated on the population estimated to the middle of the year 1903.

**VACCINATION.**

According to the Returns of Primary Vaccinations received for the first quarter of the year 1900, there were 13,188 persons successfully vaccinated; in 5,367 cases the operation was postponed, 36 children were reported as insusceptible of vaccination, and the deaths of 1,830 unvaccinated children under 3 months old were registered, making a total of 20,421 children with regard to whom particulars as to vaccination were ascertained.

**EMIGRATION.**

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 5,302 (3,634 males and 1,663 females), being 1,027 more than in the corresponding quarter of the year 1899, and 219 under the average number for the first quarter of the ten years 1890-99.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March, in 1899 and 1900 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1899.	1900.	In-crease.	De-crease.	1899.	1900.	In-crease.	De-crease.	1899.	1900.	In-crease.	De-crease.

Total, .	2,463	3,634	1,171	—	1,812	1,668	—	144	4,275	5,302	1,027	—

**PRICES AND PAUPERISM.**

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 5*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1899 the average price was 5½*d.*, and in the corresponding quarter of 1890 it was 6*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* per cwt., being 3*d.* over the average for the corresponding quarter of the year 1899. In the first quarter of 1890 the average price was 15*s.* 3*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2*s.* 11*d.* to 3*s.* 8*d.* In the first quarter of 1899 the average prices were 2*s.* 3*d.* to 2*s.* 10*d.*, and the prices for the corresponding quarter of 1890 were 2*s.* 0*d.* to 2*s.* 6*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 49*s.* 6*d.* to 59*s.* 6*d.* per cwt. In the corresponding quarter of 1899 the average prices were from 48*s.* to 56*s.* 6*d.* and in the first quarter of 1890 they were from 51*s.* to 63*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22*s.* to 28*s.* per ton.

The highest price of 2¼ per cent. Consols at the Dublin Stock Exchange for the quarter was £102½, and the lowest £98¾. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland, was reduced on the 11th January from 6 per cent. at which it stood since the 30th November 1899, to 5 per cent., and on the 25th January, to 4½ per cent.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1900 was 45,756, or 691 under the average for the corresponding period in 1899.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average weekly number of persons receiving out-door relief during the quarter was 60,583, being 2,410 over the average for the first quarter of 1899.

Of the persons receiving in-door relief during the first quarter of 1900, an average number of 1,474 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1899 the average weekly number was 1,471.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1900, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.		Average PRICES OF PROVISIONS.								PAUPERISM.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the first quarter of the years 1895–1900, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 14):—

The mean height of the barometer during the first quarter of 1900 was 29.843 inches, being .092 inch under the average for the corresponding quarter of the five years 1895–9; the highest reading (30.845

\* Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 162.2 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

inches) was on the 13th March, at 9 P.M., wind N.W.; and the lowest (28.540 inches) on the 19th February, at 9 A.M., wind N.E.

The mean temperature of the air during the quarter was  $38.2^{\circ}$ , or  $2.8^{\circ}$  under the average for the first quarter of the five years 1895-99. The maximum temperature was  $56.4^{\circ}$ , and the minimum  $12.7^{\circ}$ . The maximum heat in sun was  $106.1^{\circ}$ , and the minimum on the grass  $10.0^{\circ}$ .

Rain or snow fell on 67 days during the quarter. The rain-fall measured 7.075 inches, being .719 inches over the average for the first quarter of the five years 1895-99. The greatest monthly rain-fall was in February, when 3.215 inches were registered.

The wind blew on 12 days each from N. and S.W., on 20 days from W., on 2 days from S.E., on 5 days each from S. and N.W., on 6 days from E., and on 9 days from N.E., and the air was calm on 19 days at 9 A.M.

*January.*—The mean height of the barometer during this month was 29.877 inches; the highest reading (30.480 inches) was on the 10th, at 9 P.M., wind W.; and the lowest (29.339 inches) on the 3rd, at 9 A.M., wind S. The mean temperature of the air was  $41.0^{\circ}$ , the maximum registered was  $53.3^{\circ}$ , and the minimum  $27.7^{\circ}$ . The 21st was the warmest day, and the 5th the coldest night. The mean of the dry bulb was  $41.4^{\circ}$ , and of the wet bulb  $39.9^{\circ}$ . The maximum heat in sun was  $84.9^{\circ}$ , and the minimum on the grass  $22.2^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 17 nights. The total amount of sunshine recorded was 63.0 hours, the greatest daily amount being 7.2 hours on the 29th. The maximum ozone was 1.0, the minimum .3, and the mean .7. Rain or snow fell on 28 days. The rainfall measured 2.855 inches; the greatest amount in 24 hours was .325 inch on the 30th.

*February.*—The mean height of the barometer during this month was 29.555 inches; the highest reading (30.248 inches) was on the 28th, at 9 P.M., wind N.E.; and the lowest (28.540 inches) on the 19th, at 9 A.M., wind N.E. The mean temperature of the air was  $35.5^{\circ}$ , the maximum registered was  $56.4^{\circ}$ , and the minimum  $12.7^{\circ}$ . The 24th was the warmest day, and the 12th the coldest night. The mean of the dry bulb was  $34.5^{\circ}$ , and of the wet bulb  $33.2^{\circ}$ . The maximum heat in sun was  $95.1^{\circ}$ , and the minimum on the grass  $10.0^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 21 nights. The total amount of sunshine recorded was 92.5 hours, the greatest daily amount being 8.8 hours on the 23rd. The maximum ozone was 1.0, the minimum .3, and the mean .6. Rain or snow fell on 22 days. The rain-fall measured 3.215 inches; the greatest amount in 24 hours was .515 inch on the 8th.

*March.*—The mean height of the barometer during this month was 30.097 inches; the highest reading (30.845 inches) was on the 13th at 9 P.M., wind N.W.; and the lowest (29.273 inches) on the 18th, at 9 P.M., wind N.E. The mean temperature of the air was  $38.3^{\circ}$ , the maximum registered was  $54.7^{\circ}$ , and the minimum  $21.9^{\circ}$ . The 11th was the warmest day, and the 18th the coldest night. The mean of the dry bulb was  $39.0^{\circ}$ , and of the wet bulb  $36.7^{\circ}$ . The maximum heat in sun was  $106.1^{\circ}$ , and the minimum on the grass  $15.3^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 21 nights. The total amount of sunshine recorded was 69.7 hours, the greatest daily amount being 10.2 hours on the 31st. The maximum ozone was .9, the minimum .1, and the mean .5. Rain or snow fell on 17 days. The rain-fall measured 1.005 inches; the greatest amount in 24 hours was .350 inches on the 18th.

NOTE.—This table has been constructed for the years 1825 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-19 0—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

**MARRIAGES** Registered during the Quarter ending 31st December, 1899, in the PROVINCES, COUNTIES,\* and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st March, 1900; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHOEA, and CHOLERA; also VIOLENT DEATHS,† INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 31st March, 1900, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

### ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Square Acres.	Popu- lation in 1891.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarters are stated by the Registrars to include												Vaccination Return for the Quarter ending 31st Mar., 1900.					Total of the foregoing.		
			Averages in the Quarters ending 1st Dec., 1899- 1900.	Registered in the Quarter ending 31st Mar., 1900.	Averages in the Quarters ending 31st Mar., 1899- 1900.	Registered in the Quarter ending 31st Mar., 1900.	Averages in the Quarters ending 31st Mar., 1899- 1900.	Registered in the Quarter ending 31st Mar., 1900.	Deaths of												Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons Inaccessible of Vao- cination.	Number of Unvacci- nated Children under 2 months old, whose deaths were registered during the Quarter.				
									Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined Fever.	Krillio Fever.	Diarrhoea.	Cholera.					Violence.†		Inquest Cases.	Deaths in Public Insti- tutions.

---	--

\* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898. In some cases it is not at present practicable to give the average numbers of Births and Deaths for the corresponding Quarters of previous years in the Unions and Districts as now constituted.

† Including accidental deaths, homicides, and suicides.

ABSTRACT II.—SUPERINTENDENT REGISTRARS', DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.\*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1911.	Deaths.		Births.		Mar- riages.		The Deaths registered during the Quarters stated by the Registrars to Include																				Vaccination Return for the Quarter ending 31st Mar., 1900.				
			Averages in the Quar- ters ending 31st Mar., in the 10 years, 1890-99	Registered in the Quar- ter ending 31st Mar., 1900.	Registered in the Quar- ter ending 31st Mar., 1900.	Registered in the Quar- ter ending 31st Dec., 1899.	Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Malaria.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined fever.	Kentish Fever.	Dysentery.	Cholera.	Violence.	Inquest Cases.	Deaths in Public Insti- tutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons Inaccessible of Vac- cination.	Number of Unvacci- nated Children under 5 months old, whose deaths were registered during the quarter.	Total of the foregoing.

## REGISTRARS' NOTES.

*On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.*

*In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.*

The Registrars alone must be considered responsible for the opinions which they express.

*Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.*

## I. PROVINCE OF LEINSTER.

## Carlow County.

CARLOW; *Bagenalstown*.—Vaccinations few owing to harsh weather. Influenza, followed by pneumonia, prevalent.

CARLOW; *Borris*.—The severe weather accounts for the small number of vaccinations. Of the deaths registered ten were over eighty years of age and one was ninety-two.

CARLOW; *Carlow, No. 1 W*.—Excepting influenza no zymotic diseases prevailed.

CARLOW; *Clonegal*.—The high death-rate was due to influenza and bad weather.

NEW ROSS; *St. Mullins*.—The severe weather accounts for the small number of successful vaccinations. Of the deaths registered twelve were over 80 years, four were over 90 years, and one was 100 years.

## Dublin County.

BALROTHERY; *Holmpatrick, W*.—Influenza, complicated in many cases by pneumonia, has been very prevalent.

BALROTHERY; *Lusk*.—Measles prevalent.

CELBRIDGE; *Lucan*.—Vaccination postponed owing to prevalence of influenza and catarrh, also severity of weather.

DUBLIN NORTH; *Castleknock*.—A severe epidemic of influenza raged here in January. A number of cases were complicated with pneumonia and symptoms of intestinal catarrh.

DUBLIN NORTH; *Clontarf and Howth, No. 2*.—During quarter influenza very prevalent, and I think accounts for small number of vaccinations.

DUBLIN SOUTH; *Clondalkin*.—An epidemic of measles of a mild form during quarter, hence postponement of vaccinations.

DUBLIN SOUTH; *South City, No. 4*.—The mortality was high during January and February, but since March the public health has improved. Influenza was prevalent.

DUBLIN SOUTH; *Tullaght*.—Bronchitis very prevalent amongst old people whose ages ranged from 70 to 90 years.

## Kildare County.

ATHY; *Athy, W*.—Measles was epidemic here during past quarter.

BALTINGLASS; *Baltinglass, No. 2*.—All vaccinations postponed in consequence of prevalence of measles and influenza amongst children in the district.

CELBRIDGE; *Celbridge, W*.—Influenza prevalent last quarter. District now healthy.

CELBRIDGE; *Kilcock*.—Measles was prevalent in the early part of quarter, vaccination postponed in consequence.

EDENDERRY; *Carbury*.—Vaccination postponed owing to influenza and cold weather.

EDENDERRY; *Rathangan, No. 1*.—District almost escaped the epidemic of influenza.

NAAS; *Naas and Carragh, W*.—Measles has been prevalent. No vaccinations have been done owing to the severity of the past few months.

NAAS; *Newbridge*.—Influenza has been prevalent of a type which rendered the lungs particularly liable to attacks of bronchitis and broncho-pneumonia.

NAAS; *Robertstown and Kilmeage*.—During the quarter the death of one man registered aged 100 years.

## Kilkenny County.

CALLAN; *Callan W*.—Vaccination postponed owing to severity of weather.

**CASTLECOMER ; Ballyragget.**—Sanitary arrangements in the district very fair. One case of scarlet fever and three of typhoid appeared in district. Owing to prevalence of whooping-cough, influenza, and severe weather vaccination was postponed.

**CASTLECOMER ; Castlecomer, W.**—During the last quarter the district was visited by a severe epidemic of influenza, which proved fatal to many of the old people.

**KILKENNY ; Freshford.**—The medical officer has suspended vaccination owing to the prevalence of measles and influenza.

**KILKENNY ; Kilkenney, No. 1, W.**—Diphtheria still occurs from time to time.

**NEW ROSS ; Dysartmoon, No. 1.**—No vaccination because of influenza.

**THOMASTOWN ; Graigue.**—Severe weather and the prevalence of influenza diminished the vaccinations.

**THOMASTOWN ; Inistioge.**—Several cases of influenza.

**URLINGFORD ; Urlingford, W.**—Six cases of typhoid fever have been admitted to the fever hospital, five from Kilcooly District, and one from Urlingford, one of which has died.

**WATERFORD ; Ullid.**—Vaccination was practically suspended owing to the hard weather and a threatened epidemic of scarlatina.

#### King's County.

**BIRR ; Frankford.**—Deaths of the following respective ages registered during quarter, viz. : 97, 82, 70, 68, 93, 98, 70. Four deaths occurred from influenza with pulmonary complications, and three deaths from acute bronchitis. Three cases of influenza with gastro-enteric complications, high temperature 104°, diarrhoea and vomiting; not fatal.

**BIRR ; Kinnitty.**—Influenza has been prevalent, and five deaths have been registered from that disease and its complications.

**EDENDERRY ; Rathangan, No. 2.**—The deaths of three women aged respectively 101 years (age well authenticated), 92 and 82 years were registered. Influenza prevalent in western part of district during January and February.

**EDENDERRY ; Rhode.**—Influenza prevalent in district.

**MOUNTMELICK ; Clongowan, No. 2.**—Influenza very prevalent; not fatal. Many children affected. Vaccination in consequence in many cases postponed.

**TULLAMORE ; Clara.**—Entry No. 426 in Registry of Deaths, the informant gave the age of the deceased as being 104 years. Have made inquiries, and am informed by those in a position to know that the information is correct.

**TULLAMORE ; Killoughy.**—Vaccination was postponed owing to severe weather and the prevalence of influenza.

**TULLAMORE ; Tullamore, W.**—Sanitary arrangements much as usual; majority of lower classes occupying insanitary houses.

#### Longford County.

**GRANARD ; Ballinaloe.**—Poultry roost in some of the messuages, a practice that is a nuisance.

**GRANARD ; Scrabby, No 2.**—There was during first two months of quarter a severe epidemic of influenza, and a number of old people were carried off.

#### Louth County.

**ARDEE ; Collon, No. 1.**—Vaccinations postponed owing to severity of the weather and the occurrence of influenza among some of the children.

**DROGHEDA ; Ternonfeckin.**—Measles and influenza prevailed during quarter. Vaccinations in a good many cases postponed as a consequence.

**DUNDALK ; Barronstown.**—Influenza of a rather severe type prevailed during the quarter, complicated in most cases with pulmonary trouble. In the early part of quarter several cases of measles in the Castlering portion of district. The schools in the neighbourhood were closed for a few weeks owing to the prevalence of the malady. The district is now in a very healthy and sanitary state.

**DUNDALK ; Dromiskin.**—Influenza and measles prevalent. Vaccination postponed.

**DUNDALK ; Dundalk, W.**—Influenza prevailed to an extraordinary degree—very few persons escaping the disease. The epidemic reached its height about the middle of January, and only just now appears to be dying out. Pneumonia was a frequent complication in old people who were affected. There were several cases not fatal of idiopathic erysipelas.

#### Meath County.

**ARDEE ; Drumcondra.**—Influenza prevalent in first two months of quarter; type mild.

**DROGHEDA ; St. Mary's.**—The sanitary state of the district fairly good. Influenza was very prevalent during the quarter.

**DROGHEDA ; Stamullen.**—The district has been in a healthy condition during the quarter. Sanitary state and water supply generally good.

**DUNSHAUGHLIN ; Ratoath.**—Influenza was very prevalent in last quarter, and was very fatal in the case of infants and old people. It has now practically disappeared.

**KELLS ; Moynalty.**—Owing to the prevalence of measles throughout the whole district no children were presented for vaccination.

**NAYAN; Painestown.**—The deaths of two males were registered at 90 years and three between 80 and 90. The health of the district has been satisfactory during the quarter. A mild form of measles has broken out during the last fortnight.

**TRIM; Enfield.**—Fourteen of the nineteen deaths registered during the quarter averaged 78 years of age.

**TRIM; Summerhill.**—Five deaths from influenza or its consequences. Several vaccination cases postponed owing to measles and influenza.

**TRIM; Trim, W.**—Vaccinations were postponed in consequence of the very general prevalence of measles amongst the children of the district.

#### Queen's County.

**ABBETLEIX; Ballinakill.**—Influenza prevalent in district during past quarter, but not proving fatal in any case but one. The death of a woman registered at the great age of 98 years.

**CARLOW; Carlow No. 1.**—Excepting influenza no zymotic disease prevailed.

**MOUNTMELICK; Clongowan No. 1.**—Influenza very prevalent—not fatal; many children affected. Vaccinations in many cases postponed.

**MOUNTMELICK; Mountmellick, W.**—Influenza of a severe type has been epidemic during the quarter, and in old people, when complicated with bronchitis and pneumonia, proving in most cases fatal.

**ROSCREA; Borris-in-Ossory.**—Influenza has been very prevalent in this district during the past quarter.

#### Westmeath County.

**ATHLONE; Athlone No. 1, W.**—Amongst the deaths registered during quarter there was that of an old man in the workhouse aged 108 years.

**BALLYMAHON; Ballymore.**—Owing to a severe epidemic of influenza vaccination was postponed.

**DELVIN; Clonmellon.**—In consequence of influenza and the severe weather children were not brought for vaccination.

**MULLINGAR; Ballynacarrigy.**—No vaccinations performed on account of the prevalence of influenza.

**MULLINGAR; Castletown Geoghegan.**—The severity of the season and an epidemic of influenza caused a good deal of deaths, especially those aged and suffering from bronchial affections. Sanitary condition satisfactory.

**MULLINGAR; Killican.**—Owing to the severity of the weather children were not presented for vaccination. During the months of January and February influenza was very prevalent.

**MULLINGAR; Mullingar, W.**—During the past quarter a large number of persons suffered from colds with some lung troubles, and the inclement weather proved fatal to a number of old people.

**TULLAMORE; Kilbeggan.**—Vaccination postponed owing to an epidemic of influenza.

#### Wexford County.

**ENNISCORTHY; Enniscorthy, No. 1.**—No vaccination on account of measles.

**ENNISCORTHY; Killann.**—Outbreak of influenza in district prevented vaccination.

**ENNISCORTHY; Newtownbarry.**—The deaths during the past quarter have been 50 per cent. higher than the birth rate. This has been caused by the severe weather and an epidemic of influenza.

**GOREY; Coolgreany.**—Owing to epidemic of influenza and measles in the district, and the prevalence of chest affections, vaccinations had been postponed in almost every case.

**NEW ROSS; Fethard, No. 1.**—Owing to epidemics of influenza and whooping-cough, children were not presented for vaccination.

**NEW ROSS; Fethard No. 2.**—Vaccinations postponed owing to prevalence of whooping-cough and influenza in the district, which diseases are now greatly on the decrease.

**WEXFORD; Bannow.**—Influenza very prevalent during quarter, in consequence vaccination was suspended.

**WEXFORD; Crossabeg.**—Influenza was very prevalent during first portion of quarter, but has now abated, and district is at present in a healthy sanitary state. Of the seventeen deaths registered during quarter two were over 90 years.

#### Wicklow County.

**BALTINGLASS; Baltinglass, No. 1, W.**—All vaccinations postponed in consequence of prevalence of measles and influenza amongst children in the district.

**RATHDRUM; Annamoe.**—In consequence of measles being so prevalent in this district there have been no vaccinations during the quarter.

**RATHDRUM; Arklow.**—Besides the ordinary epidemic of influenza there was a severe epidemic of measles during the quarter, owing to which all vaccinations were postponed. Amongst the deaths registered there were four females over 90 years old.

**RATHDRUM; Dunganstown.**—The inclemency of weather, no doubt, accounts for the fact that no cases of vaccination were presented at dispensary.

**RATHDRUM; Newcastle.**—The deaths registered over 60 years are 92, 94, 83, 82, 78, two 70, 66, two 65, 64. Sanitary condition of district not good.

**RATHDRUM; Wicklow.**—Owing to the severe weather (part of the district having been covered by five feet of snow) and prevalence of influenza no vaccinations took place.

## II. PROVINCE OF MUNSTER

### Clare County.

**BALLYVAGHAN; Ballyvaghan, W.**—The average of half the deaths that occurred during the quarter is '66 years. One, that of a herdsman, took place at the advanced age of 99.

**CORROFIN; Corrofin, W.**—Influenza became a regular epidemic during the first two months of quarter, and was of a most severe type, fifteen deaths from which—by no means the total—were registered. There were altogether forty-four deaths registered, which shows the greatest mortality that ever came under my observation.

**ENNIS; Crusheen.**—Very few children vaccinated during the quarter owing to severe weather.

**ENNIS; Ennis, No. 2.**—Owing to the severe weather ten cases of vaccination were postponed.

**ENNIS; Newmarket.**—The quarter was particularly severe on old people, amongst whom the mortality was large.

**KILRUSH; Carrigaholt.**—During the past quarter influenza has been very prevalent all over the district. Chest affections followed. Vaccinations were postponed in consequence. One or two cases proved fatal.

**KILRUSH; Craggaknock.**—There were only four primary vaccinations during quarter owing to influenza and the severity of the weather.

**KILRUSH; Kilrush, W.**—Influenza has been prevalent. Pulmonary diseases have caused the deaths of many old people.

**LIMERICK; Bridgetown.**—Influenza prevailed throughout all the district during the quarter. Two deaths are registered from this source.

**LIMERICK; Coolacasey.**—In consequence of the very inclement weather there were no vaccinations.

**SCARRIFF; Annacarriga.**—Influenza prevailed during the quarter, and caused two deaths.

**TULLA; Kilkishen.**—Influenza was prevalent since the middle of March. Several cases of whooping-cough have come under my notice.

### Cork County.

**BANDON; Murragh.**—Of the twenty deaths registered during the quarter fourteen were due to diseases of the respiratory organs,

**BANDON; Templemartin.**—Vaccination postponed during the quarter owing to an epidemic of influenza, and very bad weather.

**BANTRY; Bantry W.**—Influenza of a very severe type was prevalent in the district, which caused many deaths from bronchial complications. There were also some cases of measles, in consequence of which and the severe state of the weather, vaccination was very backward.

**BANTRY; Durrus and Kilocrohan.**—Had to postpone all cases of vaccination, with few exceptions, on account of a general outbreak of influenza of a bad type, with high temperature, and great depression afterwards. Of the seven deaths registered, the ages were 75, 87, 85, 81, 82, 87, and 65 years.

**CASTLETOWN; Castletown, W.**—An epidemic of influenza prevailed during the winter and spring. It has passed away.

**CASTLETOWN; Kilcatherine.**—Influenza prevalent, which retards vaccination.

**CLONAKILTY; Clonakilty, W.**—Influenza very prevalent. Seventeen deaths from it registered, and twelve others registered as from bronchitis and pneumonia, were properly due to it also. One death of a man aged 106 registered. Vaccination was at a stand-still until within the last fortnight, owing to the severe cold and influenza.

**CLONAKILTY; Rosscarbery.**—Influenza and bronchitis prevalent in district.

**CLONAKILTY; Timoleague.**—Four deaths from influenza during quarter. Vaccination postponed in consequence of epidemic of influenza, and still prevalent. Phthisis appears to be on the increase—seven deaths registered during quarter.

**CORK; Ballincollig.**—No method of dealing with liquid sewage in the village of Ballincollig. Water tables require replacing by cement tables. Manure heaps in farmers' and labourers' yards too close to houses.

**CORK; Blarney.**—Influenza was very prevalent in Blarney village and its neighbourhood in the early part of the quarter—five deaths resulted from this disease.

**CORK; Carrigaline, No. 1.**—The death rate, it will be noticed, is abnormally high, the number exceeding the sum of the three quarters immediately preceding. This was mainly due to the epidemic of influenza which ravaged the district at the end of last and beginning of this year.

**CORK; Carrigaline, No. 2.**—Influenza, and chest affections rather prevalent during the quarter.

**CORK; Carrignavar.**—Owing to the prevalence of influenza and complications, I considered it advisable to postpone vaccination till coming quarter.

**CORK; No. 4.**—Influenza very prevalent, especially amongst children.

**CORK ; Dripsey.**—There was a very severe epidemic of influenza since the middle of December, 1899, and very few children were presented for vaccination on that account, and also the severity of the weather.

**CORK ; Whitechurch.**—A good many cases of measles during quarter. Vaccination neglected, due to above and cold weather.

**DUNMANWAY ; Ballyneen.**—In consequence of the severity of the weather and of an epidemic of influenza I did not vaccinate any children during the quarter.

**DUNMANWAY ; Dunmanway, W.**—A severe epidemic of influenza during the first two months of the quarter. It is nearly gone now.

**FERMOY ; Rathcormac.**—On account of the inclemency of the weather the children were unable to be brought in to be vaccinated.

**KANTURK ; Kanturk, W.**—Influenza of a virulent type very prevalent, owing to which vaccinations had to be practically postponed.

**KILMALLOCK ; Charleville.**—The district is healthy. There were four cases of typhoid fever during the past quarter in the district. I have postponed the vaccination during this quarter, as we had a good deal of influenza and the weather was very severe.

**KINSALE ; Ballyfeard.**—An epidemic of influenza, complicated in most cases with bronchitis and in more with pneumonia, prevailed during quarter. One case of typhus was sent to hospital, but the patient was convalescing when sent in. One death occurred at 90, two over 80, and four over 70 years.

**MACROOM ; Inchigeela.**—Owing to influenza and the severity of the weather vaccinations have not been up to the average.

**MACROOM ; Macroom, W.**—A severe type of influenza was very prevalent during January and February, and has been given as the cause of death in ten cases registered during the quarter. The death-rate has been unusually high—more than double the average.

**MALLOW ; Ballyclough.**—During quarter influenza very prevalent, also bronchial affections. I had some few cases of whooping-cough. The above diseases, with the severe weather, interfered with vaccination. Sanitary arrangements fairly good.

**MALLOW ; Kilshannig.**—Influenza and chest affections very prevalent during months of February and March.

**MALLOW ; Rahau.**—Influenza and respiratory diseases have been prevalent in the district during the past quarter.

**MIDDLETON ; Middleton, No. 2.**—Influenza was very prevalent during the quarter; the type was severe, and nine deaths have been ascribed to that cause.

**MITCHELSTOWN ; Kildorrery.**—Owing to influenza and its complications vaccination was completely postponed during past quarter.

**MITCHELSTOWN ; Mitchelstown, No. 1, W.**—Influenza was very general, and of a severe type during the quarter; in consequence of which vaccination had to be postponed.

**SKIBBEREEN ; Dromdaleague.**—The large mortality amongst children was due to affections of the respiratory system; on account of those affections and on account of the severity of the weather, vaccination was practically suspended.

**SKIBBEREEN ; Tullagh.**—Numerous cases of influenza during quarter.

**SKULL ; Goleen.**—Decrease in number of vaccinations due to the influenza epidemic, which affected many young children.

**YOUGHAL ; Killeagh.**—There were no vaccinations during quarter, owing to bad weather and prevalence of bronchitis amongst infants.

### Kerry County.

**CAHERSIVEEN ; Glanbehy.**—There were nine deaths from influenza. Three of the deaths registered for the quarter now ended were of persons 90 years of age each.

**CAHERSIVEEN ; Valencia.**—Influenza very prevalent during the quarter—three deaths registered from that cause.

**DINGLE ; Castlegregory.**—Vaccination has been postponed owing to the majority of children suffering from chest troubles. District healthy, there being no case of infectious or contagious disease during past quarter.

**DINGLE ; Dingle, W.**—There has been an epidemic of influenza, complicated with bronchitis and pneumonia in a considerable number of cases in the district for the last month. As the weather is becoming finer the disease is disappearing.

**DINGLE ; Ventry.**—Influenza of a mild type all over the district. Seven deaths from influenza registered.

**KENMARE ; Kenmare, W.**—Owing to severe influenza epidemic no vaccinations were performed.

**KENMARE ; Kilgarvan.**—A mild epidemic of measles has prevailed in the district. Influenza has been very prevalent, and there have been two cases of scarlatina. Owing to the above causes and also to the severity of the weather, there have been no primary vaccinations during the quarter.

**KENMARE ; Tuosist.**—Owing to the severe weather and the influenza epidemic which raged during the months of January and February, the children were not brought for vaccinations.

**KILLARNEY ; Coom.**—Influenza prevalent during the quarter. Fourteen children were vaccinated in the last week of quarter, but not inspected until the termination of the quarter. Sanitary state of district good,

KILLARNEY; *Killarney, No. 1, W.*—A very severe epidemic of influenza during January and February—no vaccinations in consequence.

KILLARNEY; *Killarney, No. 2.*—No vaccinations during the quarter owing to a very severe epidemic of influenza.

KILLARNEY; *Killorglin.*—The death record for the quarter is by far the largest in my experience, due to the prevailing epidemic, influenza. Owing to the severity of the weather I have only just started vaccination.

KILLARNEY; *Milltown.*—Influenza prevailed extensively and caused some deaths at the extremes of life.

KILLARNEY; *Molahiffe.*—Influenza was prevalent during quarter, for which reason vaccination had been postponed. Deaths registered attained the ages—97, 85, 85, 84, 83, 80, 75, 75, 70, 70, 65.

LISTOWEL; *Ballyduff.*—There was a very severe epidemic of influenza in the district during the past quarter. As a consequence vaccination had to be postponed.

LISTOWEL; *Tarbert.*—Measles prevalent during January and February, and influenza during February and March.

TRALEE; *Ardfert.*—Influenza and measles have been very prevalent in the district for the past quarter, and this accounts for the small number of vaccinations performed during the term.

TRALEE; *Tralee, No. 1, W.*—Owing to the severe weather since Christmas people have not brought their children for vaccination.

#### Limerick County.

CROOM; *Castletown.*—An epidemic of influenza, so general that scarcely a household in the district escaped, made the postponement of primary vaccination necessary. The same cause accounts for the number of deaths registered being so much greater than that of the births. It was among the very aged that the epidemic and its sequelæ were most fatal. Of eight of the deaths registered the following were the stated ages—80, 81, 85, 85, 87, 89, 91, and 98.

KILMALLOCK; *Bruff.*—Vaccination postponed owing to influenza, with bronchial and pulmonary complications. Some cases of scarlatina not of a severe type.

KILMALLOCK; *Bruree.*—Influenza with bronchial complications was very prevalent during the months of January and February—otherwise the district is healthy.

KILMALLOCK; *Kilfinnane.*—Influenza very prevalent amongst children during the past quarter and all vaccinations postponed.

KILMALLOCK *Kilmallock, W.*—Very few vaccinations owing to a severe epidemic of influenza. Nineteen deaths of persons over 80 were registered this quarter, five of whom were 90 and over.

LIMERICK; *Annacotty.*—Influenza very prevalent during the months of January and February.

LIMERICK; *Cahirconlish.*—The vaccination was postponed owing to severe weather and prevalence of influenza.

LIMERICK; *Limerick, No. 3.*—A widespread epidemic of influenza here has caused much pneumonia, broncho-pneumonia, and bronchitis. There has been a kind of diphtheritic sore throat in a good many of the cases of influenza; but I did not consider it by any means diphtheria. I have also had in connection with the influenza four or five cases of bad mania, all of whom got better but one, who died of pneumonia—and the peculiarity of these maniacal cases was that, except where there was some degree of pneumonia present, the temperature and pulse were normal or sub-normal.

LISTOWEL; *Glin.*—Influenza very rife in this district during the quarter—it is made responsible for only two deaths. The severity of the weather was unprecedented and had a most fatal effect on the very old. The death of a poor man whose age was stated to be 101 years was registered. I have a great number of defaulters under the Vaccination Act.

MITCHELSTOWN; *Galbally.*—Owing to influenza and bronchial troubles being very prevalent in the district during this quarter I had to postpone vaccination.

MITCHELSTOWN; *Mitchelstown, No. 2.*—Vaccination postponed owing to the very general epidemic of influenza prevailing.

NEWCASTLE; *Ardagh.*—Influenza in the district for the past three months; two deaths registered from same.

NEWCASTLE; *Newcastle, W.*—Large number of influenza cases in January and February, causing many deaths among the aged.

RATHKEALE; *Askeaton.*—Influenza was very prevalent during the past quarter. Of the deaths registered one—a male—was 102 years of age, another 98 years, and two others 90 years each; the deaths of two females were also registered—one, 95 years, and the second 90 years of age.

RATHKEALE; *Pallaskenry.*—Measles of a mild type has been prevalent during the past quarter. There has been no fatal case of this disease.

RATHKEALE; *Rathkeale, No. 1, W.*—The intense cold of January and March had a disastrous effect on old people, who became literally refrigerated, as old people do not recognise the necessity of warm fires and additional covering of body in bed and out of it in intensely cold weather. The mortality from advanced age was therefore doubled.

TIPPERARY; *Grean.*—Owing to the prevalence of broncho-pneumonia amongst children, and also the severity of the weather, the vaccinations for the quarter are backward.

## Tipperary County.

**BORRISOKANE ;** *Borrisokane, W.*—The great severity of the weather prevented parents from sending their children to be vaccinated.

**BORRISOKANE ;** *Terryglass.*—Influenza and measles prevalent. Children not vaccinated owing to the inclemency of the weather and prevailing influenza.

**CALLAN ;** *Ballingarry.*—Measles and influenza were prevalent during the quarter.

**CALLAN ;** *Mullinahone.*—There was a severe epidemic of influenza during first half of quarter, and some cases still; fortunately, the poor got over it best, or rather were less severely attacked. Probably the influenza, combined with the severe weather, prevented vaccination being attended to.

**CARRICK-ON-SUIR ;** *Carrick-on-Suir, W.*—Influenza prevailed all during the winter. Many old people died from it. Owing to the severity of the weather very few children were vaccinated.

**CARRICK-ON-SUIR ;** *Garrangibbon.*—The weather was too severe for vaccination. Influenza was very prevalent.

**CASHEL ;** *Killenaule.*—No vaccination during the quarter owing to the severe weather. Nineteen old people died during the quarter owing to influenza and bronchopneumonia.

**CASHEL ;** *Kilpatrick.*—Two deaths from influenza. There is a good deal of general delicacy amongst children, most of whom suffered from gastro-enteritis last autumn and early winter; vaccination postponed on same account.

**CLOGHEEN ;** *Cahir.*—Vaccination had to be postponed owing to the severity of the weather, and to prevalence of influenza in the district.

**CLOGHEEN ;** *Clogheen, W.*—Register contains one death 106 years.

**CLONMEL ;** *Clonmel, W.*—Influenza was exceedingly prevalent during the quarter, and in my opinion the great mortality from respiratory diseases was owing to this cause.

**CLONMEL ;** *Marlfield.*—We had an outbreak of influenza during first two months of quarter, but it has now disappeared.

**NENAGH ;** *Nenagh, W.*—Influenza was prevalent during the quarter, not of a severe type.

**NENAGH ;** *Newport.*—Owing to the extreme severity of the weather, and the prevalence of influenza in the district there have been no children vaccinated.

**NENAGH ;** *Portroe.*—There is a death at 102 years registered during the quarter.

**NENAGH ;** *Silvermines.*—Vaccination postponed owing to the prevalence of influenza.

**NENAGH ;** *Toomevara.*—Influenza was prevalent in the district during the quarter; and prevented the children from coming to the dispensary for vaccination; also the weather was very severe.

**THURLES ;** *Borrisoleigh.*—No children were vaccinated during the quarter owing to the prevalence of measles and influenza.

**THURLES ;** *Littleton.*—Bronchitis was very prevalent in January and February. There were seven deaths registered from it during the quarter. The severe weather was the reason why so few children were vaccinated.

**THURLES ;** *Moyne.*—Owing to influenza and severe weather I had to postpone vaccination.

**THURLES ;** *Templemore.*—Owing to the very inclement weather, and the numerous cases of influenza, vaccinations were obliged to be postponed in all cases in this district. Measles was also prevalent.

**THURLES ;** *Thurles, W.*—Measles prevalent in the urban portion of district during the quarter.

**TIPPERARY ;** *Cappagh.*—Influenza very prevalent.

**TIPPERARY ;** *Emly.*—During this quarter influenza was very prevalent. I registered two deaths at 90 years of age, one of 87, and one of 85.

**URLINGFORD ;** *Kilcooly.*—Influenza was very prevalent during past quarter, with lung complications in a great many cases amongst the young and old people. There were four cases of typhoid fever during quarter, which were removed to fever hospital. I had the house thoroughly disinfected in which these cases occurred.

## Waterford County.

**CARRICK-ON-SUIR ;** *Rathgormuck.*—Several cases of pertussis (whooping-cough) have been under treatment during the past quarter, as also a number of cases of influenza.

**CLONMEL ;** *Ballymacarbery.*—Three deaths of males were registered as 98, 95, and 80 years respectively, and one female 92.

**DUNGARVAN ;** *Dungarvan, W.*—Influenza and whooping-cough were epidemic during the past quarter. I registered the death of one person aged 101 years, and several others at advanced ages.

**DUNGARVAN ;** *Ringville.*—Vaccination postponed owing to an epidemic of whooping-cough.

**DUNGARVAN ;** *Seskinan.*—Owing to severity of the weather and whooping-cough vaccination short.

**DUNGARVAN ;** *Whitechurch.*—Owing to the severity of the weather during the months of January and February, and whooping-cough, vaccination during the quarter was at a standstill.

LISMORE; *Cappoquin*.—Owing to the prevalence in the district during the quarter of influenza and bronchial affections no children were presented at the dispensary for vaccination. The consequence is there are a good many defaulters.

LISMORE; *Tallow*.—Whooping-cough has been very prevalent during the past quarter, and in consequence I have suspended all vaccinations.

WATERFORD; *Kilmeadan*.—Owing to the prevalence of whooping-cough I postponed vaccination until this month.

YOUGHAL; *Ardmore*.—Influenza very prevalent and severe during quarter. Some cases of whooping-cough.

### III. PROVINCE OF ULSTER.

#### Antrim County.

ANTRIM; *Crumlin*.—Had three cases of diphtheria during quarter just ended, two of them fatal. Cause in one case bad drainage, another bad water for drinking, for third cannot find any cause. There was a very severe epidemic of influenza during the quarter in district.

ANTRIM; *Randalstown*.—Two cases of typhoid fever have been reported. One died. A very acute type of measles all over the district.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district are fairly good. Influenza was very prevalent during the quarter. Four deaths caused by this disease have been registered.

BALLYCASTLE; *Ballycastle, W.*—Influenza has been very prevalent, and has caused ten of the deaths registered.

BALLYCASTLE; *Croagh*.—The vaccination has been rather below the average, but during the month of April I attend at two outlying stations, when I expect they will all be vaccinated. There have been a good many deaths of aged people from complications after influenza.

BALLYCASTLE; *Cushendall*.—Vaccination in general was postponed owing to severity of weather and prevalence of influenza.

BALLYMENA; *Ballymena, W.*—Record number of deaths registered in one quarter chiefly from influenza and chest affections. Town and district at present healthy.

BALLYMENA; *Broughshane*.—A severe epidemic of influenza prevailed during the early part of the quarter, and carried off a great many old people.

BALLYMENA; *Clogh*.—Deaths have been above the average owing largely to influenza and its complications, otherwise the district would have been fairly healthy.

BALLYMENA; *Galgorm*.—The high death rate was caused by an epidemic of influenza, complicated with catarrhal pneumonia.

BALLYMENA; *Glenwhirry*.—The mortality this last quarter is the highest in my experience. There was a very severe epidemic of influenza, but it has entirely gone. The manure pits as a rule are too near the dwelling places.

BALLYMENA; *Portglenone*.—Influenza was very prevalent during the quarter. It was in most cases followed by chest complications and marked prostration among the aged.

BALLYMENA; *Toome*.—Measles very prevalent, with chest complications.

BALLYMONEY; *Ballymoney, W.*—Influenza was cause of death in twenty-five cases.

BALLYMONEY; *Castlequarter*.—No cases of vaccination save two, owing to the prevalence of influenza.

BALLYMONEY; *Dervock*.—Influenza was very prevalent during the quarter, and there were seven deaths registered as due to this disease.

BALLYMONEY; *Dirraw*.—Influenza prevalent during quarter, and in the old and debilitated accompanied by pneumonia. Children suffered, and consequently vaccination was postponed.

LARNE; *Ballycarry*.—Sanitary condition of district good. No infectious fevers. Whooping-cough and influenza have been prevalent. Several deaths registered from influenza.

LARNE; *Waterfoot*.—Vaccination in general was postponed owing to severity of weather and prevalence of influenza.

LISBURN; *Glenavy*.—High average this quarter due to lowering effect of severe weather acting on chronic lung and heart affections. No epidemic present.

#### Armagh County.

ARMAGH; *Blackwatertown*.—Influenza was epidemic over the whole district; it is now disappearing. Vaccination for a time had to be stopped on account of the large number of children suffering from influenza and chest affections. A number of cases of diphtheria and one case of enteric fever were traced to a contaminated well of water. Notices were put up prohibiting the use of this water.

ARMAGH; *Keady*.—There has been a severe epidemic of measles during the quarter, and it is still prevalent in portions of the district. Influenza has also been prevalent. Very few children were vaccinated owing to the prevailing sickness.

ARMAGH; *Loughgall*.—Measles were prevalent in whole district.

ARMAGH; *Markethill*.—Influenza and measles have been epidemic in the district during the past quarter. The latter was of a mild kind and caused no death. One death was registered of a person aged 95.

and twelve deaths of persons aged 80 years and over. Influenza caused a great number of deaths amongst old persons. Lung complications were very prevalent and caused a large proportion of the deaths.

BANBRIDGE; *Tanderagee*.—Mumps, measles, and influenza very prevalent.

CASTLEBLAYNEY; *Crossmaglen, No. 1*.—The death rate is unusually high owing to influenza and pulmonary complications.

CASTLEBLAYNEY; *Newtownhamilton*.—Influenza with bronchial complications has been very prevalent.

LURGAN; *Lurgan, No. 1, W*.—The high death rate during the quarter is principally attributable to the influence of the epidemic of influenza which pervaded this district during the last month of the preceding quarter.

LURGAN; *Lurgan, No. 2*.—Influenza was very prevalent, causing a large amount of sickness.

NEWRY; *Forkill*.—Influenza very prevalent throughout district during January and February.

NEWRY; *Mounthorris*.—Owing to the severe epidemics of measles and influenza extending over the entire quarter, I did not consider vaccination judicious. The epidemic of influenza was especially severe, and prolonged gastric complications being most severe.

NEWRY; *Mullaghglass*.—Of the fifty-one deaths registered during the quarter twelve were due to pulmonary phthisis and eleven to bronchitis.

#### Cavan County.

BAILIEBOROUGH; *Bailieborough, W*.—Owing to a severe epidemic of measles and influenza it was impossible to bring children out for vaccination.

BAILIEBOROUGH; *Kingscourt*.—During months of February and March influenza of a mild type was prevalent in the district, but did not prove fatal in any case. The death of a man aged 106 was registered during the quarter.

BAILIEBOROUGH; *Shercock*.—An epidemic of influenza prevalent during the quarter in this district—amongst old and young—complicated in most cases with chest and lung diseases, consequently number of children vaccinated unusually small.

BAILIEBOROUGH; *Termon*.—Vaccination not carried out owing to measles and influenza, as the people did not come to the depots for vaccination.

BAWNBOY; *Swanlinbar*.—Measles was prevalent during first half of quarter, and influenza during months of February and March.

CAVAN; *Ballyhaise*.—Influenza was simply raging during the quarter. Measles was prevalent.

CAVAN; *Killeshandra*.—Influenza and diseases of respiratory organs prevailed during the quarter. Three deaths were registered, respectively, 97, 95 and 90 years.

CAVAN; *Kilnaleck*.—Eighteen deaths caused by influenza.

COOTEHILL; *Cootehill, W*.—Owing to the prevalence of measles and influenza, also severity of weather, vaccination has been retarded.

COOTHILL; *Drum, No. 2*.—Vaccinations few in consequence of influenza and its sequelae. Measles prevalent, but no deaths therefrom.

COOTEHILL; *Tullyvin*.—Influenza and measles prevalent during last quarter.

ENNISKILLEN; *Holywell, No. 2*.—Influenza of a severe type affected the entire district and interfered with the performance of primary vaccination.

OLDCASTLE; *Ballyjamesduff*.—Measles of a very mild type have been prevalent, as also have bronchitis and influenza.

OLDCASTLE; *Virginia*.—Very few vaccinations during the quarter owing to the general epidemic of measles which prevailed through the entire district. There was a death of a woman registered at the phenomenal age of 115 years, also a man at 94 and another woman at 90.

#### Donegal County.

DONEGAL; *Donegal, W*.—Influenza prevalent.

DONEGAL; *Dunkineely*.—An epidemic of measles of severe type prevails in district, necessitating the closing of most of the schools, and directly or indirectly causing seven deaths, only one of which is registered as yet. Influenza also prevalent.

DONEGAL; *Mountcharles*.—Owing to an outbreak of measles, in a large number of cases vaccination was postponed.

DONEGAL; *Pettigoe*.—Influenza, which was very prevalent during quarter, caused three deaths— one in a patient 108 years. Two cases of measles.

DUNFANAGHY; *Dunfanaghy, W*.—Influenza is now prevalent in this district.

DUNFANAGHY; *Gweedore*.—Influenza prevalent during the quarter.

GLenties; *Carrick*.—There is a good deal of measles and of influenza. Vaccination much neglected, but not on account of diseases.

GLenties; *Dunglow, No. 1*.—A mild form of measles has appeared in this district. Vaccination has been well attended during this quarter. The district is in a good sanitary condition.

**GLENTIES; Dunglow, No. 2.**—The recent large increase in the population of Burtonport village due to railway works, sewing factory, &c., without sanitary accommodation, threatens to affect injuriously the public health of the district.

**GLENTIES; Glenties, W.**—The water supply of the village is very defective.

**GLENTIES; Killybegs.**—Influenza and measles have been prevalent during the past quarter, but no deaths occurred from the latter.

**INISHOWEN; Buncrana.**—Influenza very prevalent throughout district during quarter, in consequence of which vaccination had to be postponed. Of the persons aged 60 years and upwards registered four were over 90 years.

**INISHOWEN; Carndonagh, W.**—Owing to the prevalence of influenza and bronchial troubles among children vaccination in the great majority of cases had to be postponed.

**INISHOWEN; Glenties.**—There has been an epidemic of influenza prevailing throughout the district for the last three months, consequently all vaccinations were postponed.

**INISHOWEN; Malin.**—One death from diphtheria is reported, but not yet registered. The disease was imported into district by a clergyman who attended a patient suffering from this illness in an adjoining county and contracted disease there. Disinfection was performed, and there have been no new cases. Influenza of a severe type prevalent throughout the district. District otherwise healthy.

**INISHOWEN; Moville.**—Influenza very prevalent at present.

**LONDONDERY; Burt.**—Influenza and its sequelæ were prevalent during the quarter.

**LONDONDERY; Kilderry.**—Diphtheria occurred in two families in this district some miles apart. In one house seven were attacked, all recovered; in the other two cases, one recovered.

**MILLFORD; Fanad.**—Four deaths registered of persons over 80 years.

**STRABANE; Raphoe.**—Owing to the prevalence of influenza, as well as catarrhal affections among children, scarcely any vaccination was performed during past two months. No other infectious disease except influenza. Sanitary arrangements well looked after.

#### Down County.

**BANBRIDGE; Ballyward.**—Sanitary state of district fairly good. Influenza was very prevalent, and caused seven deaths. Vaccination postponed in some cases owing to the severe winter.

**BANBRIDGE; Loughbrickland.**—There was a severe epidemic of influenza chiefly in the first month of the quarter.

**BELFAST; Belfast Urban, No. 11.**—The health of the district is satisfactory.

**DOWNPATRICK; Ballynahinch.**—The district is at present fairly healthy, but we have had exceptionally unhealthy season, and a much greater mortality than usual owing to the prevalence of influenza and its sequelæ, chiefly of pneumonia and bronchial troubles.

**DOWNPATRICK; Clough.**—Influenza very prevalent; numerous deaths caused by its complications.

**DOWNPATRICK; Downpatrick, W.**—Two deaths attributed to dysentery; nine deaths attributed to influenza.

**DOWNPATRICK; Killough.**—Influenza was very prevalent, and accounted for ten of the deaths registered during the quarter. Vaccination is behind owing to sickness and severity of weather.

**DOWNPATRICK; Killyleagh.**—Influenza has been epidemic during the quarter. Three deaths are attributed to it. There is no other epidemic in the district at present.

**KILKEEL; Kilkeel, No. 2.**—District healthy, except one or two isolated cases of scarlatina of a very mild type. Deaths of aged people from bronchial affections more frequent than usual, which accounts for the large number of deaths in district for quarter. Influenza has been rife, but very mild.

**KILKEEL; Rosstrevor.**—The ages of the persons 60 and upwards whose deaths were registered were—two at 64, two at 67, two at 70, 71, two at 75, 83, 85, 90.

**LISBURN; Drumbeg.**—Influenza was very prevalent in January, and five deaths are attributed to it.

**LISBURN; Saintfield.**—Influenza was raging in district during first two months of year, and as a result a large number of old people were carried off, the oldest member dying at age of 98.

**LURGAN; Moira.**—Influenza has been prevalent, and chest diseases account for nearly four-fifths of the deaths. Birth rate low.

**LURGAN; Waringstown.**—There have been a few cases of whooping-cough and scarlet fever.

**NEWRY; Donaghmore.**—Influenza very prevalent, but no deaths, though about twenty cases of congestion of lungs as a complication.

**NEWRY; Rathfriland.**—Influenza and its sequelæ took away a great number of aged. On account of influenza I did not care for pushing vaccination, and the snow in my district only commenced to melt yesterday.

**NEWTOWARDS; Greyabbey.**—Mortality chiefly amongst aged. Of forty-four deaths registered thirty were 60 years and upwards; of these twenty were between 70 and 90 years, and three 90, 94, and 98 years.

Influenza present in the district throughout the quarter and still present. Sixteen deaths registered are due to it, and twelve to other chest affections; east wind, and in varying points north or south, has been with us during the past month or six weeks, adding greatly to number of catarrhal cases and enervating those of weak circulations.

**NEWTOWNARDS; Newtownards, W.**—There has been a good deal of influenza during the past three months. Fifteen deaths from it have been registered; many of the cases were complicated with pneumonia and bronchitis. Diseases of the respiratory system have been prevalent, chiefly bronchitis and bronchial catarrh. The epidemic of whooping-cough has passed over and there are now very few cases. An epidemic of mumps is now present. There is urgent need of a proper system of sewers in this town. Surface water drains which are built and not watertight are being allowed to carry sewage. Water supply derived from pumps through the town. The danger of pollution is obvious.

#### Fermanagh County.

**BALLYSHANNON; Belleek.**—Vaccination postponed owing to inclemency of weather and epidemic of influenza.

**BALLYSHANNON; Church Hill.**—Influenza was prevalent during the quarter, there being six deaths from it. There is at present an epidemic of measles from which no deaths have yet taken place.

**CLONES; Rosslea.**—There was great mortality among the aged during the quarter. The deaths of two persons, a male and a female respectively, at 100 years, were registered.

**ENNISKILLEN; Ely.**—Influenza has been prevalent in district for some time past. No other disease in the district.

**ENNISKILLEN; Florencecourt.**—Measles of a severe type was prevalent through the district during quarter. One case of scarlet fever, which was removed to fever hospital, took place in the beginning of last month.

**ENNISKILLEN; Holywell, No. 1.**—Influenza was prevalent over the entire district and prevented primary vaccination.

**IRVINESTOWN; Clonelly.**—Influenza prevalent.

**IRVINESTOWN; Ederney.**—I have registered the death of a person 100 years of age, on what I believe to be very good evidence.

**IRVINESTOWN; Irvinestown, W.**—Diphtheria occurred in two families during the quarter, resulting in three deaths in one, and one in the other. Influenza prevailed during the earlier part of the quarter, but has now passed away; it had, however, a very appreciable effect in reducing vaccination.

**LISNASKEA; Derrylin.**—Some influenza still prevalent; no other epidemic.

**LISNASKEA; Lisnaskea, W.**—Influenza prevalent in this district during past quarter, causing several deaths of old persons.

#### Londonderry County.

**COLERAINE; Garvagh.**—Influenza and its complications have accounted for eight of the deaths registered.

**COLERAINE; Kibrea.**—Few primary vaccinations owing to the prevalence of influenza in the district during the quarter.

**COLERAINE; Portstewart.**—Influenza was prevalent, but only two deaths amongst old people were due to it. I saw two cases of measles on the 28th of March, and had one very mild case of scarlatina in February.

**LIMAVADY; Ballykelly.**—Influenza has been prevalent during quarter, and in combination with old age or bronchitis, caused five deaths.

**LIMAVADY; Bellefenn.**—Influenza of a severe type has been epidemic throughout the entire district during past quarter. Two deaths have been registered from it.

**LIMAVADY; Dungiven.**—Sanitary condition good. Influenza very prevalent during quarter. Not many deaths primarily from it, but from complications, and these being few. Mortality, principally among the aged, and those suffering from chronic diseases. Vaccination delayed owing to the epidemic of influenza.

**LIMAVADY; Limavady, W.**—The district has suffered from influenza during all the three months of the quarter. Almost half of the population has been attacked, and three deaths have been registered from that disease. Diseases of the respiratory organs of frequent occurrence.

**LONDONDERRY; Claudy.**—The abnormally high death rate is to be attributed in great measure to a severe epidemic of influenza, although only four deaths, and those of very old people, were attributed directly to it. One-third of the deaths registered is due to diseases of the respiratory system, and of these four were due to phthisis pulmonalis.

**LONDONDERRY; City of Derry, No. 1.**—Two deaths from influenza; one death from puerperal fever.

**LONDONDERRY; Upper Liberties.**—One death from influenza.

**MAGHERAFELT; Draperstown.**—The death of a woman 100 years of age registered.

**MAGHERAFELT; Magherafelt, W.**—Measles and influenza have been prevalent in the district, and some cases of typhoid.

**MAGHERAFELT; Moneymore.**—Not much vaccination done during quarter owing to prevalence of influenza; Death

rate very high, due chiefly to chest affections, many from influenza and its sequelæ. No deaths occurred from other infectious diseases. District free from the latter with the exception of one family affected with typhoid fever.

### Monaghan County.

**CARRICKMACROSS; Carrickmacross, W.**—Vaccination was suspended during the quarter, owing to severe weather, influenza, and a severe epidemic of measles which is just now dying out. Several deaths not yet registered were caused by capillary bronchitis complicating measles.

**CARRICKMACROSS; Donaghmoyne.**—Measles and influenza very prevalent during quarter. One death from former and five from latter; registered vaccination practically suspended during quarter owing to inclemency of weather and prevalence of disease.

**CARRICKMACROSS; Raferagh.**—I have had to report in the case of four unsanitary dwellings; but I would say that the houses, as a rule, are in good condition and seldom dangerous, excepting cases where they keep manure heaps within a few yards of the dwelling-house. I have to reckon two deaths from measles, from a rather severe epidemic of which the district is only recovering. Owing to epidemic of measles and the cold weather I have not pressed vaccination.

**CASTLEBLAYNEY; Ballybay.**—Owing to the very severe weather vaccination was postponed in many instances, as it was dangerous to bring the children to the different stations for the purpose. Measles also accounted for the unusually small number of vaccinations.

**CASTLEBLAYNEY; Castleblayney, W.**—The prevalence of stormy weather, influenza, and measles, during the quarter caused the vaccinations to be much smaller than might have been expected. A case of enteric fever occurred in a densely populated portion of the town, but the disease did not spread. Its origin was traced to a defective stench trap near the house, and this was promptly repaired. The death-rate, especially among the aged, was unusually high.

**CASTLEBLAYNEY; Newtownhamilton, No. 2.**—Influenza with bronchial complications has been prevalent.

**CLONES; Clones, W.**—Hardly any children have been brought in for vaccinations owing to the prevalence of influenza and measles.

**COOTEHILL; Dawsonsgrove.**—The sanitary arrangements in district are fairly good. Measles and influenza were very prevalent during the quarter; the former has now completely disappeared, whilst the latter is on the decline. Most of the patients suffering from measles who came under my notice were

adults, and all had severe diarrhœa, but there were no deaths from the disease. Mortality was high amongst the aged, and there were five deaths from phthisis during the quarter.

**COOTEHILL; Drum, No. 1.**—Influenza was prevalent, and there were also a good many cases of measles of a mild type.

**MONAGHAN; Castleshane.**—There has been an epidemic of influenza and some cases of measles during the quarter. District in good sanitary condition.

**MONAGHAN; Kilmere.**—A widespread epidemic of measles among children, with one death. Influenza very prevalent, with a large mortality among persons over sixty, chiefly from this cause; a couple of the deaths of children under one year were also due to this cause.

**MONAGHAN; Monaghan, W.**—The sanitary condition of the district is satisfactory; there has been no epidemic disease, and although the number of deaths has been more numerous than usual, the cause is attributable to the effect of the weather on old people.

### Tyrone County.

**CASTLEBERG; Castlederg.**—Sanitary state of district satisfactory at present. Influenza very prevalent past quarter.

**CASTLEBERG; Drumquin.**—The high death-rate for quarter was due to severe weather and influenza epidemic. There is one idea that the age of 106 years, which may be taken as fairly correct.

**CASTLEBERG; Killeter.**—Influenza very prevalent during the quarter.

**CLOGHER; Ballygawley.**—Influenza prevalent during the quarter.

**CLOGHER; Clogher, W.**—A very severe epidemic of influenza in district during the quarter, which prevented children being brought out for vaccination. The sanitary condition of district is good.

**CLOGHER; Fivemiletown.**—The deaths during the quarter are very high, and nearly all took place during the last two months, and were mostly the result of old age, influenza and its complications. The weather has been very cold, unsettled, and severe during the months of February and March, and caused also a great many cases of bronchitis and other chest affections. Some cases of measles during the last two weeks, but the attack is of a mild character.

**COOKSTOWN; Cookstown, W.**—There have been epidemics of whooping-cough and influenza in the district, consequently greatly diminished vaccination.

**COOKSTOWN; Stewartstown.**—There has been an epidemic of influenza.

**DUNGANNON; Caledon and Ballymagran.**—A widespread and severe epidemic of measles in unprotected children prevailed

during past quarter, in many cases complicated with catarrhal bronchitis, catarrhal ophthalmia, and ulcer of cornea. There were no deaths. An epidemic of influenza was also prevalent, which carried off a few of the old people. Sanitation fairly good.

**DUNGANNON; Clonavaddy.**—Sanitary arrangements in the district fairly good. Majority of deaths were due to influenza and pulmonary complications; also natural decay.

**DUNGANNON; Coal Island.**—The mortality during quarter was higher than in any quarter during past ten years, but mostly among aged people, viz.—70 and over, 8 deaths; 80 and over, 16 deaths; and three of 94, 95, and 97 years respectively.

**IRVINESTOWN; Trillick.**—Of the deaths registered during the quarter, thirty-two were of old people. One at the age of 96; one 87; one 86; two 85; two 84; one 83; one 82; and six at 80. Influenza of a very severe form prevailed in the district during the past quarter. Measles of a very mild form also prevailed, and four cases of typhus fever occurred in one family. The houses of the poorer class are in a very dilapidated state.

**OMAGH; Dromore.**—Influenza very prevalent during the quarter.

**OMAGH; Drumquin.**—The sanitary arrangements in the district are fairly good. Two mild cases of typhoid. No deaths from that disease. There was a considerable number of cases of influenza.

**OMAGH; Fintona.**—Influenza has been epidemic throughout the district during the past quarter, and a number of aged persons from 70 to 90 years of age died from the effects of that disease. The sanitary arrangements are good.

**OMAGH; Omagh, No. 1, W.**—Vaccination considerably behind, owing to severe, cold weather.

**OMAGH; Omagh, No. 2.**—The death rate in this district has been very high during the past quarter, owing to an epidemic of influenza.

**STRABANE; Dunmanagh.**—Influenza has been prevalent during the quarter, but is now disappearing.

**STRABANE; Newtown Stewart.**—Influenza, followed in many cases by congestion of lungs, has been prevalent.

**STRABANE; Plumbbridge.**—There has been a severe epidemic of influenza in the district during the past quarter.

#### IV. PROVINCE OF CONNAUGHT.

##### Galway County.

**BALLINASLOE; Killaan.**—Owing to general prevalence of influenza and its sequelæ and inclement weather there were few vaccinations performed. Deaths of two nonagenarians registered.

**BALLINASLOE; Kiltormer.**—All vaccinations postponed owing to influenza.

**BALLINASLOE; Lawrencetown.**—Vaccination in general was postponed to next quarter owing to the prevalence of influenza among children and parents.

**CLIFDEN; Rinivyle.**—No vaccinations were performed during the quarter owing to the inclemency of the weather.

**CLIFDEN; Roundstone, No. 1.**—Some cases of influenza appeared during the last month of quarter, otherwise the district is healthy.

**CLIFDEN; Roundstone, No. 2.**—Of the deaths registered, four of them were of persons aged respectively 75, 80, 83, and 90 years, and one that of a woman who reached the ripe age of 114 years.

**GALWAY; Galway, No. 3.**—Influenza has again visited the district.

**GALWAY; Oranmore.**—Influenza very prevalent during the quarter.

**GALWAY; Spiddle.**—I have had some cases of typhus fever during quarter. Influenza was very prevalent.

**GALWAY; Turloughmore.**—There were three cases of epidemic cerebro-spinal meningitis occurring on the same day, each about a mile apart. A great number of old people died during the quarter. The sanitary state is good. Influenza was prevalent.

**GLENNAMADDY; Glennamaddy, W.**—The majority of the deaths registered were of very old persons, nine of whom were 80 years and over, three 90 years, and one 98 years.

**GLENNAMADDY; Williamstown.**—Scarlatina of a mild type occurred amongst the members of one family. With this exception the district has been free from infectious diseases.

**GORT; Gort, W.**—The cold harsh winds prevented parents from bringing their children to be vaccinated during the quarter.

**GORT; Kinvarra.**—One case of scarlet fever, which recovered. Good deal of influenza during the quarter, and for this reason vaccination was postponed.

**LOUGHREA; Bullaun.**—Of the thirteen persons whose deaths were registered the ages of eleven were 63, 70, 72, 74, 81, 81, 81, 85, 86, 89, and 97 years respectively.

**LOUGHREA; Woodford.**—An epidemic of measles, and several cases of pertussis (whooping-cough) occurred, and the latter is only now subsiding. No death from either disease has been reported. Influenza in a very severe form was prevalent in all parts of the district during the months of January and February.

**OUGHTERARD; Cloonbur, No. 1.**—Influenza very prevalent (epidemic) but has now nearly disappeared.

**OUGHTERARD; Lettermore.**—Eleven deaths from influenza (mostly with pulmonary complications) have been registered.

during the quarter. These were confined (with two exceptions) to children and persons over 60 years of age.

OUGHTERARD; *Oughterard, W.*—Medical Officer states vaccination postponed owing to epidemic of influenza throughout the district.

PORTUMNA; *Eyre-court.*—Influenza has been prevalent for some weeks, but has now disappeared.

PORTUMNA; *Portumna No. 2.*—There have been no vaccinations performed during the winter months.

TUAM; *Dunmore.*—Influenza very prevalent and of a low form.

TUAM; *Headford.*—Vaccinations had to be postponed owing to the severity of the weather, and the prevalence of influenza.

### Leitrim County.

BAWNBOY; *Ballinamore.*—Vaccination had to be postponed in consequence of the prevalence of measles. Influenza has now set in as an epidemic. District otherwise healthy.

CARRICK-ON-SHANNON; *Jamestown, W.*—Of the twenty-one deaths of people over 60 the average age was 75.4 years; eight of them were people of 80 years or upwards. One person died aged 102 years. The vaccination has been retarded by an epidemic of measles in this district.

MANORHAMILTON; *Dromahaire.*—A few cases of scarlatina in different parts of the district; otherwise the district is in fair sanitary condition. Village sewage, however, is still defective. One death was registered during the quarter of an old man aged 105.

MANORHAMILTON; *Lurganboy.*—Influenza was very prevalent during the quarter. The sanitary condition of the district is satisfactory. Vaccinations are backward owing to inclemency of the weather.

MANORHAMILTON; *Manorhamilton, W.*—Influenza has been very prevalent in the district, causing many deaths, chiefly from lung diseases. The number of children vaccinated is small owing to the prevalence of influenza.

MOHILL; *Carrigallen.*—An extremely severe epidemic of influenza prevailed during the quarter, accounting for most of the deaths, including those of thirteen persons over 60 years. The prevalence of this epidemic, together with the existence of some cases of scarlatina and measles, prevented any vaccination; the weather being also very inclement.

MOHILL; *Rinn.*—Measles and influenza were prevalent during the quarter.

MOHILL; *Rowan.*—The district is healthy. The people did not bring in their children for vaccination, probably from the coldness of the weather.

### Mayo County.

BALLINA; *Ballina, W.*—Owing to the severity of the weather, whooping-cough, and influenza, vaccination had to be postponed till April.

BALLINROBE; *Cong.*—Vaccination postponed owing to very inclement weather. Influenza prevailed during the quarter.

BALLINROBE; *Hollymount.*—Births under and deaths over the average. There was a very severe epidemic of influenza, and owing to this epidemic and the cold weather there were no children vaccinated during the quarter.

BELMULLET; *Bangor.*—Vaccination is not, in my opinion, in a satisfactory state, as there are children in this district who have reached two and three years and who have not yet been vaccinated. The guardians have, however, called for a list of defaulters, and propose, I believe, taking proceedings in the cases of some of the defaulters.

BELMULLET; *Binghamstown, W.*—Vaccination was postponed in consequence of the bad weather.

CLAREMORRIS; *Ballindine.*—Vaccination postponed generally owing to some scarlatina cases.

CLAREMORRIS; *Ballyhaunis.*—The health of the district during the quarter has been exceptionally good. No zymotics. Sanitation progressive.

KILLALA; *Killala, W.*—Influenza was very prevalent during the quarter.

SWINFORD; *Swinford, W.*—Eighteen deaths from influenza.

WESTPORT; *Achill.*—Sanitary state fair. An epidemic of influenza prevalent for past quarter with lung complications, and still prevalent. No children presented for past quarter for vaccination.

WESTPORT; *Ballycroy.*—Influenza was prevalent during the months of January and February; not so prevalent in March. Most of the deaths registered within the quarter were from this epidemic.

WESTPORT; *Westport, No. 1, W.*—There is a great deal of pulmonary tuberculosis about this district, more especially in the town of Westport, and immediately along the sea border. Though the rainfall is rather heavy, and the rain season much prolonged, one very rarely meets with rheumatic diseases. The sanitary arrangements of the

town are wretched. Not even one-fourth of the houses have privies or closets. The Infectious Diseases Notification Act and the Infectious Diseases Prevention Act are both inoperative. The water supply is bad and deficient.

#### County Roscommon.

**ATHLONE, Kiltown.**—Influenza of a severe type has been very prevalent in this district during the past quarter, hence the large mortality amongst old and feeble persons.

**BOYLE; Boyle, No. 1, W.**—Influenza and mumps have been prevalent.

**CASTLEREAGH; Castlereagh, W.**—As is usual, no vaccinations during quarter ending March 31st; due, no doubt, to the inclemency of the weather.

**ROSCOMMON; Ballyleague.**—Scarlatina and influenza were prevalent during the quarter.

**STROKESTOWN; Roosky.**—An outbreak of scarlatina occurred during the quarter, three of the deaths recorded are from its effects. The death rate is very high. The ages given of three of the deaths are stated to be 92, 92, and 94 years, respectively.

**STROKESTOWN; Strokestown, W.**—Sanitary condition of the district good. There was a severe epidemic of influenza. No vaccinations on account of season of the year.

#### Sligo County.

**BOYLE; Boyle, No. 2.**—Vaccination was not performed in district during last quarter, owing to prevalence of influenza and severe weather.

**DROMORE WEST; Castleconor.**—No vaccination during past quarter, owing to the severity of the weather, and the prevalence of whooping-cough and influenza.

**DROMORE, WEST; Skreen.**—There has been a severe epidemic of influenza throughout the whole quarter. Vaccinations are much in arrear owing to the want of proper notification.

**SLIGO; Carney, No. 2.**—There were no vaccinations in this quarter owing to the extremely severe weather.

**SLIGO; Collooney.**—A good number of cases of influenza with pneumonia; three cases of diphtheria in district confined to one house.

**Marriages:**—JAN., FEB., MAR., 1900. **Births & Deaths:**—APR., MAY., JUNE, 1900.

---

During the quarter ended 30th June last, there were registered in the 829 Registrars' Districts in Ireland 27,044 births—a number equal to an annual birth-rate of 24·0 in every 1,000 of the estimated population\*—and 22,037 deaths, representing an annual rate of 19·6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 21,510 persons emigrated.

In England last quarter, the birth-rate represented was 29·6 in every 1,000 of the estimated population, and the death-rate 17·8 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 under the average rate for the corresponding quarter of the ten years 1890–99, and 0·3 under the rate for the second quarter of 1899. The deaths exceed those registered in the corresponding quarter of 1899 by 1,125; the death-rate is 1·1 over the rate for that quarter, and 0·9 over the average for the second quarter of the ten years 1890–99.

Compared with those for the corresponding quarter of 1899, the returns of pauperism, furnished by the Local Government Board, show a decrease of 2,020 in the average number of Workhouse inmates on

\* See page 107.

Saturdays during the quarter, and an increase of 226, or 0·4 per cent., in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1890-99 the number of Workhouse inmates shows a decrease of 495, and the number of persons on out-door relief a decrease of 3,146, the total under both heads being 3·5 per cent. below the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·2 per cent.

The annual marriage-rate (5·6 per 1,000 of the population) represented by the marriages registered during the first quarter of 1900 is 0·7 under the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,\* represented by the number of **Marriages** registered during the Quarter ended 31st March, 1900, and by the **Births** and **Deaths** registered in the Quarter ended 30th June, 1900.

### MARRIAGES.

The marriages (6,295) registered in Ireland during the first quarter of 1900 are equivalent to an annual rate of 5·6 per 1,000 of the estimated population, being 0·2 below the rate for the corresponding quarter of the year 1899, and 0·7 under the average rate for the first quarter of the ten years 1890-99. Of the total number of marriages 5,101 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,194 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual

\* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891. See note (\*), page 108.

rate of 6·0 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·3 per 1,000 of the members of all other religious persuasions. Compared with the averages for the corresponding period of the preceding ten years, the rate under the former heading shows a decrease of 0·3, and under the latter a decrease of 0·9. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods**, the **Marriages** registered in Ireland in each of the ten years 1890–99, and the first quarter of 1900.

# BIRTHS.

The number of births registered during the quarter ended 30th June last was 27,044—14,008 boys and 13,036 girls—being equal to an annual ratio of 1 in every 41·6, or 24·0 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1890–99 was 28,044, equivalent to an annual rate of 24·4 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 23·4 per 1,000 of the population, according to the Census of 1891; Munster, 21·7; Ulster, 25·2; and Connaught, 19·4.

The highest county birth-rate\* is 31·5 for Antrim, and the lowest 17·3 for Roscommon. Of the intermediate rates the highest five are—Down, 29·7; Dublin, 29·5; Carlow, 25·5; Kerry, 24·8; and Armagh, 23·5; and the lowest five are—Louth, 17·9; Leitrim, 17·9; Sligo, 18·1; Westmeath, 18·4; and Meath, 18·4.

\* See note (\*) on page 94.

## DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 22,037—10,967 males and 11,070 females—affording an annual ratio of 1 in every 51·1, or 19·6 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1890–99 was 18·7 per 1,000.

The death-rate in Leinster was 20·6 per 1,000 of the population according to the Census of 1891; in Munster, 17·8; in Ulster, 19·7; and in Connaught, 15·0.

The county death-rates\* range from 13·5 in Leitrim to 25·1 in Dublin. Between these rates the lowest five are—Mayo, 14·0; Sligo, 14·9; Cavan, 15·1; Kerry, 15·1; and Roscommon, 15·2; and the highest five are—Antrim, 22·3; Down, 20·6; Armagh, 20·2; Queen's, 20·0; and Wicklow, 19·4.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1890–99, and the average number for that period; also the number registered in the first and second quarters of the year 1900:—

1900. . . . .	23·4	24·0	.	.	.	27·7	19·6	.	.	.

**Ages.**—Of the 22,037 deaths registered last quarter, 2,753, or 12·5 per cent., were of children under 1 year old; and 9,063, or 41·2 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 101·8 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 12·9 per cent. of the total deaths registered therein; in Munster, 12·6 per cent.; in Ulster, 13·0 per cent.; and in Connaught, 10·0 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 37·3 per cent.; in Munster to 42·8 per cent.; in Ulster to 39·9 per cent.; and in Connaught to 50·8 per cent. of the total deaths registered in the province.

## HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal zymotic diseases† is 878, or less by 153 than the number occurring in the corresponding quarter of 1899, and is equivalent to an annual rate of 0·8 per 1,000 living, being 0·1 under the rate for the second quarter of last year, and 0·3 under the average rate for the second quarter of the ten years 1890–99.

\* See note (\*) on page 94.

† See note (†) on page 99.

**Small-pox.**—No death from small-pox occurred in Ireland during the quarter.

**Measles.**—There were 158 deaths from measles, being 102 less than the number which occurred in the previous quarter of the present year, and 136 less than the number that occurred in the corresponding quarter of 1899. 25 deaths from measles occurred in Glenties, 23 in Donegal, and 13 in Belfast.

The deaths from measles were 16 under the average for the corresponding quarter of the last five years.

**Scarlatina.**—There were 56 deaths from this disease during the quarter. These deaths occurred in 28 Unions in Ireland—6 deaths occurred in Longford Union and 5 in Strokestown Union. In the corresponding quarter of 1899 there were 37 deaths from scarlatina in Ireland, and in the first quarter of the present year there were 60 deaths from this disease.

The deaths from scarlatina were 44 beneath the average for the corresponding quarter of the last five years.

**Typhus.**—There were 55 deaths from typhus fever in Ireland during the quarter. This number is 35 in excess of the number of deaths from this disease occurring in the preceding quarter of this year, and 19 in excess of the corresponding quarter of 1899, and 7 above the average for the corresponding quarter of the last five years. Of the total 19 deaths occurred in Leinster, 18 in Ulster, 11 in Connaught, and 7 in Munster. The deaths took place in 28 of the 159 Unions of Ireland; 7 deaths each took place in Drogheda and Galway, 5 in Milford, and 4 in Granard.

**Whooping-cough** caused 159 deaths, which number is less by 55 than the number which occurred during the preceding quarter of the present year, and 113 less than the number of deaths caused by this disease in the corresponding quarter of 1899. The deaths from whooping-cough are 142 beneath the average for the corresponding quarter of the past five years, representing an annual death-rate of 14 in each 100,000 of the estimated population of Ireland.

In the provinces the deaths occurred as following—54 in Munster, 50 in Ulster, 39 in Leinster, and 16 in Connaught. In the following Unions 29 deaths occurred in Belfast, 19 in South Dublin, 14 in Dungarvan, 10 in Fermoy, and 10 in Clonmel. Of the 14 deaths occurring in Dungarvan Union, 8 took place in Ringville district, which corresponds to an annual rate of 11·5 per 1,000 of the population (2,788.)

**Diphtheria.**—Of the 67 deaths caused by this disease 36 took place in Ulster, 24 in Leinster, 6 in Munster, and 1 only in Connaught. The deaths took place in 29 of the Unions in Ireland, 14 or nearly one-fourth of all the deaths occurred in Belfast, 6 each occurred in Kilkenny and Dublin South, 5 in Banbridge, and 4 each in Dublin North and Ballymena.

In the preceding quarter of the present year there were 108 deaths from diphtheria, and in the corresponding quarter of 1899 there were 73 deaths from this disease.

The deaths from diphtheria are one above the average for the corresponding quarter of the last five years.

**Simple continued Fever.**—Under this heading 18 deaths were returned, being 1 under the previous quarter. This number is 16 under the average for the corresponding quarter of the last five years; 6 deaths occurred in Leinster, 6 in Munster, 4 in Connaught, and 2 in Ulster.

**Enteric Fever.**—Deaths from enteric fever, which had fallen to 157 in the March quarter of the present year from 247 in the last quarter of 1899, rose again to 211 in the quarter ending June 30th, 1900. This number is 37 over the average for the corresponding quarter of last five years.

Of those deaths 124 took place in Ulster, 42 in Leinster, 31 in Munster, and 14 in Connaught.

Out of 159 Unions in Ireland, 53, or one-third, of the total contributed deaths to this disease. In Belfast 86 deaths occurred; 38 deaths took place in Belfast No. 4 Urban District, in which the Union Hospital is situated and 13 deaths took place in Belfast No. 3 Urban District; 19 deaths occurred in South Dublin, and 12 in North Dublin Unions; 6 deaths occurred in Dromore West, 6 in Lisburn, 5 in Omagh, and 4 in Kanturk.

The 86 deaths occurring in Belfast represent an annual death rate of 9·1 per 10,000 of the population.

**Diarrhœa.**—The deaths from diarrhœa, in number 152, are 35 under the average of the corresponding quarter of last five years, and less by 55 than the preceding quarter of the present year, but 11 in excess of the number of deaths from this disease, which occurred in the corresponding quarter of last year; 81 deaths occurred in Ulster, 32 in Munster, 30 in Leinster, and 9 in Connaught. Of the total number, 34 occurred in Belfast Union, 11 in South Dublin, and 8 in North Dublin Unions.

**Cholera, English.**—Two deaths occurred: 1 in South Dublin Union and 1 in Skull Union.

**Cerebro-spinal Meningitis.**—Forty-five deaths took place from this disease in the Dublin Registration area, as compared with 7 which took place in the previous quarter; the total number of deaths from this disease, 52, during the half-year, is 46·6 above the average, 5·4, for the corresponding period of the five years ending on the 30th June, 1899.

Two deaths are reported as having occurred from this disease in Limerick, and 1 in Moroe; 2 deaths are also reported as occurring in Armagh, and cerebro-spinal meningitis is reported as being very prevalent in Cork Urban Districts 4 and 7 during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Chicken-pox in 1 district, measles in 46 districts, scarlatina in 20, whooping-cough in 14, diphtheria in 10, fever in 41 (typhus 13, ill-defined 1, and enteric 27), influenza in 30, and cerebro-spinal meningitis in 5.

**Inquests.**—There were 524 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 42 of the total deaths registered.

In Leinster there was 1 inquest to every 32 deaths registered, in Munster 1 to 58, in Ulster 1 to 36, and in Connaught 1 to 159.

**Deaths in Public Institutions.**—Of the 22,037 deaths registered, 3,812 or 17·3 per cent., occurred in public institutions. In Leinster the percentage was 24·8, in Munster 20·7, in Ulster 11·7, and in Connaught 10·2.

The following table (Table IV.) shows the number of deaths from the principal zymotic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1900, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population:—

Deaths from Principal Zymotic Diseases.

## URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V. The death-rate for last quarter in these districts, which contain about one third of the total population of the country, was 24·0, and the birth-rate 31·4 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 16·9 and the birth-rate 20·1 per 1,000. The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Districts during the quarter was 1·3 per 1,000 of the population, according to the Census of 1911; in the remainder of the country the rate was 0·6 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1900, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

(NOTE.—"The Dublin Registration Area," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, New Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and the twenty-two Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by Registrars and relate to the thirteen weeks ending Saturday, 30th June, 1900.)

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, diarrhoea and simple cholera.

‡ The rates for Belfast have been calculated on the population estimated to the middle of the year 1900.

**VACCINATION.**

According to the Returns of Primary Vaccinations received for the second quarter of the year 1900, there were 33,629 persons successfully vaccinated; in 3,172 cases the operation was postponed, 41 children were reported as insusceptible of vaccination, and the deaths of 1,584 unvaccinated children under 3 months old were registered, making a total of 38,426 children with regard to whom particulars as to vaccination were ascertained.

**EMIGRATION.**

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 21,510 (10,443 males and 11,067 females), being 1,839 more than in the corresponding quarter of the year 1899, and 1,028 under the average number for the second quarter of the ten years 1890–99.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June, in 1899 and 1900:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1899.	1900.	In-crease.	De-crease.	1899.	1900.	In-crease.	De-crease.	1899.	1900.	In-crease.	De-crease.
April, . . .	4,234	4,286	52	—	5,034	4,157	—	877	9,268	8,443	—	825

June, . . .	1,481	1,860	379	—	1,679	1,953	274	—	3,160	3,813	653	—
Total, . . .	8,909	10,443	1,534	—	10,762	11,067	305	—	19,671	21,510	1,839	—

**PRICES AND PAUPERISM.**

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 5*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1899 the average price was 5*d.*, and in the corresponding quarter of 1890 it was 6*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* per cwt., being 3*d.* over the average for the corresponding quarter of the year 1899. In the second quarter of 1890 the average price was 15*s.* 3*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 7*d.* to 5*s.* 2*d.* In the second quarter of 1899 the average prices were 2*s.* 10*d.* to 4*s.* 8*d.*, and the prices for the corresponding quarter of 1890 were 2*s.* 5*d.* to 3*s.* 4*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 53*s.* to 62*s.* 6*d.* per cwt. In the corresponding quarter of 1899 the average prices were from 51*s.* 6*d.* to 60*s.* and in the second quarter of 1890 they were from 53*s.* 6*d.* to 65*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22*s.* to 25*s.* per ton.

The highest price of 2 $\frac{3}{4}$  per cent. Consols at the Dublin Stock Exchange for the quarter was £102 $\frac{1}{4}$ , and the lowest £100. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was reduced on the 11th January from 6 per cent., at which it stood since the 30th November 1899, to 5 per cent., on the 25th January to 4 $\frac{1}{2}$  per cent, and on the 24th May to 4 per cent.

NOTE—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1900 was 41,397, or 2,020 under the average for the corresponding period in 1899.

The average weekly number of persons receiving out-door relief during the quarter was 58,673, being 226 over the average for the second quarter of 1899.

Of the persons receiving in-door relief during the second quarter of 1900, an average number of 1,453 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1899 the average weekly number was 1,503.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1900, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

#### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the second quarter of the years 1895–1900, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 106):—

The mean height of the barometer during the second quarter of 1900 was 29·934 inches, being ·059 inch under the average for the corres-

\* Latitude 53° 21' 44·65" north; longitude 6° 21' 6·35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1895-9; the highest reading (30.529 inches) was on the 19th April, at 9 A.M., wind S.E.; and the lowest (29.051 inches) on the 3rd May, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was  $50.9^{\circ}$ , or  $0.3^{\circ}$  under the average for the second quarter of the five years 1895-99. The maximum temperature was  $70.1^{\circ}$ , and the minimum  $31.5^{\circ}$ . The maximum heat in sun was  $137.3^{\circ}$ , and the minimum on the grass  $24.2^{\circ}$ .

Rain or snow fell on 54 days during the quarter. The rain-fall measured 7.410 inches, being 1.855 inches over the average for the second quarter of the five years 1895-99. The greatest monthly rain-fall was in June, when 3.700 inches were registered.

The wind blew on 3 days from N., on 6 days from N.E., on 8 days each from E. and S.E., on 11 days from S., on 14 days from S.W., on 26 days from W., and on 5 days from N.W., and the air was calm on 10 days at 9 A.M.

*April.*—The mean height of the barometer during this month was 29.961 inches; the highest reading (30.529 inches) was on the 19th, at 9 A.M., wind S.E.; and the lowest (29.273 inches) on the 3rd, at 9 P.M., wind W. The mean temperature of the air was  $47.0^{\circ}$ , the maximum registered was  $68.8^{\circ}$ , and the minimum  $31.5^{\circ}$ . The 21st was the warmest day, and the 15th the coldest night. The mean of the dry bulb was  $48.8^{\circ}$ , and of the wet bulb  $45.4^{\circ}$ . The maximum heat in sun was  $120.2^{\circ}$ , and the minimum on the grass  $24.2^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 11 nights. The total amount of sunshine recorded was 147.7 hours, the greatest daily amount being 12.7 hours on the 20th. The maximum ozone was .9, the minimum .1, and the mean .5. Rain or snow fell on 19 days. The rainfall measured 1.655 inches; the greatest amount in 24 hours was .290 inch on the 3rd.

*May.*—The mean height of the barometer during this month was 29.944 inches; the highest reading (30.435 inches) was on the 29th, at 9 A.M., wind N.W.; and the lowest (29.051 inches) on the 3rd, at 9 A.M., wind S.W. The mean temperature of the air was  $33.0^{\circ}$ , the maximum registered was  $63.4^{\circ}$ , and the minimum  $49.5^{\circ}$ . The 28th was the warmest day, and the 19th the coldest night. The mean of the dry bulb was  $52.5^{\circ}$ , and of the wet bulb  $48.1^{\circ}$ . The maximum heat in sun was  $122.3^{\circ}$ , and the minimum on the grass  $26.3^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 8 nights. The total amount of sunshine recorded was 210.6 hours, the greatest daily amount being 14.8 hours on the 16th. The maximum ozone was .7, the minimum .1, and the mean .5. Rain or snow fell on 14 days. The rain-fall measured 2.055 inches; the greatest amount in 24 hours was .575 inch on the 23rd.

*June.*—The mean height of the barometer during this month was 29.898 inches; the highest reading (30.438 inches) was on the 1st, at 9 A.M., wind E.; and the lowest (29.376 inches) on the 24th, at 9 P.M., wind S.W. The mean temperature of the air was  $56.1^{\circ}$ , the maximum registered was  $70.1^{\circ}$ , and the minimum  $39.6^{\circ}$ . The 15th was the warmest day, and the 1st the coldest night. The mean of the dry bulb was  $58.1^{\circ}$ , and of the wet bulb  $54.0^{\circ}$ . The maximum heat in sun was  $137.3^{\circ}$ , and the minimum on the grass  $31.0^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 2 nights. The total amount of sunshine recorded was 181.6 hours, the greatest daily amount being 14.6 hours on the 3rd. The maximum ozone was .7, the minimum .1, and the mean .3. Rain or snow fell on 21 days. The rain-fall measured 3.700 inches; the greatest amount in 24 hours was .915 inches on the 20th.

\* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature) are as follow:—Valencia + ·050; Killarney, + ·102; Parsonstown, + ·191; Dublin

mentioned Seven IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

At this Station Greenwich mean time is kept, but at the other Stations Local time is observed, corrected for instrumental error, and reduced to 32° Fahr. as before, but not reduced to mean sea level, and then to the normal, the approximate corrections for the purpose (varying within slight limits with the pressure and City), +.058; Markree Castle, +.141; Armagh +.224; Londonderry, +.090.

NOTE.—This table has been constructed for the years 1826 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1900—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

## ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.\*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1891.	Mar- riages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include													Vaccination Return for the Quarter ending 30th June, 1900.				Total of the foregoing.	
			Registered in the Quar- ter ending 31st Mar., 1900.	Registered in the Quar- ter ending 30th June, 1900.	Registered in the Quar- ter ending 30th June, 1900.	Averages in the Quar- ter ending 30th June, 1900.	Registered in the Quar- ter ending 30th June, 1900.	Persons aged 60 years and up- wards.	Deaths from											Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons inappreciable of Vac- cination.	Number of Unvacci- nated Children under 3 months old, whose deaths were registered during the quarter.				
									Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined Fever.	Krnetic Fever.	Diarrhœa.	Cholera.	Violence.					Inquest Cases.	Deaths in Public Insti- tutions.

(a) See note (\*) page 109.

<sup>a</sup> The Registrars' Districts (829 in number) are Subdivisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act.

The letter W denotes that the Registrar's District (or portion of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

4 The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 121 and 122 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 1st April to 30th June, 1900. With the exception of 90 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

## APPENDIX.

## REGISTRARS' NOTES.

*On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.*

*In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.*

The Registrars alone must be considered responsible for the opinions which they express.

*Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.*

## I. PROVINCE OF LEINSTER.

## Dublin County.

BALROTHERY; *Lusk*.—There was one death from diphtheria and one from scarlatina during the quarter; but having used all the necessary precautions as to disinfection, &c., the diseases did not spread.

DUBLIN NORTH; *Blanchardstown and Castleknock*.—There are about nine cases of measles at present of a mild type.

DUBLIN SOUTH; *Clondalkin*.—Of six deaths two were over 80 years, while one was 95 years.

DUBLIN SOUTH; *Palmerston*.—One case of measles complicated with acute phthisis. Also a case of diarrhoea followed by convulsions occurred.

## Kildare County.

CELBRIDGE; *Maynooth*.—Sanitary state of district fair. One death from scarlatina.

EDENDERRY; *Carbury*.—Vaccination delayed through ill-health.

EDENDERRY; *Rathangan, No. 1*.—The deaths of three men aged 84, 88, and 95 years were registered. The last was well authenticated, he being the oldest man in the district.

NAAS; *Kildare*.—Sewerage is being carried out extensively here. District safe from epidemic. Influenza in a few cases of mild type occurred in April.

NAAS; *Naas and Carragh, W*.—One case of diphtheria, which ended fatally, arrived in this district direct from Holyhead, and came in a Gipsy's van. The van was thoroughly disinfected and kept under observation by orders of the M.O. of the district, and no further outbreak took place. At present this district is in a fair state of health, with no prevalent disease.

NAAS; *Newbridge*.—The small number of soldiers' families at Curragh and Newbridge accounts for the great diminution in per-centage of births this quarter.

## Kilkenny County.

CASTLECOMER; *Castlecomer, W*.—Pulmonary affections were very prevalent during the last quarter.

KILKENNY; *Kilkenny, No. 2*.—Diphtheria prevails in this district, due to defective sewerage and want of a water supply.

THOMASTOWN; *Knocktopher*.—There was one death registered at the age of 100 years.

WATERFORD; *Ullid*.—One of the two cases of deaths from scarlatina suffered also from diphtheria.

## King's County.

BIRR; *Frankford*.—Ten deaths were registered of the following respective ages:—88, 86, 79, 76, 75, 71, 70, 70, 67, 61.

BIRR; *Kinnitty*.—There was one case of scarlatina during quarter, which I sent to hospital, and I understand the patient is now convalescent.

## Longford County.

GRANARD; *Ballinallee*.—There were five outbreaks of typhus fever in different parts of the district. The houses in which these outbreaks occurred were characterised by defective ventilation and bad light, and—except in one instance—overcrowding.

LONGFORD; *Killashee*.—Scarlatina was prevalent in two electoral divisions, viz.—Rathelene and Cloondara, hence the reduced number of vaccinations.

## Louth County.

ARDEE; *Castletellingham*.—Vaccinations postponed owing to epidemic of measles.

DUNDALK; *Barronstown*.—A few cases of enteric fever occurred in one family. I had the cases at once removed to the Union Fever Hospital, and there has been no recurrence of the disease. At present the district is free from zymotic disease, and in a very healthy state.

**DUNDALK**; *Dundalk, W.*—There were three deaths in the urban and one in the rural portion of the district from influenza. Two isolated cases of diphtheria occurred in the town, one proving fatal; but there has not been anything in the nature of an epidemic of any disease. The district at present is in a very healthy condition.

### Meath County.

**DROGHEDA**; *Stamullen.*—With the exception of some cases of measles of a mild type, the district has otherwise been in a healthy condition during the past quarter. Sanitary state and water supply generally good.

**DUNSHAUGHLIN**; *Killeen.*—There were some cases of measles during the last three weeks, and now it is threatening to assume an epidemic form; measures have been adopted to forestall this, if possible, by closing the schools, and by sanitation.

**NAVAN**; *Painestown.*—The health of the district is satisfactory at present; but during the first two months of the quarter measles prevailed generally.

### Queen's County.

**MOUNTMELICK**; *Clonygowan, No. 1.*—One death registered at 97 years.

### Westmeath County.

**MULLINGAR**; *Castletown-Geoghegan.*—Over 70 per cent. of the deaths registered were of persons aged over 60. One was 100 years of age—one 97. On inquiry I ascertained the ages given were considered correct.

### Wexford County.

**NEW ROSS**; *Old Ross.*—One death was registered at 101 years.

**WEXFORD**; *Crossabeg.*—Four of the eleven deaths registered during quarter varied from 81 years to 89 years.

### Wicklow County.

**BALTINGLASS**; *Baltinglass, No. 1, W.*—The deaths of several old people from influenza, with complications, were registered during this quarter.

**BALTINGLASS**; *Kiltegan.*—Of the twenty-six deaths registered during the quarter, sixteen were of persons aged as follows:—96, 91, 90, 89, 87, 81, 80, 80, 79, 75, 74, 73, 73, 72, 72, 60. Of the remaining ten deaths, six were caused by tuberculous diseases.

**NAAS**; *Blessington, No. 1.*—I registered the deaths of two persons, aged 94 years, of the farming class. Both were strong, till about two months before death.

**RATHRUM**; *Newcastle.*—Pertussis (whooping cough) prevalent in district. Five sporadic cases of scarlatina occurred during the quarter, and were removed to hospital. All sanitary precautions being taken to stop spread of disease,

## II. PROVINCE OF MUNSTER.

### Clare County.

**ENNIS**; *Ennis, No. 2.*—Diphtheria occurred in one family in this district. I had the patient and all other inmates of the house, removed to the fever hospital in the workhouse; the house has been thoroughly disinfected in their absence. I could not trace the cause of this case.

**KILRUSH**; *Craggaknock.*—During quarter thirteen of the deaths registered were those of people whose ages were as follows:—81, 94, 90, 90, 96, 83, 92, 80, 85, 98, 89, 80, and 98 years.

**KILRUSH**; *Kilrush, W.*—Pneumonia very prevalent; district otherwise healthy.

**SCARRIFF**; *Annacarriga.*—There was one case of typhus which I sent to Scarriff fever hospital. I have strong hopes, from the measures of precaution employed, that the spread of the malady is checked.

**SCARRIFF**; *Feakle.*—Sanitary arrangements fairly good. No contagious disease. There appears from the usual column of the indexed minute-book to be 63 children in the district over three months old on 30th June, 1900, not vaccinated, dead, or otherwise accounted for.

**TULLA**; *Kilkishen.*—There was one case of enteric fever during the quarter. The patient was removed to hospital and the disease did not spread. The source of infection could not be traced.

### Cork County.

**BANTRY**; *Bantry W.*—Health of district very good; no zymotic disease prevailing; the death of a man at the age of 102, and a woman at 99 is recorded.

**BANTRY**; *Durrus and Kilcrohane.*—District fairly healthy. A good number of cases of influenza for first month of quarter, but the disease has now died out.

**CASTLETOWN**; *Kilcatherine.*—Influenza at present prevalent.

**CORK**; *Cork Urban, No. 4.*—Cerebro-spinal meningitis very prevalent.

**CORK**; *Cork Urban, No. 7.*—Cerebral and cerebro-spinal meningitis very prevalent during the quarter.

**KINSALE**; *Ballyfeard.*—Health of district good; one death registered at 93 years.

**MACROOM**; *Inchigeelagh.*—Water supply for the village of Inchigeelagh badly required.

MALLOW; *Kilshannig*.—Influenza and chest affections were very prevalent during the month of April.

MALLOW; *Rahan*.—One case of typhoid fever and two cases of scarlatina occurred during past quarter; district otherwise healthy.

MIDDLETON; *Aghada*.—There has not been a single case of successful vaccination registered from January 9th, 1900, to July 10th, 1900. I learn from Dr. Ahern, Civil Surgeon to Fort Carlisle, that an epidemic of scarlatina prevailed there during April and May, 1900; no case as far as I know occurred outside the Fort.

MIDDLETON; *Middleton, No. 2*.—Whooping-cough was epidemic during the quarter; one death from meningitis occurred in a house where the other children were suffering from whooping-cough.

### Kerry County.

CAHERSIVEEN; *Derrymane*.—On the whole the sanitary condition of the district is fairly satisfactory. The primary enteric case was clearly attributable to the emanation from a filthy privy, the contagion being conveyed to the second case through the medium of milk supplied from the house of the primary infected patient.

DINGLE; *Dingle, W*.—District fairly healthy for the past three months. There were two deaths registered from typhoid fever, and there were a few cases of influenza complicated with pneumonia which were not fatal.

DINGLE; *Ventry*.—Eleven deaths from influenza.

KENMARE; *Kilgarvan*.—Primary vaccination has been retarded owing to the bad weather which prevailed during the quarter, together with the occurrence of a few cases of scarlatina and whooping-cough. The death of a man at the unusually ripe old age of 107 years was registered during the quarter.

KILLARNEY; *Killarney, No. 1, W*.—I am of opinion that the providing of calf lymph is a great advance in the right direction, and will materially increase the number of vaccinations.

KILLARNEY; *Killarney, No. 2*.—Vaccination in a backward state owing to influenza and unfavourable weather.

LISTOWEL; *Ballyhorgan*.—I have registered the death of a man aged 105 years; on what I believe to be very good evidence, the ages of five other persons averaged 85 years.

LISTOWEL; *Tarbert*.—There is a great want of a water supply at Tarbert Island.

TRALEE; *Ardfert*.—The water supply both in Ardfert and O'Dorney is very bad. The sanitary state of the district is very good.

### Limerick County.

KILMALLOCK; *Bruff*.—There were five cases of typhoid fever during the quarter, all of which were removed to the workhouse hospital; one died. District otherwise healthy.

KILMALLOCK; *Kilfinnane*.—No epidemic during the quarter except a few cases of diphtheria, which is stamped out.

LIMERICK; *Limerick, No. 2*.—There were two deaths from cerebro-spinal meningitis during the quarter.

LIMERICK; *Morroë*.—Four deaths were registered, respectively, 89, 88, 84, and 80 years. One death from cerebro-spinal meningitis. Health of district generally good.

LISTOWEL; *Glin*.—There were a few cases of influenza and four cases of measles, of a mild form, in district during quarter just ended; otherwise the public health of this district is most satisfactory.

MITCHELSTOWN; *Galbally*.—One case of tetanus, following severe burns, which proved fatal to an adult of thirty-six years. District exceptionally healthy.

RATHKEALE; *Askeaton*.—During the past quarter there was one case of typhoid fever; the patient was removed to hospital, his house was fumigated and washed with lime. I could not trace the source of infection.

RATHKEALE; *Rathkeale, No. 1 W*.—The district for the past quarter was perfectly healthy, and enjoyed a total immunity from zymotic disease in any form, with the exception of one case of enteric fever in the workhouse hospital from an adjoining district.

### Tipperary County.

BORRISOKANE; *CloghJordan*.—Sanitary arrangements in general are good; very little sickness prevails at present. There has been no epidemic; only one case of typhoid was reported to me; the infection in this case was due to a visit to Dublin.

CALLAN; *Ballingarry*.—Influenza was prevalent during the quarter.

CARRICK-ON-SUIR; *Carrick-on-Suir, W*.—Three deaths from influenza registered during quarter.

CASHEL; *Cashel, W*.—Measles of a mild type very prevalent during the past quarter.

CASHEL; *Killenaule*.—Measles of a mild type prevailing in district; no deaths.

CLOGHEEN; *Caher*.—A few cases of scarlet fever occurred in district during the past quarter.

CLONMEL; *Marlfield*.—Whooping-cough prevailed to some extent; none of the cases proved fatal.

**NENAGH; Portroe.**—Typhus appeared during the quarter; four persons were attacked in one house; I sent them to Nenagh, and took all precautionary measures to prevent the extension of the disease, and have so far succeeded.

**THURLES; Borrisoleigh.**—The town of Borrisoleigh is in a very unsanitary state.

### Waterford County.

**CLONMEL; Ballymacarbry.**—Whooping-cough prevalent; three deaths registered, respectively, 89, 87 and 86 years.

**YOUGHAL; Ardmore.**—One case of enteric fever; district healthy.

**YOUGHAL; Clashmore.**—Of the twenty-four deaths registered, nine were stated to be of ages ranging from 80 to 99 years.

## III. PROVINCE OF ULSTER.

### Antrim County.

**ANTRIM; Crumlin.**—Influenza was very prevalent during first two months of quarter. Sanitary state of district good.

**ANTRIM; Doagh.**—There were several cases of mild enteric fever, the origin of which could not be definitely ascertained. Very few cases of influenza at present.

**BALLYMENA; Clogh.**—District fairly healthy during quarter. A large proportion of the deaths are of persons over 60 years. There were two cases of whooping-cough and two of influenza.

**BALLYMENA; Portglenone.**—Measles was epidemic during the quarter, and almost all schools in the neighbourhood were closed for some time from this cause.

**BALLYMENA; Toome.**—No infectious disease during quarter. Deaths chiefly among old people over 70 years. Sanitary condition improving.

**BALLYMONEY; Bushmills.**—Vaccination postponed on account of an epidemic of measles.

**BALLYMONEY; Dirraw.**—Measles prevalent in district; vaccinations were postponed on that account for four weeks.

**LISBURN; Lisburn, W.**—There were six deaths registered of children over three months old who had not been vaccinated. At least two of the deaths caused by enteric fever have been clearly traced to infected milk.

### Armagh County.

**ARMAGH; Armagh, W.**—Two deaths occurred in the district from cerebro-spinal meningitis.

**ARMAGH; Blackwatertown.**—The death rate looks proportionally high on account of the inclusion of the deaths in the County District Asylum.

**ARMAGH; Keady.**—Measles is still very prevalent in the district.

**ARMAGH; Loughgall.**—There was one death due to malignant measles registered during the quarter.

**ARMAGH; Markethill.**—Three cases of typhoid occurred during the quarter; one of the cases died in hospital. Measles was prevalent during May in the Hamiltonsbawn district, but did not call for treatment. I registered a great number of deaths of old persons—one 95, one 91, and nine over 80 years of age.

**LURGAN; Lurgan, No. 2.**—There is at present an epidemic of whooping-cough in district.

### Cavan County.

**BALLIBOROUGH; Kingscourt.**—During the quarter an epidemic of measles spread through the district, and four deaths have been registered from that disease. One case of typhus fever ending fatally, occurred, having been contracted probably in Scotland whence the patient had come a few days before the onset of his illness. All necessary steps have been taken to prevent the spread of the disease.

**CAVAN; Killeshandra.**—One death from measles was registered, the only fatal case of it during an extensive epidemic. Influenza was prevalent during the quarter.

**COOTEHILL; Tullyvin.**—A large number of children over three months are at present unvaccinated.

**ENNISKILLEN; Holywell, No. 2.**—There were four cases of enteric fever during the quarter; all occurred in different houses very remote from each other; the cause in every case was the use of impure water; the patients were removed to hospital, and the houses disinfected. The village of Blacklion is very much in need of good water.

**GRANARD; Finnea, No. 2.**—Measles very prevalent during past two months.

### Donegal County.

**DONEGAL; Dunkineely.**—Measles still lingers, but the worst is over. Death-rate much above the average.

**DONEGAL; Laghy.**—Measles prevalent during quarter.

**DONEGAL; Mountcharles.**—There was an epidemic of measles in the beginning of the quarter, and four deaths from the disease were recorded; from influenza two deaths were registered.

**DONEGAL; Pettigoe.**—One death at 104 years of age registered.

**GLENTIES; Carrick.**—Measles very prevalent. I know of two fatal cases from bronchial sequelæ; the disease has now almost altogether passed away. There were some cases of fever confined to one townland, and two deaths of married men occurred.

**GLENTIES; Dunglow, No. 1.**—Vaccination has been fairly well attended to; but owing to an epidemic of measles in the district several cases had to be postponed.

**GLENTIES; Dunglow, No. 2.**—An epidemic of measles visited parts of the district during the quarter.

**GLENTIES; Killybegs.**—An epidemic of measles of a rather virulent type prevailed, one death resulting; the disease is still prevalent.

**INISHOWEN; Carndonagh, W.**—Among the deaths registered during the quarter were two at 100, one at 93, and two at 90 years of age.

**INISHOWEN; Clonmany.**—An outbreak of chicken-pox has prevailed for the last eight or ten weeks, consequently very few vaccinations have been performed; otherwise the district is fairly healthy and free from all specific diseases.

**LONDONDERRY; Burt.**—One death from enteric fever not yet registered.

**MILFORD; Fanad.**—There was a severe outbreak of typhus fever during the month of May and beginning of June, in in the Fanad West Division, particularly in townland of Ballyhoorisky; about thirty cases, I believe, in all occurred; there were three deaths from it in the district (which have not yet been registered), and six deaths among the cases removed to Milford Union Hospital. No case has occurred now for almost three weeks, so I trust the epidemic is stamped out. The houses where it occurred have been thoroughly disinfected and bedding, etc., destroyed. I consider the outbreak was chiefly due to bad ventilation and overcrowding.

**MILFORD; Kilmacrenan and Milford W.**—All deaths from typhus registered in this district, occurred in Union Fever Hospital.

**MILFORD; Rathmullan.**—Measles prevalent during June.

#### **Down County.**

**BANBRIDGE; Ballyward.**—There was an outbreak of diphtheria caused, I believe, by the unsanitary state of the district at the time, owing to so many empty cesspools, from which manure had been removed to put under the crops, emitting foul effluvia.

**BANBRIDGE; Crossgar.**—An epidemic of measles visited the district during the first two months of the quarter, three deaths being caused by it; the disease has now quite disappeared.

**BANBRIDGE; Loughbrickland.**—There were two cases of diphtheria, with one death, in first month of quarter.

**BELFAST; Castlereagh, No. 2.**—The two deaths from enteric fever were in the Military Hospital.

**DOWNPATRICK; Ballynahinch.**—There have been a number of cases of whooping-cough during the quarter, but the epidemic is now abated. The ages of nine persons whose deaths were registered were:—One at 97, one at 92, one at 90, four at 87, one at 84, and one at 80 years.

**DOWNPATRICK; Clough.**—The epidemic of influenza has subsided.

**DOWNPATRICK; Downpatrick, W.**—The death from measles was more than a year subsequent to the primary disease. Four deaths attributed to dysentery, two to diarrhoea, and three attributed to influenza. Some of the primary vaccinations were of children born out of district.

**DOWNPATRICK; Killough.**—I attended two cases of diphtheria during the quarter; both are now convalescent.

**DOWNPATRICK; Killyleagh.**—There has been an epidemic of mumps in one part of district; a good number of adults have suffered from the disease. The water supply in the town of Killyleagh is deficient and impure.

**DOWNPATRICK; Portaferry.**—Whooping-cough and measles prevalent, complicated by broncho-pneumonia; a few deaths resulting.

**KILKEEL; Kilkeel, No. 1.**—Three deaths from scarlatina, which is still very prevalent in the neighbourhood of Annalong.

**LISBURN; Drumbeg.**—An outbreak of enteric fever (ten persons affected) occurred in the district, believed to be due to an infected milk supply. Most of the cases were sent to hospital, and the sale of milk stopped; there have been no fresh cases during the past five weeks. No death has been registered in June.

**LISBURN; Hillsborough.**—One death from enteric fever. The person came into the county (ill with the disease) from Belfast.

**LISBURN; Saintfield.**—During the past quarter the health of the district has been very good. Two cases of scarlet fever in same family; both died. No further cases in district.

**LURGAN; Moira.**—Births exactly twice the number of deaths, which are below the average. No deaths from zymotic disease; district has been particularly free from epidemic or other disease.

**LURGAN; Waringstown.**—Although two deaths were registered from scarlet fever, whooping-cough, and enteric fever, yet these diseases were not epidemic, delicacy of constitution assisted in causing death in the case of whooping-cough.

**NEWTOWNARDS; Bangor.**—The death of one person, aged 90 years, was registered.

**NEWTOWNARDS; Comber.**—The health of the district is very good, and there is a remarkable freedom from epidemics and infectious diseases, especially looking at its close proximity to Belfast, but at present a source of danger is arising from the fact that a kind of village or suburb of City of Belfast is rapidly rising just at the very edge of the district in Castlereagh district, and the sewerage is apparently to be emptied into the river that runs through this town; I have called the attention of the Rural District Council to the matter.

**NEWTOWNARDS; Greyabbey.**—Births and deaths about the average; more than half the deaths recorded were from chest affections, six cases directly or indirectly from influenza, fifteen from tubercular disease, one case of whooping-cough, four deaths from accidental drowning.

**NEWTOWNARDS; Newtownards, W.**—The epidemic of mumps which was present at the end of the last quarter has disappeared. I understand that an engineer has been appointed to make a survey of the town in reference to the proposed sewerage.

#### Fermanagh County.

**ENNISKILLEN; Florencecourt.**—Pneumonia prevalent owing to the wet and changeable weather. Sanitary conditions highly satisfactory; no epidemic exists at present.

**ENNISKILLEN; Holywell, No. 1.**—The village of Belcoo is in serious need of pure water, which could be obtained by gravitation from a source three quarters of a mile distant, the village of Blacklion being served by the way.

**IRVINESTOWN; Clonelly.**—The deaths of persons aged 108 and 100 years respectively registered.

#### Londonderry County.

**LIMAVADY; Dungiven.**—One case of measles, an isolated one imported from London, proved fatal from complications.

**LIMAVADY; Limavady, W.**—There was one case of typhus of a severe type, which occurred in the rural district near the town, but the medical gentleman called in recognized the disease at a very early stage and had the patient removed to hospital. The sanitary authorities did everything in their power to prevent the disease spreading, and although six weeks has elapsed since the outbreak no fresh case has occurred; the source of infection could not be traced. One case of measles occurred in a child who had been visiting other children residing in a neighbouring district, who had contracted the disease in London; complete isolation prevented the disease spreading; district otherwise free from epidemic or contagious disease.

**MAGHERAFELT; Moneymore.**—In reference to the death registered from typhoid fever, the disease was imported from Belfast by a young man at business there who came home ill; three others of his family took the disease with one death. The disease was confined to the one family and has since disappeared. There are several cases of measles of a severe type at present in district, but no death so far; also some cases of whooping-cough. District otherwise healthy.

#### Monaghan County.

**CARRICKMACROSS; Donaghmoynce.**—Epidemic of measles now abated; one death from typhoid fever registered.

**CARRICKMACROSS; Raferagh.**—Two deaths from measles and one from influenza were registered during the quarter; neither disease is prevalent at present.

**CASTLEBLAYNEY; Ballybay.**—Two cases of typhus fever were treated during quarter; the house in which the patients lived has been limewashed and disinfected. A report of the unfitness of the dwelling for human habitation has been sent to the Guardians.

**CASTLEBLAYNEY; Castleblayney, W.**—The epidemic of measles continued till the middle of May; no deaths from this cause were reported. A nurse in the fever hospital, who contracted typhus from a patient, died on the thirteenth day of the illness; two other nurses, who were attacked by the disease, made a satisfactory recovery. Eight deaths from influenza and two from cancer were registered.

**COOTEHILL; Dawsonsgrove.**—One fatal case of typhoid fever of a very severe type occurred in June. The sanitary arrangements of the district are fairly good.

**COOTEHILL; Drum, No. 1.**—Complaints regarding the insufficiency and impurity of the drinking water have been made to me by the villagers of Drum, who certainly are badly off in this respect. Measles of a mild type prevalent during quarter.

**MONAGHAN; Glaslough.**—The influenza, which was very prevalent in the early part of the quarter, has almost disappeared.

#### Tyrone County.

**CLOGHER; Ballygawley.**—Three children of one family affected with scarlatina.

**CLOGHER; Fivemiletown.**—Eight deaths of persons over 60 years were registered. There was an epidemic of measles with which a large number of persons, chiefly children, were attacked, but only one death was recorded; the disease has not died out.

**COOKSTOWN; Coagh.**—Measles of a mild type prevalent during the quarter.

**COOKSTOWN; Cookstown, W.**—There is an outbreak of measles in the district, consequently diminished vaccination; no death recorded from the disease as yet.

**COOKSTOWN; Stewartstown.**—There has been an epidemic of measles; about five hundred have been attacked; only one delicate child died from the disease. There were also four or five cases of influenza.

**DUNGANNON; Caledon and Ballymagran.**—Two cases of typhoid fever—both recovered.

**DUNGANNON; Coal Island.**—Measles very prevalent all over district during quarter.

**OMAGH; Drumquin.**—One death from enteric fever registered.

**OMAGH; Omagh, No. 1, W.**—A number of mild cases of influenza occurred during the quarter, but no deaths resulted.

**OMAGH; Sixmilecross.**—There have been a few cases of typhoid fever in the town of Beragh. I have had four samples of water from public and other wells condemned by an analyst.

**STRABANE; Plumbridge.**—One case of diphtheria, which, in my opinion, was an imported one, occurred during quarter; no other case has been reported.

## PROVINCE OF CONNAUGHT.

### Galway County.

**BALLINASLOE; Ballinasloe W.**—Vaccination had to be postponed owing to an epidemic of measles.

**GALWAY; Oranmore.**—There was one death from typhus fever, but it is not yet registered.

**GALWAY; Spiddle.**—The custom of keeping cattle and pigs in the dwelling-houses is very prevalent, also of keeping manure and filthy cess-pools very close to the dwelling-houses. Some severe cases of typhus fever during the quarter, and some mild cases of scarlatina.

**GORT; Ardrahan.**—During the month of June there were a great many cases of acute bronchial-catarrh in young children, caused by the coldness and dampness of the atmosphere. Since the 10th June the highest reading of the barometer was on the 28th (29.89 inches); the lowest reading (29.29 inches) on the 24th. We have had an excessive amount of rainfall and less than the average amount of sunshine.

**LOUGHREA; Bullaun.**—Of the persons whose deaths were registered, nine were aged respectively.—70, 75, 81, 81, 84, 84, 87, 90, and 90 years.

**OUGHTERARD; Cloonbur, No. 1.**—Typhoid fever epidemic during quarter; two deaths therefrom; disease not spreading.

**OUGHTERARD; Lettermore.**—The deaths over 60 years of age, include the following ages:—84, 80, 104 (guaranteed correct), 82, 90, 75, 80. There has been typhus fever during the months of May and June; one death therefrom having been registered.

**PORTUMNA; Eyrecourt.**—The deaths of two very old people were registered during last quarter—one aged 97—the oldest man in the district; the second, aged 95. Four persons died from phthisis.

**PORTUMNA; Portumna, No. 1, W.**—One case of dysentery brought in from another district.

### Leitrim County.

**CARRICK-ON-SHANNON; Jamestown, W.**—There have been, as far as I could make out, 386 cases of measles in the district.

**MANORHAMILTON; Dromahaire.**—The drainage of the village is receiving the attention of the sanitary authority, otherwise the district is in good sanitary condition.

**MANORHAMILTON; Lurganboy.**—The death of a woman of 100 years of age, was registered during the quarter. There was a severe epidemic of lobar pneumonia prevalent during quarter, though the mortality was exceptionally low. The sanitary condition of the district would be satisfactory were it not for the habit the poorer classes have of keeping young calves in their dwelling-houses.

**MANORHAMILTON; Manorhamilton, W.**—Several cases of influenza, with pneumonia, occurred during the quarter.

**MOHILL; Carrigallen.**—Measles prevalent during quarter, and a few cases of scarlatina and influenza. All these have now almost disappeared.

### Mayo County.

**BALLINA; Ballina W.**—Spotted typhus fever has broken out in the district; a dozen cases have been admitted to the fever hospital. No death has occurred so far.

**BALLINROBE; Cong.**—Of the twenty-eight deaths registered, twenty-one were over 60, five having died at the age of 70; three at 75; one at 78; two at 80; one at 86; two at 90; one at 95; and one at 97 years.

**BALLINROBE; Hollymount.**—There was an epidemic of measles in the north part of the district. Some cases of rather severe influenza occurred during the quarter; there was one case of scarlatina, which was at once sent to hospital.

**BELMULLET; Knocknalower.**—Sanitary arrangements unsatisfactory, owing to stabling of cattle, pigs, etc., in dwelling-houses. Whooping-cough was epidemic in early part of quarter, but is now declining. The same applies to influenza.

**CASTLEBAR; Balla.**—An epidemic of measles was responsible for the small amount of vaccination performed. One case of death from puerperal fever. Two cases of death from influenza.

**CASTLEBAR; Castlebar, No.1, W.**—Rural District—Cesspools and manure heaps are more the rule than the exception too near dwelling-houses in most villages, and within Public Health Act limit. Many vaccination defaulters, up to ten years old, are in the district.

**SWINEFORD; Kiltimagh.**—Measles have been rather prevalent throughout the whole of district this quarter.

#### Roscommon County.

**ATHLONE; Athlone, No.2.**—At Cloonown a widow of a farmer died at the age of 106 years, and retained her faculties to the last.

**BOYLE, Keadew.**—Scarlatina very prevalent; vaccination better attended to.

**STROKESTOWN; Roosky.**—In the early part of the quarter scarlatina was prevalent to a limited extent, and five of the deaths are recorded from its effects; but the disease has disappeared for some time. The deaths of persons aged respectively, 84, 86, 74, 72, 91, 80, 93, 70, 85, 82, 78, 73, 85, 86, and 88 years have been registered; and twenty of all the deaths that occurred are of persons aged 60 years and upwards.

#### Sligo County.

**SLIGO; Ballymote.**—One case of measles.

**SLIGO; Collooney.**—Two cases of measles, during quarter, both recovered.

**DROMORE WEST; Castleconnor.**—There has been a mild epidemic of whooping-cough in outlying portion of district.

**DROMORE, WEST; Skreen.**—All the typhoid cases are convalescent.

**Marriages:**—APR., MAY, JUNE, 1900. **Births & Deaths:**—JULY, AUG., SEPT., 1900.

During the quarter ended 30th September last, there were registered in the 828 Registrars' Districts in Ireland 24,962 births—a number equal to an annual birth-rate of 22·2 in every 1,000 of the estimated population\*—and 16,212 deaths, representing an annual rate of 14·4 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 11,258 persons emigrated.

In England last quarter, the birth-rate represented was 29·3 in every 1,000 of the estimated population, and the death-rate 16·8 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 under the average rate for the corresponding quarter of the ten years 1890–99, and 0·5 under the rate for the third quarter of 1899. The deaths are 1,424 under those registered in the corresponding quarter of 1899; the death-rate is 1·2 under the rate for that quarter, and 0·5 below the average for the third quarter of the ten years 1890–99.

Compared with those for the corresponding quarter of 1899, the returns of pauperism, furnished by the Local Government Board, show a decrease of 2,422 in the average number of Workhouse inmates on Saturdays during the quarter, and of 25 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1890–99 the number of Workhouse inmates shows a decrease of 1,184, and the number of persons on out-door relief a decrease of 715, the total under both heads being 1·9 per cent. below the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·2 per cent.

The annual marriage-rate (4·3 per 1,000 of the population) represented by the marriages registered during the second quarter of 1900 is 0·1 under the average rate for the corresponding quarter of the preceding ten years.

\* See page 193.

### MARRIAGES.

The marriages (4,823) registered in Ireland during the second quarter of 1900 are equivalent to an annual rate of 4·3 per 1,000 of the estimated population, being 0·5 below the rate for the corresponding quarter of the year 1899, and 0·1 under the average rate for the second quarter of the ten years 1890–99. Of the total number of marriages 3,223 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,600 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 3·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·8 per 1,000 of the members of all other religious persuasions. Compared with the averages for the corresponding period of the preceding ten years, the rate under the former heading shows a decrease of 0·1, and under the latter a decrease of 0·3. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

\* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891. See note (\*), page 195.

TABLE II.—Showing by Quarterly Periods, the Marriages registered in Ireland in each of the ten years 1890-99, and the first and second quarters of 1900.

**BIRTHS.**

The number of births registered during the quarter ended 30th September last was 24,962—12,889 boys and 12,073 girls—being equal to an annual ratio of 1 in every 45·1, or 22·2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1890-99 was 25,875, equivalent to an annual rate of 22·5 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 22·0 per 1,000 of the population, according to the Census of 1891; Munster, 20·0; Ulster, 23·0; and Connaught, 18·0.

The highest county birth-rate\* is 30·3 for Antrim, and the lowest 15·6 for Cavan and Roscommon. Of the intermediate rates the highest five are—Dublin, 28·8; Down, 27·5; Kerry, 22·2; Limerick, 21·3; and Londonderry, 20·7; and the lowest five are—Meath, 16·0; Monaghan, 16·1; Clare, 16·3; Westmeath, 16·4; and King's, 16·7.

**DEATHS.**

The number of deaths registered in Ireland during the quarter ended 30th September last was 16,212—8,062 males and 8,150 females—affording an annual ratio of 1 in every 69·4, or 14·4 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1890-99 was 14·9 per 1,000.

The death-rate in Leinster was 15·8 per 1,000 of the population according to the Census of 1891; in Munster, 12·2; in Ulster, 15·1; and in Connaught, 10·0.

The county death-rates\* range from 8·9 in Mayo to 22·0 in Dublin. Between these rates the lowest five are—Roscommon, 9·2; Cavan, 9·7; Leitrim, 9·8; Fermanagh, 10·4; and Clare, 10·7; and the highest five are—Antrim, 20·2; Down, 16·3; Armagh, 14·4; Wexford, 14·1; and Londonderry, 14·0.

\* See note (\*) on page 180.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1890–99, and the average number for that period; also the number registered in the first, second, and third quarters of the year 1900:—

Equivalent Annual Rate per 1,000 living:—										
Average, 1890–99,	23·8	24·4	22·5	21·3	23·0	22·0	18·7	14·9	16·9	18·1
1900, . . . .	23·4	24·0	22·2	.	.	27·7	19·6	14·4	.	.

**Agas.**—Of the 16,212 deaths registered last quarter, 2,471, or 15·2 per cent., were of children under 1 year old; and 6,034, or 37·2 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 99·0 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 16·7 per cent. of the total deaths registered therein; in Munster, 13·9 per cent.; in Ulster, 16·4 per cent.; and in Connaught, 10·3 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 33·3 per cent.; in Munster to 38·8 per cent.; in Ulster to 36·7 per cent.; and in Connaught to 46·0 per cent. of the total deaths registered in the province.

#### HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal zymotic diseases\* is 1,118, or less by 955 than the number occurring in the corresponding quarter of 1899, and is equivalent to an annual rate of 1·0 per 1,000 living, being 0·8 under the rate for the third quarter of last year, and 0·3 under the average rate for the third quarter of the ten years 1890–99.

**Small-pox.**—No death from this disease occurred during the quarter; the last death from small-pox in Ireland occurred in the last quarter of 1899.

**Measles.**—Seventy-three deaths occurred during the quarter; this number is below the average of the corresponding quarter of the past five years by 52, also below the third quarter of 1899 by 315, and below the preceding quarter of the present year by 85. Of the deaths from measles in Ireland, 13 occurred in Leinster, 5 in Munster, 38 in Ulster, and 17 in Connaught.

**Scarlatina.**—Forty-one deaths from this disease occurred in Ireland during the quarter; this number is below the average of the corresponding quarter of the past five years by 52, but above the third quarter

\* See note (†) on page 185.

of 1899 by 5, and below the preceding quarter of the present year by 15. In the Province of Leinster there were 15 deaths, in Munster 15 deaths, in Ulster 10 deaths, and in Connaught 1 death.

**Typhus Fever.**—There were 36 deaths from typhus fever registered during the quarter. This number is equal to the average for the corresponding five years, and is 3 under the number registered in the corresponding quarter of 1899, and 19 less than the number recorded in the preceding quarter of the present year; 6 deaths occurred in Leinster, 6 in Munster, 13 in Ulster, and 11 in Connaught; 5 deaths occurred in Milford Union, 3 deaths each in Galway, Tuam, Inishowen, and Londonderry Unions, 2 deaths each in Drogheda, Cork, Tralee, and Ballina Unions.

**Whooping-cough.**—One hundred and twenty-seven deaths were registered during the quarter from this disease. This number is below the average of the corresponding quarter of the past five years by 130, and is 69 under the number which occurred in the third quarter of 1899, and 32 below the number of deaths which were caused by this disease in the preceding quarter of the present year; 18 deaths occurred in the North Dublin Union, and 21 in the South Dublin Union, 11 deaths occurred in Cork Union, 11 occurred in the Antrim portion of Belfast Union, 7 in the Down portion of Belfast Union. Of the deaths occurring in Cork Union, 6 occurred in Queenstown No. 1 Registrar's District, and 4 in Queenstown No. 2 Registrar's District. The total, 10, represents an annual death-rate of 3·3 per 10,000 of the population of Queenstown Nos. 1 and 2 Registrars' Districts; 2 cases also of persons who died in Bandon are reported to have come from Queenstown.

**Diphtheria.**—Sixty-six deaths from this disease were registered during the quarter. This number is below the average for the corresponding quarter of the past five years by 4, but 7 in excess of the September quarter of 1899, and one under the number which occurred in the preceding quarter of the present year. In the provinces 20 deaths occurred in Leinster, 9 in Munster, 35 in Ulster, and 2 in Connaught; 6 deaths occurred in the North Dublin Union, and 7 in the South Dublin Union; 2 deaths from diphtheria occurred in Kilkenny, 2 occurred in Cashel, 9 occurred in Belfast, and 2 deaths in each of the Unions of Ballymena, Larne, and Lisburn, 3 deaths occurred in Milford, 3 in Strabane, 3 deaths occurred in Monaghan, and 2 deaths each in Londonderry and Magherafelt.

**Simple Continued and Ill-defined Fever** caused 21 deaths, or 6 below the average for the corresponding period of the past five years; 4 deaths occurred in Leinster, 8 in Munster, 6 in Ulster, and 3 in Connaught.

**Enteric Fever.**—One hundred and seventy-seven deaths were caused by this disease; this number is 54 beneath the average for the corresponding quarter of the past 5 years, and 53 less than occurred in the September quarter of 1899, 34 below the number that occurred in the preceding quarter of the present year; of the total 39 occurred in Leinster, 14 in Munster, 118 in Ulster, and 6 in Connaught. In the Superintendent Registrars' Districts, 16 deaths occurred in Dublin North, 12 in Dublin South, 4 in Cork, 84 in Belfast, 10 in Lisburn. In Belfast Urban District No. 2, 12 deaths occurred; in No. 3 Urban District, 11 deaths occurred; and 32 deaths occurred in Belfast Urban District No. 4. This represents an annual death-rate of 3·8 per 1,000 of the population of the last-mentioned district for enteric fever.

**Diarrhoea.**—Five hundred and sixty-nine deaths were caused by this disease, while the other zymotic diseases dealt with in this report were 549; so that more than one-half the total of deaths from the principal zymotic

diseases in the September quarter of the year was due to epidemic diarrhoea. Although this is so, the number of deaths is below the average of the corresponding period of the past five years by 216, and below the figure of the corresponding quarter of 1899 by 492. In the provinces, 238 deaths took place in Leinster, 97 in Munster, 224 in Ulster, and 10 in Connaught. In the Dublin Registration Area there were 209 deaths from diarrhoea, a number corresponding to an annual rate of 2·4 per 1,000 of the population. In Belfast there were 145 deaths, a number corresponding to an annual rate of 1·6 per 1,000 of the population; 27 deaths occurred in Cork Urban District, 12 in Waterford, and 13 in Londonderry.

**Simple Cholera** caused 8 deaths; 3 occurred in North Dublin, 3 in South Dublin, and 1 in Rathdown Unions; and 1 death occurred in Newcastle Union. This number is 25 below the average for the corresponding quarters of the past 5 years.

**Cerebro-spinal Meningitis.**—There were 14 deaths registered during the quarter in the Dublin Registration Area. In the first quarter of the present year, 7 deaths took place, and in the second quarter there were 45 deaths; 66 deaths from this disease have occurred in the Dublin Registration Area in the present year.

In the remainder of Ireland the following cases have been reported by the Registrars in their quarterly returns:—

One death in Kilskeer district, Kells Union; 1 in Dripsey district, Cork Union; and 2 in the Registrar's district of Limerick No. 3, Limerick Union.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district, chicken-pox in one, measles in 18 districts, scarlatina in 24, whooping-cough in 14, diphtheria in 11, fever in 35 (typhus 3, simple continued 2, and enteric 30), influenza in 3, and mumps in 3.

**Inquests.**—There were 556 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 29 of the total deaths registered.

In Leinster there was 1 inquest to every 24 deaths registered, in Munster 1 to 43, in Ulster 1 to 24, and in Connaught 1 to 72.

**Deaths in Public Institutions.**—Of the 16,212 deaths registered, 2,734, or 16·9 per cent., occurred in public institutions. In Leinster the percentage was 23·5, in Munster 19·1, in Ulster 12·1, and in Connaught 11·1.

The following table (Table IV.) shows the number of deaths from the principal zymotic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1900, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple and Ill-defined Fever.	Enteric Fever.	Diarrhoea.	Simple Cholera.

## URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V. The death-rate for last quarter in these districts, which contain about one-fourth of the total population of the country, was 20·6, and the birth-rate 30·9 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 11·4 and the birth-rate 17·9 per 1,000. The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Districts during the quarter was 2·5 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·4 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1900, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration Area,” which consists of the City of Dublin and its Suburban Districts, comprises the Urban Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, New Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Booterstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by Registrars and relate to the thirteen weeks ending Saturday, 29th September, 1900.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, diarrhoea and simple cholera.

‡ The rates for Belfast have been calculated on the population estimated to the middle of the year 1900.

**VACCINATION.**

According to the Returns of Primary Vaccinations received for the third quarter of the year 1900, there were 23,205 persons successfully vaccinated; in 2,984 cases the operation was postponed, 55 children were reported as insusceptible of vaccination, and the deaths of 1,366 unvaccinated children under 3 months old were registered, making a total of 27,610 children with regard to whom particulars as to vaccination were ascertained.

**EMIGRATION.**

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 11,258 (4,717 males and 6,541 females), being 17 less than in the corresponding quarter of the year 1899, and 6 over the average number for the third quarter of the ten years 1890–99.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September, in 1899 and 1900:—

**PRICES AND PAUPERISM.**

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 5½d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1899 the average price was 5d., and in the corresponding quarter of 1890 it was 6d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 13s. 6d. per cwt., being 6d. under the average for the corresponding quarter of the year 1899. In the third quarter of 1890 the average price was 15s. 3d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 4d. to 4s. 5d. In the third quarter of 1899 the average prices were 2s. 5d. to 3s. 4d., and the prices for the corresponding quarter of 1890 were 2s. 6d. to 3s. 6d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 55s. 6d. to 60s. 6d. per cwt. In the corresponding quarter of 1899 the average prices were from 50s. to 56s. 6d., and in the third quarter of 1890 they were from 51s. to 61s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 24s. to 28s. per ton.

The highest price of 2¼ per cent. Consols at the Dublin Stock Exchange for the quarter was £100½, and the lowest £97½. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was increased on the 19th July from 4 per cent., at which it stood since 24th May, to 4½ per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1900 was 39,047, or 2,422 under the average for the corresponding period in 1899.

The average weekly number of persons receiving out-door relief during the quarter was 56,724, being 25 under the average for the third quarter of 1899.

Of the persons receiving in-door relief during the third quarter of 1900, an average number of 1,443 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1899 the average weekly number was 1,521.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1900, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD		Average PRICES OF PROVISIONS.								PAUPERISM.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the third quarter of the years 1895–1900, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 192):—

The mean height of the barometer during the third quarter of 1900 was 30.013 inches, being .044 inch over the average for the corres-

\* Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 162.2 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit

ponding quarter of the five years 1895-9; the highest reading (30.571 inches) was on the 12th September, at 9 A.M., air, calm; and the lowest (29.324 inches) on the 6th August, at 9 A.M., wind E.

The mean temperature of the air during the quarter was  $57.6^{\circ}$ , or  $0.6^{\circ}$  over the average for the third quarter of the five years 1895-99. The maximum temperature was  $77.8^{\circ}$ , and the minimum  $34.4^{\circ}$ . The maximum heat in sun was  $132.6^{\circ}$ , and the minimum on the grass  $29.8^{\circ}$ .

Rain fell on 45 days during the quarter. The rain-fall measured 11.950 inches, being 2.742 inches over the average for the third quarter of the five years 1895-99. The greatest monthly rain-fall was in August, when 6.170 inches were registered.

The wind blew on 29 days from W., on 17 days from S.W., on 6 days each from E.N. and N.W., on 4 days from S.E., on 3 days from N.E., on one day from S., and the air was calm on 20 days at 9 A.M.

*July.*—The mean height of the barometer during this month was 29.985 inches; the highest reading (30.347 inches) was on the 7th, at 9 P.M., air, calm; and the lowest (29.565 inches) on the 1st, at 9 A.M., wind S.W. The mean temperature of the air was  $61.2^{\circ}$ , the maximum registered was  $77.8^{\circ}$ , and the minimum  $39.1^{\circ}$ . The 24th was the warmest day, and the 8th the coldest night. The mean of the dry bulb was  $62.3^{\circ}$ , and of the wet bulb  $57.7^{\circ}$ . The maximum heat in sun was  $132.6^{\circ}$ , and the minimum on the grass  $31.8^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 1 night. The total amount of sunshine recorded was 188.7 hours, the greatest daily amount being 15.5 hours on the 10th. The maximum ozone was .6, the minimum .1, and the mean .3. Rain fell on 16 days. The rainfall measured 4.590 inches; the greatest amount in 24 hours was 2.140 inches on the 27th.

*August.*—The mean height of the barometer during this month was 29.948 inches; the highest reading (30.416 inches) was on the 13th, at 9 A.M., wind W.; and the lowest (29.324 inches) on the 6th, at 9 A.M., wind E. The mean temperature of the air was  $57.1^{\circ}$ , the maximum registered was  $75.8^{\circ}$ , and the minimum  $43.3^{\circ}$ . The 15th was the warmest day, and the 29th the coldest night. The mean of the dry bulb was  $58.7^{\circ}$ , and of the wet bulb  $55.4^{\circ}$ . The maximum heat in sun was  $131.5^{\circ}$ , and the minimum on the grass  $35.7^{\circ}$ . The total amount of sunshine recorded was 172.0 hours, the greatest daily amount being 13.8 hours on the 14th. The maximum ozone was 1.0, the minimum .1, and the mean .4. Rain fell on 17 days. The rain-fall measured 6.170 inches; the greatest amount in 24 hours was 2.110 inches on the 2nd.

*September.*—The mean height of the barometer during this month was 30.105 inches; the highest reading (30.571 inches) was on the 12th at 9 A.M., air, calm; and the lowest (29.375 inches) on the 27th, at 9 P.M., wind S.W. The mean temperature of the air was  $54.5^{\circ}$ , the maximum registered was  $68.6^{\circ}$ , and the minimum  $34.4^{\circ}$ . The 14th was the warmest day, and the 12th the coldest night. The mean of the dry bulb was  $56.4^{\circ}$ , and of the wet bulb  $53.6^{\circ}$ . The maximum heat in sun was  $124.5^{\circ}$ , and the minimum on the grass  $29.8^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 4 nights. The total amount of sunshine recorded was 183.0 hours, the greatest daily amount being 10.7 hours on the 12th and 15th. The maximum ozone was .6, the minimum .0, and the mean .4. Rain fell on 12 days. The rain-fall measured 1.190 inches; the greatest amount in 24 hours was .310 inch on the 29th.

\* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature) are as follow:—*Valencia* + ·050; *Killarney*, + ·102; *Parsonstown*, + ·191; *Dublin*

mentioned Seven IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

NOTE.—This table has been constructed for the years 1826 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-19.0—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

**MARRIAGES** Registered during the Quarter ending 30th June, 1900, in the PROVINCES, COUNTIES,\* and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th September, 1900; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, also VIOLENT DEATHS;† INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 30th September, 1900, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

### ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Statute Acres.	Population in 1891.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter as stated by the Registrars to include													Vaccination Return for the Quarter ending 30th Sept., 1900.							
			Averages in the Quarters ending 10 years, 1890-99.	Registered in the Quarter ending 30th June, 1900.	Averages in the Quarters ending 10 years, 1890-99.	Registered in the Quarter ending 30th Sept., 1900.	Children under 1 year of age.	Persons aged 60 years and up-wards.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined Fever.	Enteric Fever.	Diarrhoea.	Cholera.	Violence.†	Inquest Cases.	Deaths in Public Institutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons susceptible of Vaccination.	Number of Unvaccinated Children under 3 months old whose deaths were registered during the quarter.	Total of the foregoing.

\* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898. In some cases it is not at present practicable to give the average numbers of Births and Deaths for the corresponding Quarters of previous years in the Unions and Districts as now constituted.

† Including accidental deaths, homicides, and suicides.

‡ The Return for Ennagh District in Cavanagh Union, not having been received in time for Press, the numbers of Births and Deaths registered in the corresponding Quarter of 1899 have been adopted.

## ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.\*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1891.	Mar- riages.		Births.		Deaths.		The Deaths registered during the Quarter stated by the Registrars to include													Vaccination Return for the Quarter ending 30th Sept., 1900.					Total of the foregoing.	
			Registered in the Quar- ter ending 30th June, 1900.	Registered in the Quar- ter ending 30th Sept., 1900.	Registered in the Quar- ter ending 30th Sept., 1900.	Registered in the Quar- ter ending 30th Sept., 1900.	Averages in the Quar- ter ending 30th Sept., 1900.	Averages in the Quar- ter ending 30th Sept., 1900.	Deaths of		Deaths from										Deaths in Public Insti- tutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons inexposed to Vac- cination.	Number of Unaccu- sated Children under 3 months old, whose deaths were registered during the Quarter.			
									Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined Fever.	Enteric Fever.	Diarrhoea.	Cholera.						Violence.

## APPENDIX.

## REGISTRARS' NOTES.

*On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.*

*In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.*

The Registrars alone must be considered responsible for the opinions which they express.

*Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrar Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.*

## PROVINCE OF LEINSTER.

## Carlow County.

CARLOW; *Bagenalstown*. — District healthy.

CARLOW; *Carlow No. 1, W.* — The district was remarkably free from fever and infectious disease during the quarter.

CARLOW; *Clonegall*. — The district is very healthy.

CARLOW; *Leighlinbridge*. — District healthy.

## Dublin County.

BALROTHERY; *Holmpatrick, W.* — There was an epidemic of severe diarrhoea during month of September. One case ended fatally on third day. There was one case of enteric fever probably contracted in Glasgow. Vaccination was well attended during the quarter.

RATHDOWN; *Bray No. 2* — The district has been very healthy during the quarter.

## Kildare County.

BALTINGLASS; *Baltinglass No. 2*. — Death of one man 88 years of age registered.

CELBRIDGE; *Celbridge, W.* — District healthy.

CELBRIDGE; *Kilcock*. — The health of the district has been very good during past quarter; of the seven deaths registered, four were over 65 years of age.

EDENDERRY; *Carbury*. — District very healthy during quarter.

EDENDERRY; *Rathangan No. 1*. — One death, tubercular meningitis, age 21 years. Two deaths, catarrhal croup, within three days in one family, children aged 16 months and 2 years respectively.

NAAS; *Naas and Carragh, W.* — One case of typhoid is in the district, and the

patient is now out of danger. The new water supply is now being laid on to every house nearly in the town, and is highly commended by all.

NAAS; *Rathmore*. — Sanitary condition of district good.

## Kilkenny County.

CALLAN; *Callan, W.* — District free from epidemic or infectious disease.

CASTLECOMER; *Ballyragget*. — Sanitary arrangements very fair.

CASTLECOMER; *Castlecomer, W.* — The death of a woman 102 years old was registered this quarter; she lived her whole life-time in the district.

URLINGFORD; *Urlingford, W.* — One case of typhoid was successfully treated in the hospital here.

## King's County.

BIRR; *Banagher*. — District very healthy

BIRR; *Birr, W.* — There were a good many cases of summer diarrhoea amongst children. Milk whether raw, boiled, or with lime water always curdled on the child's stomach and seemed to increase the sickness, the substitution of whey immediately checked the throwing off and diarrhoea.

BIRR; *Ferbane*. — Sanitary arrangements fairly good. One case of enteric fever occurred in the district during the quarter. Very few children vaccinated within the prescribed limit of three months, owing to difficulty in getting parents to bring them in.

BIRR; *Killyon*. — The sanitary condition of the district is good. There was one case of typhoid reported to me; I believe the infection was got outside the district.

EDENDERRY; *Rhode*. — Health of district good.

### Longford County.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee.*—The vigilance due to the recent fever scare has left the district in a very much improved sanitary condition.

LONGFORD; *Longford, W.*—Vaccination is rather backward owing to prevalence of scarlet fever and measles in the district during the past six months.

### Louth County.

ARDEE; *Dunleer.*—District healthy.

DUNDALK; *Barronstown.*—The district has been free from zymotic disease during the quarter, and is in a very healthy state.

DUNDALK; *Ravensdale.*—Health of this district very good.

### Meath County.

DROGHEDA; *St. Mary's.*—The sanitary condition of the district is good, no epidemic at present prevailing.

DROGHEDA; *Stamullen.*—The district has been in a healthy condition during the past three months. Sanitary state and water supply generally good.

DUNSHAUGHLIN; *Dunboyne.*—The sanitary condition of the district is good; during the quarter ended 30th September there occurred only one case of infectious disease, scarlatina, which was of a mild type.

DUNSHAUGHLIN; *Killeen.*—Measles prevailed in portion of the district during the quarter, the type was comparatively mild, and there were no deaths. The sanitary arrangements are good and the public are being impressed with the desirability in view of the threatened plague of keeping their premises in proper sanitary condition.

EDENDERRY; *Ballyboggan.*—Of the five deaths registered the age of one was 90 years, two 71, and one over 60 years.

KELLS; *Kells, W.*—The district is very healthy and free from epidemic disease.

KELLS; *Kilskeer.*—There was one case of cerebro spinal meningitis which I sent to fever hospital, where patient died.

KELLS; *Moynalty.*—The three deaths registered were aged 80, 80, and 93 years, respectively.

NAVAN; *Navan, W.*—The district is in a fairly sanitary condition, and the health of the people is good.

NAVAN; *Painestown.*—The health of the district is remarkably good, and has been during the quarter. No zymotic disease.

OLDCASTLE; *Oldcastle, W.*—Some cases of measles and scarlet fever, in outlying portions of the district, which prevented children from being taken to the dispensary for vaccination, have almost disappeared without any fatal results.

TRIM; *Summerhill.*—District is in a healthy state.

### Queen's County.

ABBEYLEIX; *Ballinakil.*—No sickness prevalent during the past quarter. The deaths of two men registered at the ages of 90 and 92 years.

CARLOW; *Carlow No. 2.*—The district has been remarkably free from any fever or infectious disease during the past quarter.

MOUNTMELLICK; *Emo.*—Sanitary condition satisfactory.

### Westmeath County.

DELVIN; *Delvin, W.*—The sanitary arrangements in the district are good.

GRANARD; *Finnea, No. 1.*—In the case of the two deaths from measles, one was complicated with pneumonia and the other with intestinal obstruction.

MULLINGAR; *Castletown-Geoghegan.*—District healthy. Sanitary condition very good.

MULLINGAR; *Killucan.*—Vaccinations postponed owing to the presence of measles in the district.

MULLINGAR; *Miltown.*—Five cases of scarlatina occurred during the quarter, none of them ending fatally. Owing to the precautions taken the disease did not become epidemic.

MULLINGAR; *Mullingar, W.*—The district has been fairly healthy throughout the past quarter.

### Wexford County.

ENNISCORTHY; *Newtownbarry.*—The district has been very healthy, and very free from all disease.

NEW ROSS; *New Ross, W.*—Mumps in children was prevalent during the quarter. The schools were closed, and an extended vaccination given. Two cases of typhoid fever were removed to hospital and houses disinfected.

### Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W.*—The death of one woman aged 92 years was registered during the quarter.

BALTINGLASS; *Dunlavin.*—Several cases of enteric fever.

**RATHDOWN**; *Powerscourt*. — District healthy.

**RATHDRUM**; *Annamoe*. — District healthy during quarter.

**RATHDRUM**; *Aughrim*. — Sanitary condition of town very primitive. A water supply badly needed. Public health satisfactory.

**RATHDRUM**; *Newcastle*. — There being an epidemic of pertussis (whooping cough) in district, I did not vaccinate many children. Sanitary condition of district not good. The five cases of scarlatina which occurred during quarter ended 30th June last all recovered, and owing to the removal of the cases to Newtown Fever Hospital, and necessary sanitary precautions being taken, no other case occurred.

## II. PROVINCE OF MUNSTER.

### Clare County.

**ENNIS**; *Newmarket*. — The health of the district during the past quarter has been most satisfactory.

**KILLADYSERT**; *Labasheeda*. — District very healthy.

**KILRUSH**; *Craggaknock*. — One of the deaths registered during the quarter was that of a female aged 100 years.

**KILRUSH**; *Kilmihil*. — Of the seven deaths registered for the quarter twelve were over 60 years, of whom three were over 80, and one over 90 years.

**KILRUSH**; *Kilrush, W.* — District healthy; a few cases of bronchitis and pneumonia.

**LIMERICK**; *Coolacasey*. — The health of the district during the quarter was good.

**SCARRIFF**; *Mountshannon*. — District free from any contagious disease.

### Cork County.

**BANDON**; *Bandon, W.* — The percentage of deaths from phthisis is high.

**BANDON**; *Kilbrittain*. — Of the two deaths certified from whooping-cough both those patients were brought from Queens-town, where their parents resided, to this district for a change.

**BANDON**; *Durrus and Kilerohane*. — District healthy, with exception of heavy cold amongst young children.

**CLONAKILTY**; *Timoleague*. — District healthy.

**CORK**; *Ballincollig*. — District healthy. No provision for the disposal of the liquid sewage of the village.

**CORK**; *Carrignavar*. — Sanitary arrangements good. Whooping-cough prevalent in district complicated in some cases with broncho-pneumonia. Vaccination, in consequence, was in many cases postponed.

**CORK**; *Cork No. 6*. — In addition to the death under diarrhoea there were five fatal cases of gastro-enteritis occurring during the autumn.

**CORK**; *Dripsey*. — There was one case of cerebro-spinal meningitis, which proved fatal.

**CORK**; *Riverstown*. — A great many of the children of the district are at present suffering from pertussis (whooping-cough).

**DUNMANWAY**; *Dunmanway, W.* — District healthy; no epidemic prevalent.

**KINSALE**; *Ballyfeard*. — Health of district good. One death registered at 87 years.

**MALLOW**; *Ballyclogh*. — The sanitary arrangements are fairly attended to. District very healthy during quarter; quite free from epidemics.

**MALLOW**; *Rahan*. — The district has been healthy during the past quarter; several cases of simple measles have occurred. The disease was brought into the district by two children who arrived from U. S., America, and who developed the disease a short time after their arrival.

**SKIBBEREEN**; *Skibbereen, W.* — District free from infectious diseases of every kind.

**SKULL**; *Goleen*. — District generally healthy.

**SKULL**; *Skull, W.* — The sanitary state of the district is fairly good, with the exception of Skull Town, where a new main sewer is urgently required, the old one being faulty in its construction.

### Kerry County.

**CAHERSIVEEN**; *Caher*. — The sanitary condition of the district is satisfactory, and I am pleased to be in a position to report that I notice a disposition on the part of the people to keep their dwellings in a more sanitary order.

**CAHERSIVEEN**; *Derrynane*. — The sanitary condition of the district is fairly satisfactory, and during the past quarter there has not been a single case of zymotic disease.

**CAHERSIVEEN**; *Glanbehy*. — Two died of old age, one died of phthisis. Sanitary state of district bad.

**DINGLE**; *Anascaul*. — Five cases of scarlet fever in the district—at Inch—during the quarter.

**DINGLE**; *Ventry*. — District very healthy.

**KENMARE**; *Kenmare, W.* — Vaccination almost neglected. Sanitary arrangements decidedly bad.

**KILLARNEY**; *Coom*. — District healthy during the past quarter; one case of scarlatina.

KILLARNEY; *Killarney, No. 1, W.*—No infectious disease in district during quarter.

KILLARNEY; *Milltown, &c.*—District healthy. No disease epidemic. Sanitary condition of the district fairly good.

KILLARNEY; *Malahiffe.*—Six deaths were registered at the ages of 96, 93, 80, 80, 70, and 65.

LISTOWEL; *Ballyhorgan.*—The deaths over 60 years of age include the following ages:—One at 92, and one at 104, the latter guaranteed correct.

LISTOWEL; *Ballylongford.*—The sanitary arrangements of district fairly good. I visited one case of scarlet fever of a severe type, which I ordered to hospital. Everything else satisfactory.

TRALEE; *Ardfert.*—The general condition of the district is healthy. No epidemic prevails. The water supply in Ardfert and O'Dorney is, during the summer months, insufficient, and should be remedied.

TRALEE; *Castlemaine.*—District very healthy. No contagious or infectious disease prevalent. Sanitary condition of the district fair.

TRALEE; *Tralee No. 2.*—District fairly healthy, vaccination being performed.

#### Limerick County.

CROOM; *Castletown.*—Two cases of enteric fever occurred in the district during the quarter, probably arising from a common origin.

KILMALLOCK; *Bruce.*—District is healthy.

KILMALLOCK; *Hospital.*—District healthy.

KILMALLOCK; *Kilmallock, W.*—Sanitary arrangements fair. Health of district very good.

LIMERICK; *Annacotty.*—Sanitary arrangements fair. District healthy.

LIMERICK; *Limerick, No. 3.*—During quarter there was 1 death of a person whose age was over 100 years, 1 over 90, 3 of persons over 80, and 1 over 72. There were 3 deaths from apoplexy, 4 from convulsions in children, and 2 from cerebro-spinal meningitis, which was rather prevalent during the first month of the quarter, but has entirely disappeared for some time. The district is at present fairly healthy.

LISTOWEL; *Glin.*—The public health of district good.

MITCHELSTOWN; *Galbally.*—District exceptionally healthy.

NEWCASTLE; *Ardagh.*—The sanitary state of the district is pretty fair.

NEWCASTLE; *Feenagh.*—Health of the district good.

RATHKEALE; *Askeaton.*—The health of the district was very good during the quarter; of the deaths registered three were caused by phthisis: this disease with anæmia in young girls is greatly on the increase.

RATHKEALE; *Pallaskenry.*—The sanitary arrangements in the district are good. Whooping-cough has been prevalent in the district during the latter part of the quarter.

RATHKEALE; *Rathkeale No. 1, W.*—There was no zymotic disease in the district for the quarter.

RATHKEALE; *Rathkeale No. 2.*—District was free from all contagious diseases, with the exception of one case of diphtheria.

#### Tipperary County.

BORRISOKANE; *Borrisokane, W.*—There has been a mild type of scarlatina in this district. One death occurred from same, which has not as yet been registered.

CALLAN; *Mullinahone.*—Sanitary condition of the district fairly good; no epidemic or endemic disease prevalent; a few cases of influenza; vaccination well attended to.

CASHEL; *Cashel, W.*—The death of a man was registered during the quarter, whose age was stated to be 104 years.

CASHEL; *Killenaule.*—Measles to a great extent prevailed in the district during the quarter; no deaths from the disease and no vaccinations; one death from diphtheria in a boy of nine.

CLOGHEEN; *Clogheen, W.*—Sporadic cases of typhoid fever in the Ballyporeen portion of the district.

CLONMEL; *Marlfield.*—Sanitary condition of district good; no epidemic prevalent.

NENAGH; *Nenagh, W.*—District healthy.

NENAGH; *Newport.*—The sanitary arrangements are very well carried out; no epidemic disease prevails.

THURLES; *Thurles, W.*—Some cases of scarlatina and enteric fever occurred in district during the quarter.

TIPPERARY; *Cappagh.*—The death of a man aged 102 years was registered during the quarter. The district is healthy.

TIPPERARY; *Tipperary, W.*—The health of the district has been very good for past quarter.

URLINGFORD; *Kilcooly.*—The district has been very healthy during past quarter.

**Waterford County.**

**CARRICK-ON-SUIR; Rathgormuck.**—The general health of the district is satisfactory.

**CLONMEL; Ballymacarbry.**—Vaccination postponed owing to prevalence of whooping-cough.

**DUNGARVAN; Dungarvan, W.**—District healthy during past quarter.

**DUNGARVAN; Whitechurch.**—Sanitary arrangements fairly good; vaccination well up to average of births.

**LISMORE; Ballyduff.**—Sanitary arrangements satisfactory.

**LISMORE; Tallow.**—One case of typhus fever occurred during the past quarter.

**YOUGHAL; Ardmore.**—District healthy.

**YOUGHAL; Clashmore.**—One death of a female was registered as aged 94 years.

**III.—PROVINCE OF ULSTER.****Antrim County.**

**ANTRIM; Crumlin.**—Sanitary arrangements of district good.

**ANTRIM; Randalstown.**—One case of typhoid fever under treatment; every precaution is being taken to prevent the disease from spreading. I have sent a sample of the drinking water away for analysis. The state of the district is otherwise healthy.

**ANTRIM; Templepatrick.**—The sanitary arrangements and health of the district are fairly good. No epidemic. Only fourteen deaths registered; none of infectious character, excepting two of phthisis.

**BALLYCASTLE; Croagh.**—There have been some cases of whooping-cough, which is the only infectious disease in the district.

**BALLYMENA; Ballymena, W.**—Whooping-cough prevalent, causing a few deaths amongst children.

**BALLYMENA; Broughshane.**—An epidemic of whooping-cough has occurred in the district; no fatal cases so far.

**BALLYMENA; Clogh.**—District very healthy during last quarter. There have been a few cases of measles, but only one death.

**BALLYMENA; Portlengone.**—General health of the district good.

**BALLYMENA; Toome.**—Sanitary condition of district is steadily improving. The population is rapidly diminishing from emigration and flocking to towns; this leaves a choice of the best cottier houses for those remaining.

**BALLYMONEY; Dirraw.**—A severe epidemic of measles during June, July, August, and September among children and adults. Four deaths registered during quarter from measles with complications.

On account of measles vaccination was postponed except children recovered from disease.

**BALLYMONEY; Portrush.**—Four cases of scarlatina occurred, three of which were sent to union infirmary, other case is having proper attention, isolation and disinfection being stringently carried out.

**LISBURN; Dunmurry.**—Sanitary condition of district good.

**LISBURN; Glenavy.**—District free from any epidemic.

**LISBURN; Knocknadona.**—Sanitary condition of district good.

**LISBURN; Lisburn, W.**—Enteric fever has been prevalent, and seven deaths have occurred; a great many of the cases were caused by contaminated dairies, but I am glad we shall soon be able to prevent a repetition of such cases by closing dairies.

**Armagh County.**

**ARMAGH; Armagh, W.**—Two cases of typhoid fever occurred in Lower English-street; cause unknown.

**ARMAGH; Keady.**—There were four cases of scarlatina during the quarter. The epidemic of measles has abated.

**ARMAGH; Markethill.**—Measles of a mild kind was prevalent during the quarter, otherwise the district has been very healthy.

**BANBRIDGE; Tanderagee.**—Diphtheria appeared in this district 27th July, and since then at least twelve cases have been observed, and three doubtful cases. They could not be traced to any common influence. Isolation, disinfection, cleanliness, and close supervision were enforced. Antidiphtheritic serum was used with good results, and one death occurred in a case in which time for its use was not possible.

**CASTLEBLANEY; Newtownhamilton.**—Three cases of typhoid fever occurred, and I found it necessary to have a whole family suffering from typhus fever removed to the hospital. There has been no further extension of the disease.

**LURGAN; Lurgan, No 1, W.**—Sixteen cases of infectious diseases were notified under the Infectious Disease (Notification) Act, 1889—viz., 10 cases of typhoid fever, 3 of scarlatina, one each of diphtheria, erysipelas and small-pox. The origin of the latter could not be traced, and the case, which was very mild, occurred in a person  $\approx$  22, who had been vaccinated in infancy.

**LURGAN; Lurgan, No. 2.**—An epidemic of whooping-cough in this district at present.

**LURGAN; Portadown.**—Scarlatina prevalent.

**NEWRY; Mullaghglass.**—District healthy.

**Cavan County.**

**BAILIEBOROUGH; Bailieborough, W.**—District in a very healthy condition.

**BAILIEBOROUGH; Kingscourt.**—Vaccination has been practically nil during the past quarter, all cases having been postponed on account of the presence of measles at the end of the previous quarter.

**CAVAN; Belturbet.**—In consequence of whooping-cough being prevalent children are not coming to get vaccinated.

**CAVAN; Killeshandra.**—District healthy during quarter.

**CAVAN; Stradone**—Three cases of typhoid occurred in the district during the quarter.

**COOTEHILL; Tullyvin.**—Sanitary arrangements in the district good. Large number of vaccination defaulters last quarter.

**ENNISKILLEN; Holywell, No 2.**—The sanitary condition of the district is fairly good.

**GRANARD; Scrabby.**—Measles prevalent in this portion of district during past quarter. The schools were closed to prevent spread of disease, only two deaths occurred from this cause.

**OLDCASTLE; Ballyjamesduff.**—District healthy.

**OLDCASTLE; Virginia.**—District healthy, and at present free from zymotic disease.

**Donegal County.**

**BALLYSHANNON; Ballintra.**—Sanitary arrangements fairly good.

**DONEGAL; Dunkineely.**—District healthy.

**DONEGAL; Mountcharles.**—The district has been free from any epidemic during the past quarter.

**DUNFANAGHY; Crossroads.**—The health of the district is good.

**GLENTIES; Carrick.**—The district is now remarkably healthy.

**GLENTIES; Doochary.**—District healthy.

**GLENTIES; Dunglow, No. 2**—District now free from both measles and enteric, of which there were some cases in the first part of the quarter.

**INISHOWEN; Clonmany.**—The district is healthy, and free from specific diseases since last return, 30th June, 1900.

**INISHOWEN; Malin.**—The district is now healthy.

**INISHOWEN; Moville.**—District is at present healthy.

**LETTERKENNY; Church Hill.**—District healthy.

**LONDONDERRY; Burt.**—Two deaths from enteric registered during the quarter. The drinking water was analysed with no result as to cause.

**MILFORD; Fanad.**—Health of district good. The outbreak of typhus fever which occurred last May is completely stamped out, no case has occurred now for almost three months. The three deaths from typhus registered occurred during the beginning of the outbreak last May.

**STRABANE; Castlefinn.**—Diphtheria now gone.

**STRANORLAR; Cloghan.**—Sanitary arrangements satisfactory. One of the persons whose deaths were registered reached the advanced age of 94 years.

**Down County.**

**BANBRIDGE; Ballyward.**—The sanitary condition of the district has been a good deal improved during the quarter. We had some cases of diphtheria, but no death.

**BANBRIDGE; Dromore.**—The vaccination is satisfactory throughout the district, which has been free from epidemics of any kind. The sanitary arrangements are on the whole satisfactory.

**DOWNPATRICK; Ballynahinch.**—One case of measles was imported into the district from Belfast, but the disease did not spread.

**DOWNPATRICK; Downpatrick, W.**—One death attributed to influenza; one death at 104 years.

**DOWNPATRICK; Killyleagh.**—I have seen eight cases of dysentery during the quarter. The disease was confined to members of one family, with one exception, and this man was employed at work in the house of the affected family. Two of the cases died. All the others recovered. I suspect the well, and will have the water analysed.

**KILKEEL; Kilkeel, No. 1.**—Four deaths registered from scarlatina, which was very prevalent during the earlier part of the quarter, but it is now disappearing.

**KILKEEL; Kilkeel, No. 2, W.**—Health of district good.

**LISBURN; Ballylesson.**—Labourers' dwellings in no way improved.

**LISBURN; Hillsborough.**—District particularly healthy. There were three cases of enteric fever, with one death, during the quarter, but they all came into the district ill with the disease.

**LISBURN; Saintfield.**—The health of the district during the past quarter has been above the average. The deaths occurring being of children under one year, or adults over 60 years.

**LURGAN; Moira.**—One death at 90 years; no death from zymotic disease. One case of enteric, and six cases of very mild scarlatina, have been in the district during the quarter. Vaccination was postponed on account of the latter.

**LURGAN; Waringstown.**—The district is healthy. No epidemic is present. There have been isolated cases of infectious disease.

**NEWRY; Donaghmore.**—Sanitary arrangements good. No infectious disease except one case of scarlatina, which is convalescent. One death registered, 96 years of age, and one 84 years.

**NEWTOWNARDS; Comber.**—The health of the district is remarkably good. District free from epidemics, thanks to the good sewers.

**NEWTOWNARDS; Newtownards W.**—The health of the district during the past quarter has been good. The engineer who was appointed to examine the town in reference to the sewerage, has made his report, and the matter is, I believe, having the attention of the authorities.

#### Fermanagh County.

**CLONES; Rosslea.**—The death of a male aged 100 years was registered.

**ENNISKILLEN; Enniskillen W.**—Sanitary arrangements good. Public health very good.

**ENNISKILLEN; Florencecourt.**—The condition of district is satisfactory as to its sanitation. No epidemic of any kind exists in the district at present.

**ENNISKILLEN; Holywell, No. 1.**—The sanitary condition of the district is fairly good, with the exception of the village of Belcoo, which needs a supply of pure water. It has a population of about 140, a police barrack, a hotel, three public houses, two lodging houses, and a railway station. The drinking water is obtained from two shallow wells, each about a quarter of a mile distant, into which dirty vessels, from which animals have been fed and watered, are constantly being dipped.

**IRVINESTOWN; Ederney.**—Sanitary arrangements are in good order.

**LISNASKREA; Derrylin.**—One case of scarlatina reported during the quarter, and two cases of chicken-pox.

**LISNASKREA; Lisnaskea, W.**—Sanitary state of district fair, no infectious disease prevalent during quarter.

#### Londonderry County.

**COLERAINE; Aghadowey.**—District healthy.

**COLERAINE; Garvagh.**—No epidemic during quarter.

**COLERAINE; Kilrea.**—District healthy.

**COLERAINE; Portstewart.**—I have nothing to add with reference to the health of the district, it being generally good and free from infectious diseases for the past quarter.

**LIMAVADY; Bellarena.**—District healthy.

**LIMAVADY; Dungiven.**—Sanitary condition satisfactory, no particular disease predominated during quarter, vaccination delayed owing to harvest.

**LIMAVADY; Limavady, W.**—There were some cases of fever, principally typhus. No deaths. Also some cases of scarlatina. No deaths. The district is otherwise healthy.

**LONDONDERRY; Claudy.**—Three cases of diphtheria—diagnosis confirmed bacteriologically—were attended by me. The only cause to be found was a defective drain near the house. All the cases recovered, and the disease did not spread. There are some cases of whooping-cough of a mild type, and only one case had serious complication.

**LONDONDERRY; Bellaghy.**—The general health of the district is good. There are no infectious diseases prevalent. One half the total deaths are those of aged people.

**MAGHERAFELT; Draperstown.**—My return of deaths is remarkable this quarter, in that nine out of twenty-two are from phthisis, and I think the prevalence of this disease is not confined to this district of the union.

**MAGHERAFELT; Moneymore.**—A severe type of measles was very prevalent during the first two months of the quarter. Two delicate children died from it. There were also many cases of whooping-cough. One death resulted. Both diseases seem now to have disappeared. One family in district is suffering from enteric fever—the result of defective house drainage. With this exception the district appears to be free from infectious disease.

#### Monaghan County.

**CASTLEBLAYNEY; Castleblayney W.**—The case of measles included in this return occurred in April during the prevalence of the epidemic. No death from that disease during this quarter. Throat and chest affections were numerous for the past few weeks. Gastric and intestinal catarrhs were also prevalent, the cause in many of the cases being attributed to the use of fruit of a bad quality.

#### Monaghan County.

**COOTEHILL; Dawsongrove.**—The sanitary arrangements in the district are fairly good. The district has been free from infectious disease during the quarter.

**MONAGHAN; Castleshane.**—The district is in good sanitary condition. There has been an outbreak of diphtheria in one corner of the district. I have had one case of scarlatina, which is not registered yet.

**MONAGHAN; Glaslough.** — District healthy. An absence of any zymotic disease.

**MONAGHAN; Kilmore.** — Four cases of diphtheria, two of scarlatina, and five of enteric fever during past quarter. All these diseases are now absent from the district. One of the diphtheria cases died.

**MONAGHAN; Monaghan, W.** — The sanitary condition of the district seems to be satisfactory, although during the past two months there has been a considerable number suffering from typhoid fever. The County Fever Hospital has had an average of twelve to fifteen patients during the past two or three months. There have, however, been no deaths there.

#### Tyrone County.

**CASTLEBERG; Castleberg W.** — Sanitary state of district satisfactory. One death registered up to 108 years.

**CASTLEBERG; Drumquin.** — Sanitary state of district satisfactory.

**CASTLEBERG; Killeter.** — The health of the district is good. Sanitary arrangements satisfactory.

**CLOGHER; Fivemiletown.** — Sanitary condition of district good. Quite free from any infectious disease.

**COOKSTOWN; Cookstown, W.** — The district very healthy.

**COOKSTOWN; Stewartstown.** — There has been an epidemic of measles during quarter, on account of which I thought better to postpone vaccination. One hundred and twenty-nine houses have been fumigated, also one creamery and two National Schoolhouses. Some more have to be fumigated yet. District at present very healthy. Very few deaths.

**IRVINESTOWN; Trillick.** — All the deaths registered for the past quarter were of old people, except two. One was registered at the age of 96, two at 88, one at 80, one at 76, and one at 73 years. There were two cases of diphtheria and two of enteric. No deaths from these diseases. There is a very poor supply of water for domestic purposes, and what there is, is not up to the standard of good waters. The houses of the poor in general are very bad.

**OMAGH; Drumquin.** — The sanitary arrangements are satisfactory. Two cases of enteric fever occurred recently.

**OMAGH; Fintona.** — The health of the district has been very good during the last quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

**OMAGH; Omagh No. 1, W.** — Sanitary condition of district good.

**OMAGH; Omagh No. 2.** — District healthy.

**OMAGH; Sixmilecross.** — We have had an epidemic of enteric fever, but it is

cleared out of the district. The water supply is under consideration.

**STRABANE; Newtownstewart.** — District exceptionally healthy during past summer. Three of the twenty-three deaths were from cancer and three from tubercular disease.

**STRABANE; Plum Bridge.** — District healthy; but in my opinion the water supply to the village is wretched. The well from which the inhabitants get water is sometimes in a filthy condition.

### PROVINCE OF CONNAUGHT

#### Galway County.

**BALLINASLOE; Laurencetown.** — Of the deaths registered four were of persons over 80 years, one of whom had reached 101 years.

**GALWAY; Galway, No. 3.** — Health of district exceedingly good.

**GALWAY; Granmore.** — District perfectly healthy. Sanitary condition good.

**GALWAY; Turleughmore.** — Sanitation good.

**GORT; Gort, W.** — The health of district is good.

**GORT; Kinvarra.** — The health of the district is good; two cases of typhoid fever occurred within the quarter; both recovered, and the disease did not spread.

**LOUGHREA; Bullaun.** — Eight deaths registered of persons aged 60, 65, 68, 70, 75, 80, 80, and 95 years.

**OUGHTERARD; Cloonbur, No. 1.** — Health of district good. Enteric fever, which was epidemic during last half year, has now quite disappeared.

**OUGHTERARD; Cloonbur, No. 2.** — Sanitary arrangements in the district satisfactory.

**PORTUMNA; Portumna No. 1, W.** — The district is in a healthy state.

#### Leitrim County.

**BAWNBOY; Ballinamore.** — There were five cases of scarlatina during the quarter, all of which occurred in one week. By strict isolation and closing of the schools the disease was not allowed to spread. One death occurred from scarlatina.

**MANORHAMILTON; Dromahaire.** — The district, in general, is in a good sanitary condition, and the sanitation of the village is receiving the attention of the District Council. Impetigo has been epidemic in the early part of the quarter. Three cases of enteric occurred also in the quarter.

**MOHILL; Carrigallen.**—The health and sanitary condition of the district has been good during the quarter.

**MOHILL; Rinn.**—There was an outbreak of scarlatina from the adjoining union of Longford, but owing to the prompt removal of the cases to the fever hospital, and closing of the schools, the epidemic was prevented from spreading. Otherwise the district is generally healthy.

#### Mayo County.

**BALLINA; Ballina W.**—Two deaths occurred from typhus fever in this quarter, but I think the disease is stamped out now.

**BALLINROBE; Cappaghduff.**—Sanitary arrangements fair. One case of death by lightning.

**BALLINROBE; Hollymount.**—District at present free from epidemic disease.

**BELMULLET; Binghamstown, W.**—District healthy. Vaccination defaulters very negligent in bringing in their children.

**BELMULLET; Knocknalwer.**—Typhus fever attacked three families, caused by the insanitary state of their dwellings; the latter have been disinfected and patients sent to hospital. A few cases of influenza and whooping-cough occurred during the quarter, but the diseases have now almost died out. Otherwise health of district very good.

**CASTLEBAR; Castlebar, No. 1, W.—Rural District.** Cess pools and manure heaps are more the rule than the exception too near dwelling-houses. Cows are housed in dwellings, which are already too small for occupants. Outbreaks of an ill-defined fever (which I believe to be febris recurrens described by Sir Wm. Jenner in 1849) occurred in various parts of district during last quarter.

**Urban District.**—Drainage inadequate. No map available.

**CLAREMORRIS; Ballyhaunis.**—There was one case of diphtheria, which was at once removed to hospital.

**KILLALA; Killala, W.**—There was an outbreak of typhoid fever in one village, and fifteen cases occurred in one week in August. The disease has not spread, and the patients are all convalescent.

**WESTPORT; Achill.**—Sanitary state and general health of district good. A great many of the vaccination defaulters came in on being notified by the guardians.

**WESTPORT; Ballycroy.**—This district is in a very good condition.

**WESTPORT; Bundorrigha.**—Sanitary arrangements good.

**WESTPORT; Louisburgh.**—General health of district good during past quarter.

**WESTPORT; Westport, W.**—The sanitary condition of the town and district is exceedingly bad. There are but few water closets and privies in the town, and practically none in the country districts. The practice of housing cattle and horses in dwellings is very prevalent. Manure heaps are generally placed in front of the dwellings; yet, no cases of fever, severe summer diarrhoea, or acute rheumatism, have come under my notice during the quarter.

#### Roscommon County.

**ATHLONE; Brideswell.**—The health of district continues satisfactory.

**BOYLE; Ballyfurnan, No. 1.**—Vaccination is very slow in this district.

**BOYLE; Boyle No. 1, W.**—This district has been fairly healthy during the past quarter. There have been a few cases of measles and scarlet fever, and one case of typhoid fever.

**BOYLE; Keadeu.**—Health of this district good. The death of a man aged 94 years was registered during the quarter. The sanitary arrangements very fair.

**CASTLEREAGH; Castleplunket.**—Mumps prevalent during quarter.

**ROSCOMMON; Athleague.**—The district healthy.

**ROSCOMMON; Ballyleague.**—District is in a healthy condition.

**STROKESTOWN; Strokestown, W.**—Sanitary condition of district good. There has been an epidemic of mumps during last month of the quarter.

#### Sligo County.

**BOYLE; Ballyfurnan, No. 2.**—Vaccination very slow in this district.

**DROMOE WEST; Easky, W.**—There were four cases of typhoid fever, confined exclusively to one house. No deaths from the disease.

**SLIGO; Ballymote.**—District considered healthy. The vaccination of children neglected by parents.

**SLIGO; Carney, No. 1.**—The sanitary condition of the district is fairly good. Had only four cases of enteric fever during the quarter. They have been removed to hospital, and the necessary disinfecting carried out.

**TOBERCURREY; Coolaney.**—Sanitary arrangements fairly good.

**TOBERCURREY; Tobercurry, W.**—The district is entirely free from any contagious disease.

---

**Marriages:**—JULY, AUG., SEPT., 1900. **Births & Deaths:**—OCT., NOV., DEC., 1900.

---

During the quarter ended 30th December last, there were registered in the 827 Registrars' Districts in Ireland 22,911 births—a number equal to an annual birth-rate of 20·4 in every 1,000 of the estimated population\*—and 18,182 deaths, representing an annual rate of 16·2 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 7,218 persons emigrated.

In England last quarter, the birth-rate represented was 27·6 in every 1,000 of the estimated population, and the death-rate 16·6 per 1,000.

The birth-rate in Ireland for the quarter is 0·9 under the average rate for the corresponding quarter of the ten years 1890–99, and 1·4 under the rate for the fourth quarter of 1899. The deaths are 1,113 under those registered in the corresponding quarter of 1899; the death-rate is 0·9 under the rate for that quarter, and 0·7 below the average for the fourth quarter of the ten years 1890–99.

Compared with those for the corresponding quarter of 1899, the returns of pauperism, furnished by the Local Government Board, show a decrease of 1,848 in the average number of Workhouse inmates on Saturdays during the quarter, and of 92 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years 1890–99, the number of Workhouse inmates shows a decrease of 1,198, but the number of persons on out-door relief shows an increase of 273, the total under both heads being 0·9 per cent. below the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·2 per cent.

The annual marriage-rate (4·4 per 1,000 of the population) represented by the marriages registered during the third quarter of 1900 is the same as the average rate for the corresponding quarter of the preceding ten years.

\* See page 283.

### MARRIAGES.

The marriages (5,000) registered in Ireland during the third quarter of 1900 are equivalent to an annual rate of 4·4 per 1,000 of the estimated population, being 0·1 below the rate for the corresponding quarter of the year 1899, and equal to the average rate for the third quarter of the ten years 1890–99. Of the total number of marriages 3,164 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,836 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 3·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·6 per 1,000 of the members of all other religious persuasions, the rate for each of these headings being equal to the average of the corresponding period of the preceding ten years. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

\*The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891. See note (\*), page 235.

TABLE II.—Showing by **Quarterly Periods**, the **Marriages** registered in Ireland in each of the ten years 1890–99, and the first, second, and third quarters of 1900.

**BIRTHS.**

The number of births registered during the quarter ended 31st December last was 22,911—11,802 boys and 11,109 girls—being equal to an annual ratio of 1 in every 49.1, or 20.4 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1890–99 was 24,552, equivalent to an annual rate of 21.3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 19.7 per 1,000 of the population according to the Census of 1891; Munster, 17.4; Ulster, 21.4; and Connaught, 18.3.

The highest county birth-rate\* is 27.7 for Antrim, and the lowest 13.7 for Longford. Of the intermediate rates the highest five are—Dublin, 26.5; Down, 25.4; Mayo, 20.9; Armagh, 19.7; and Londonderry, 19.5; and the lowest five are—Fermanagh, 13.9; Roscommon, 14.0; Monaghan, 14.2; Westmeath, 14.3; and Meath, 14.7.

**DEATHS.**

The number of deaths registered in Ireland during the quarter ended 31st December last was 18,182—9,046 males and 9,136 females—affording an annual ratio of 1 in every 61.9, or 16.2 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1890–99 was 16.9 per 1,000.

The death-rate in Leinster was 18.0 per 1,000 of the population according to the Census of 1891; in Munster, 14.1; in Ulster, 16.4; and in Connaught, 11.4.

The county death-rates\* range from 9.9 in Roscommon to 23.5 in Dublin. Between these rates the lowest five are—Mayo, 10.6; Leitrim, 11.2; Cavan, 11.7; Kerry, 11.7; and Clare, 11.9; and the highest five are—Antrim, 21.5; Kildare, 17.4; Down, 16.4; Kilkenny, 16.0; and Limerick, 16.0.

\* See note (\*) on page 266.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1890-99, and the average number for that period; also the number registered during each quarter of the year 1900 :—

1900, . . .	23.4	24.0	22.2	20.4	22.5	27.7	19.6	14.4	16.2	19.5

**Ages.**—Of the 18,182 deaths registered last quarter, 2,528, or 13.9 per cent., were of children under 1 year old; and 7,408, or 40.7 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 110.3 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14.6 per cent. of the total deaths registered therein; in Munster, 14.2 per cent.; in Ulster, 14.3 per cent.; and in Connaught, 10.3 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 37.2 per cent.; in Munster to 41.0 per cent.; in Ulster to 40.5 per cent.; and in Connaught to 50.2 per cent. of the total deaths registered in the province.

#### HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal zymotic diseases is 956, or less by 597 than the number occurring in the corresponding quarter of 1899, and is equivalent to an annual rate of 0.8 per 1,000 living, being 0.6 under the rate for the fourth quarter of last year, and 0.3 under the average rate for the fourth quarter of the ten years 1890-99.

**Small-pox.**—One death from this disease occurred during the last quarter of 1900 in Dunglow No. 1 Registrar's District.

**Measles.**—Eighty-nine deaths occurred during the December quarter of 1900, being 100 under the average for the corresponding quarter of the preceding five years. During the December quarter of 1899, 595 cases of measles were registered in Ireland. Of the 89 deaths, 57 took place in the Province of Ulster, 12 in Leinster, 12 in Munster, and 8 in Connaught. There were 15 deaths from this disease in Belfast Union and 22 in Larne.

**Scarlatina.**—Seventy-six deaths occurred during the quarter, being 57 under the average for the corresponding period of the preceding five

years, but 6 in excess of the deaths from this disease in the December quarter of 1899. Thirty-seven occurred in the Province of Munster, 19 in Ulster, 18 in Leinster, and 2 in Connaught. Twenty-six deaths occurred in Cork Union, 7 in Belfast, and 6 in North Dublin.

**Typhus Fever.**—Thirty-one deaths occurred during the quarter, being 7 under the average for the corresponding period of the past five years, and equal to the number occurring in the December quarter of 1899. Thirteen deaths occurred in the Province of Munster, 9 in Connaught, 6 in Leinster, and 3 in Ulster. There were 2 deaths in Galway Union, 2 in Sligo, 2 in Tuam, 2 in Cork, 2 in Dunmanway, 2 in Clogheen, and 3 in Drogheda.

**Whooping-cough.**—One hundred and thirty-eight deaths occurred during the quarter. This number is 1 below that of the corresponding quarter of 1899, and 96 below the average for the corresponding period of the past five years. Sixty-four deaths occurred in the Province of Leinster, 52 in Ulster, 14 in Munster, and 8 in Connaught. Twenty-nine deaths occurred in North Dublin Union, 22 in South Dublin, 16 in Belfast, 8 in Londonderry, 6 in Magherafelt, 6 in Larne, 9 in Cork, 5 in Ballymoney, 4 in Ballymena, and 4 in Rathdrum Union.

**Diphtheria.**—One hundred and one deaths were caused by this disease, being 3 below the number which occurred in the December quarter of 1899, and 8 in excess of the average for the corresponding period of the past five years. Forty-nine deaths occurred in the Province of Ulster, 29 in Leinster, 18 in Munster, and 5 in Connaught. In Belfast Union there were 18 deaths, in South Dublin 7, and in North Dublin 5. In the following Registrars' Districts more than 1 death occurred:—Donnybrook, 5; Clontarf and Howth, No. 2; Killarney, No. 2; Rathkeale, No. 1, and Belfast No. 12, 4 each; in Kilkenny, No. 1; Cork Rural, No. 1; and Lurgan, No. 1, 3 deaths occurred in each; in Larne, Tandragee, Portadown, Buncrana, Dromore, Newtownards, Newport, Westport, Belfast, No. 2, Belfast, No. 4, Belfast, No. 9, and Belfast, No. 10, 2 deaths occurred in each.

**Simple Continued and Ill-defined Fever.**—There were 15 deaths registered under this heading—namely, 7 in Connaught, 4 in Ulster, 2 in Leinster, 2 in Munster. The average for the corresponding period of the past five years being 28.

**Enteric Fever** caused 191 deaths in Ireland during the quarter. This figure shows a decrease from the December quarter of 1899 of 56, and is 58 below the average for the corresponding quarter of the past five years. It is, however, 14 in excess of the number of deaths which occurred in the 3rd, or September, quarter of 1900. In the Provinces, 94 deaths occurred in Ulster, 64 in Leinster, 24 in Munster, and 9 in Connaught. Sixty-two deaths occurred in Belfast Union, 24 in North Dublin, and 25 in South Dublin. The deaths in Belfast corresponded to the rate of  $\cdot 7$  per 1,000 of the population (estimated to the middle of 1900), and in Dublin to  $\cdot 6$  per 1,000 of the population according to the Census of 1891. Five deaths occurred in each of the following Unions:—Lisburn, Newry, and Mitchelstown. Of the 5 deaths in Mitchelstown, 2 took place in the Registrar's District of Galbally, and 3 in the Registration District of Mitchelstown, No. 1.

**Diarrhœa.**—Three hundred and twelve deaths occurred from this disease. The deaths are 12 above the average for the December quarter of the last five years. They are, however, 257 under the number which occurred in the September quarter of 1900. In the Provinces, 130 deaths occurred in Leinster, 88 in Munster, 84 in

Ulster, and 10 in Connaught. Ninety-five of the deaths in Leinster were in the County Dublin. Of this number, 44 occurred in North Dublin Union and 45 in South Dublin. Thirty-one of the deaths in Munster occurred in County Cork, and 18 of them were in Cork Union. Thirty-six of the deaths in Ulster occurred in County Antrim and 27 in County Down. Of the total of these last two figures, 41 occurred in Belfast Union. The death-rate from this disease, per 1,000 of the population in 1891, of the Dublin Unions (North and South), was 1.0, and that for Belfast .5 per 1,000 of the estimated population to middle of year 1900.

**Simple Cholera** caused 2 deaths—1 in Antrim district and 1 in Finglas and Glasnevin district.

**Cerebro-spinal Meningitis.**—There were 5 deaths registered during the quarter in the Dublin Registration Area. In the first quarter of the present year, 7 deaths took place, in the second quarter there were 45 deaths, and in the third quarter 14; 71 deaths from this disease were registered in the Dublin Registration Area during the year 1900.

In the remainder of Ireland the following cases have been reported by the Registrars in their quarterly returns:—

One death in Murragh district, Bandon Union, one death in Cork Urban No. 7 district, and 2 deaths in Holywell No. 2 district, Enniskillen Union.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district, measles in 25 districts, scarlatina in 39, whooping-cough in 21, diphtheria in 13, fever in 38 (typhus 3, simple continued 1, and enteric 34), influenza in 17, and mumps in 3.

**Inquests.**—There were 561 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 32 of the total deaths registered.

In Leinster there was 1 inquest to every 29 deaths registered, in Munster 1 to 40, in Ulster 1 to 27, and in Connaught 1 to 71.

**Deaths in Public Institutions.**—Of the 18,182 deaths registered, 3,363, or 18.5 per cent., occurred in public institutions. In Leinster the percentage was 25.5, in Munster 23.5, in Ulster 11.4, and in Connaught 13.2.

The following table (Table IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1900, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.											Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple and ill-defined Fever.	Enteric Fever.	Diarrhoea.	Simple Cholera.	Total.

## URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain about one-fourth of the total population of the country, was 22·2, and the birth-rate 27·0 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 13·1 and the birth-rate 16·9 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Districts during the quarter was 1·8 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1900, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration Area,” which, for the period for which this Table is compiled, consisted of the City of Dublin and its Suburban Districts, comprises the Urban Districts of Dublin, Clontarf, Drumcondra Clonliffe and Glasnevin, New Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 29th December, 1900.

‡ The rates for Belfast have been calculated on the population estimated to the middle of the year 1900.

### VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1900, there were 21,128 persons successfully vaccinated; in 3,519 cases the operation was postponed, 52 children were reported as insusceptible of vaccination, and the deaths of 1,547 unvaccinated children under 3 months old were registered, making a total of 26,246 children with regard to whom particulars as to vaccination were ascertained.

### EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 7,218 (3,107 males and 4,111 females), being 1,207 more than in the corresponding quarter of the year 1899, and 1,575 over the average number for the fourth quarter of the ten years 1890-99.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December, in 1899 and 1900:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1899.	1900.	In-crease.	De-crease.	1899.	1900.	In-crease.	De-crease.	1899.	1900.	In-crease.	De-crease.

### PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was  $5\frac{1}{2}d.$ , which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1899 the average price was also  $5\frac{1}{2}d.$ , and in the corresponding quarter of 1890 it was  $6\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 13s. 6d. per cwt., being 6d. under the average for the corresponding quarter of the year 1899. In the fourth quarter of 1890 the average price was 15s. 1d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 5d. to 4s. 11d. In the fourth quarter of 1899 the average prices were 2s. 3d. to 2s. 11d., and the prices for the corresponding quarter of 1890 were 3s. 4d. to 3s. 8d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 50s. 6d. to 56s. per cwt. In the corresponding quarter of 1899 the average prices were from 49s. to 57s. 6d., and in the fourth quarter of 1890 they were from 47s. to 59s.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 25s. to 28s. per ton.

The highest price of  $2\frac{3}{4}$  per cent. Consols at the Dublin Stock Exchange for the quarter was £99 $\frac{1}{8}$ , and the lowest £96 $\frac{7}{8}$ . The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter was  $4\frac{1}{2}$  per cent., which was the rate since 19th July, when it was raised from 4 per cent., at which price it stood since 24th May.

NOTE—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1900 was 41,328, or 1,848 under the average for the corresponding period in 1899.

The average weekly number of persons receiving out-door relief during the quarter was 56,191, being 92 under the average for the fourth quarter of 1899.

Of the persons receiving in-door relief during the fourth quarter of 1900, an average number of 1,448 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1899 the average weekly number was 1,503.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1900, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the fourth quarter of the years 1895–1900, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 282):—

The mean height of the barometer during the fourth quarter of 1900 was 29·800 inches, being ·096 inch under the average for the corres-

\* Latitude 53° 21' 44·65" north; longitude 6° 21' 6·35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1895-9; the highest reading (30·644 inches) was on the 22nd October, at 9 A.M., wind S.W.; and the lowest (28·747 inches) on the 27th December, at 9 P.M., wind S.S.W.

The maximum temperature of the air during the quarter was 63·9° and the minimum 25·2°. The maximum heat in sun was 117·0°, and the minimum on the grass 18·3°.

Rain fell on 64 days during the quarter. The rain-fall measured 10·785 inches, being 2·100 inches over the average for the fourth quarter of the five years 1895-99. The greatest monthly rain-fall was in November, when 5·195 inches were registered.

The wind blew on 28 days from S.W., on 21 days from W., on 9 days from S., on 7 days from S.E., on 5 days from E., on 4 days from N., on three days from N.W., one day from N.E., and the air was calm on 14 days at 9 A.M.

*October.*—The mean height of the barometer during this month was 29·914 inches; the highest reading (30·644 inches) was on the 22nd at 9 A.M., wind S.W.; and the lowest (29·339 inches) on the 4th, at 9 A.M., wind S.E. The mean temperature of the air was 48·5°, the maximum registered was 63·9°, and the minimum 31·2°. The 7th was the warmest day, and the 16th the coldest night. The mean of the dry bulb was 49·2°, and of the wet bulb 47·2°. The maximum heat in sun was 117·0°, and the minimum on the grass 24·2°. The minimum on the grass was below 32° on 8 nights. The total amount of sunshine recorded was 123·6 hours, the greatest daily amount being 8·8 hours on the 14th. The maximum ozone was ·7, the minimum ·1, and the mean ·4. Rain fell on 21 days. The rainfall measured 3·445 inches; the greatest amount in 24 hours was ·660 inch on the 9th.

*November.*—The mean height of the barometer during this month was 29·709 inches; the highest reading (30·504 inches) was on the 19th, at 9 P.M., air calm; and the lowest (28·937 inches) on the 15th, at 9 P.M., wind S.W. The mean temperature of the air was 43·2°, the maximum registered was 61·1°, and the minimum 27·1°. The 3rd was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 43·5°, and of the wet bulb 41·8°. The maximum heat in sun was 100·5°, and the minimum on the grass 19·8°. The minimum on the grass was below 32° on 14 nights. The total amount of sunshine recorded was 61·4 hours, the greatest daily amount being 5·8 hours on the 9th. The maximum ozone was 1·0, the minimum ·0, and the mean ·5. Rain fell on 20 days. The rain-fall measured 5·195 inches; the greatest amount in 24 hours was 1·010 inches on the 6th.

*December.*—The mean height of the barometer during this month was 29·777 inches; the highest reading (30·354 inches) was on the 16th at 9 A.M., wind S.; and the lowest (28·747 inches) on the 27th, at 9 P.M., wind S.S.W. The maximum temperature of the air registered was 57·8°, and the minimum 25·2°. The 20th was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 45·0°, and of the wet bulb 43·0°. The maximum heat in sun was 92·3°, and the minimum on the grass 18·3°. The minimum on the grass was below 32° on 14 nights. The total amount of sunshine recorded was 47·4 hours, the greatest daily amount being 5·4 hours on the 17th. The maximum ozone was ·8, the minimum ·1, and the mean ·5. Rain fell on 23 days. The rain-fall measured 2·145 inches; the greatest amount in 24 hours was ·260 inch on the 25th.

## THE YEAR 1900.

The total number of births registered in Ireland during the year 1900 (as returned by the Registrars) was 101,262, or 22·5 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 87,609, or 19·5 per 1,000. Of the 87,609 deaths, 4,001, equal to 0·9 per 1,000 living, were caused by one or other of the principal zymotic diseases.†

In the Urban Districts, which contain about one-fourth of the total population, the birth-rate was 30·7 per 1,000 of the population; the death-rate (all causes) 25·5, and the zymotic death-rate 1·9 per 1,000. The corresponding rates for the remainder of the country are—births, 18·6; deaths from all causes, 16·4; and deaths from the principal zymotic diseases, 0·5.

According to the returns of Vaccination furnished by the Registrars there were 91,150 successful primary vaccinations performed during the year; in 3,519 cases, *during the last quarter*, the operation was postponed; 184 children were reported during the year as inusceptible of vaccination; and the deaths of 6,327 unvaccinated children under three months old were registered.

## URBAN DISTRICTS.

TABLE VIII.—BIRTHS and DEATHS registered during the Year 1900, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration Area,” which, up to the close of the period covered by this report, consisted of the City of Dublin and its Suburban Districts, comprises the Urban Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, New Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Districts marked thus (•) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 29th December, 1900.

\* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature) are as follow:—Valencia +.050; Killarney, +.102; Parsonstown, +.191; Dublin

mentioned Seven IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

NOTE.—This table has been constructed for the years 1826 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year or the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of migrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1900—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

**MARRIAGES** Registered during the Quarter ending 30th September, 1900, in the PROVINCES, COUNTIES,\* and SUPERINTENDENT REGISTRARS' DISTRICTS (or Poor Law UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1900; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, and CHOLERA; also VIOLENT DEATHS;† INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 31st December, 1900, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

### ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Statute Acres.	Popu- lation in 1891.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter as stated by the Registrars to include														Deaths from		Deaths in Public In- stitutions.		Number of successful primary Vaccinations.		Number of Cases in which Vaccination was postponed.		Number of Persons in-susceptible of Vao- cination.		Number of Unvaccin- ated Children under 5 months old whose deaths were registered during the quarter.		Total of the foregoing.	
			Averages in the Quarter ending 30th Sept., 1900.	Registered in the Quarter ending 31st Dec., 1900.	Averages in the Quarter ending 31st Dec., in the 10 years, 1890-99.	Registered in the Quarter ending 31st Dec., 1900.	Averages in the Quarter ending 31st Dec., in the 10 years, 1890-99.	Registered in the Quarter ending 31st Dec., 1900.	Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined fever.	Enteric fever.	Diarrhoea.	Cholera.	Violence.†	Inquest Cases.	Deaths in Public In- stitutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons in-susceptible of Vao- cination.	Number of Unvaccin- ated Children under 5 months old whose deaths were registered during the quarter.	Total of the foregoing.

\* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898. In some cases it is not at present practicable to give the average numbers of Births and Deaths for the corresponding Quarters of previous years in the Unions and Districts as now constituted.

† Including accidental deaths, homicides, and suicides.

‡ The Returns for Kildare District, in Ennisorthy Union, and for Turloughmore District, Galway Union, not having been received in time for Press, the numbers of Births and Deaths registered in the corresponding Quarter of 1899 have been adopted.

**Kilkenny.**

## APPENDIX.

## REGISTRARS' NOTES.

*On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.*

*In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.*

The Registrars alone must be considered responsible for the opinions which they express.

*Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.*

**I.—PROVINCE OF LEINSTER.****Carlow County.**

CARLOW, *Bagenalstown*. — District healthy.

CARLOW; *Carlow No. 1, W.*—The district has been very free from any dangerous disease though a number of cases of whooping-cough, followed by a mild form of measles, prevailed throughout the quarter. The sanitary arrangements of Carlow are fairly good, but the rivers Barrow and Burren are liable to overflow and inundate large parts of the town causing some danger to public health.

CARLOW; *Clonegal*.—Eighty per cent. of the deaths were 60 years and upwards.

CARLOW; *Leighlinbridge*. — District healthy.

**Dublin County.**

BALROTHERY; *Holmpatrick W.*—Of the deaths registered during the quarter five were respectively 77, 78, 80, 82, and 105 years.

DUBLIN, NORTH; *Clontarf and Howth No. 2.*—Vaccination postponed owing to cases of diphtheria in the district.

DUBLIN, NORTH; *North City No. 3, W.*—Sanitary condition of the district is fairly good. I have nothing to report concerning the principal zymotic diseases, as there were very few cases of infectious disease.

DUBLIN, SOUTH; *Tallaght*.—One death 90 years of age.

**Kildare County.**

ATHY; *Monasterevan*.—There has been some improvement in the sanitary department.

BALTINGLASS; *Baltinglass No. 2.* — Primary vaccinations postponed in consequence of sickness amongst children and infants in the district.

CELBRIDGE; *Celbridge W.*—District healthy.

CELBRIDGE; *Kilcock*.—With the exception of an epidemic of whooping-cough the district was free from disease during past quarter. Owing to the whooping-cough there were only four cases of successful vaccination.

CELBRIDGE; *Maynooth*.—The sanitary state of district is fair.

EDENDERRY; *Carbury*. — A few cases of influenza the last few weeks, otherwise health of district good.

NAAS; *Kildare*.—The district is free from infectious disease. The sanitary state of the district is pretty fair.

NAAS; *Naas and Carragh W.*—There is one well-authenticated case of a death at the age of 93 years. A few cases of typhoid. Otherwise there is no prevalent disease.

**Kilkenny County.**

CASTLECOMER; *Ballyragget* — Sanitary arrangements in the district very fair. The principal zymotic diseases absent.

CASTLECOMER; *Castlecomer W.*—Deaths about the average.

KILKENNY, *Tullaroan*. — Unsanitary arrangement regarding a running stream in the immediate vicinity of Tullaroan village in district requires attention, otherwise it may affect the public health if not looked after.

THOMASTOWN; *Knocktopher*.—With the exception of two cases of scarlatina the district has been free from zymotic diseases, during the quarter.

URLINGFORD; *Urlingford W.*—One death from scarlet fever and another from enteric fever occurred.

### King's County.

**BIRR; Birr W.**—Whooping-cough very prevalent during this quarter.

**BIRR; Killyon.**—The sanitary condition of the district is good, and with the exception of some cases of whooping-cough of recent occurrence, the health of the district is likewise good.

**MOUNTMELICK; Clonygowan No. 2.**—District very healthy. Deaths at the following ages were registered—82, 82, 87, and 90 years.

### Longford County.

**BALLYMAHON; Abbeyshrule** — District healthy.

**BALLYMAHON; Ballymahon W.**—Sanitary arrangements in the district are satisfactory.

**GRANARD; Scrabby.**—Vaccination postponed on account of state of the weather.

### Louth County.

**ARDEE; Dunleer.** — Vaccinations postponed owing to the prevalence of measles.

**DROGHEDA; Termonfeckin.**—Owing to an epidemic of measles vaccinations were postponed towards the end of the quarter.

**DUNDALK; Barronstown.**—The district is in a very healthy state and free from zymotic disease.

**DUNDALK; Ravensdale.** — Health of district very good.

### Meath County.

**ARDEE; Drumcondra.**—No epidemic—district fairly healthy.

**DROGHEDA; St. Mary's.**—The sanitary state of the district is good, and free from principal zymotic diseases at present.

**DROGHEDA; Stamullen.**—With the exception of two cases of scarlatina (mild type) the district has been in a healthy state during the past quarter. Sanitary state and water supply generally good.

**DUNSHAUGHLIN; Dunboyne.**—Two cases of facial erysipelas were notified during the quarter, and resulted in recovery. There were some cases of whooping-cough, none of which were fatal.

**DUNSHAUGHLIN; Ratoath W.**—One fatal case of scarlatina in last month of quarter.

**KELLS; Kells W.**—The district is very healthy at present.

**KELLS; Kilskeer.**—The district is healthy. Three members of one family had typhoid fever. I had them removed to Kells Fever Hospital, and place and clothing disinfected.

**NAVAN; Navan W.**—Whooping-cough has been prevalent during the past quarter, and scarlatina of a mild type has appeared in five or six cases. In all other respects the sanitation of the district and health of the people are satisfactory.

**NAVAN; Painestown.**—The district has been remarkably healthy during the quarter. Sanitary condition improved.

**OLDCASTLE; Oldcastle W.**—The general condition of the health of the district is satisfactory. Very few deaths occurred except in the Union Workhouse.

### Queen's County.

**ABBEYLEIX; Ballinakill.**—No sickness prevalent in district during the past quarter. The death of a man registered, age 100 years. Two deaths registered, age 90 years each.

**CARLOW; Carlow No. 2.**—The district has been very free from any dangerous disease, though a number of cases of whooping-cough, followed by a mild form of measles, prevailed throughout the quarter. The sanitary arrangements of the district are fairly good, but the river Barrow is liable to overflow its banks and inundate a populous portion of the district, causing considerable danger to public health.

**MOUNTMELICK; Clonygowan No. 1.**—District very healthy.

**ROSCREA; Borris-in-Ossory.** — The health of this district has been good during the past quarter.

### Westmeath County.

**BALLYMAHON; Ballymore.**—A few cases of mild scarlet fever occurred in the district, but owing to precautions taken the disease did not spread.

**GRANARD; Finnea No. 1.**—There are not so many vaccinations this quarter, owing to the harsh weather.

**MULLINGAR; Ballynacarrigy.**—General health of district good.

**MULLINGAR; Castletown Geoghegan.**—No case of zymotic disease occurred in district to my knowledge.

**MULLINGAR; Killucan.**—The health of the district is fair; there are cases of mild influenza with catarrh of lungs presently.

**MULLINGAR; Miltown.**—The district seems to be in a very healthy state at present as there are very few cases of illness.

**MULLINGAR; Mullingar W.**—The health of this district during the past quarter was very satisfactory.

### Wexford County.

**NEW ROSS; Fethard No. 2.**—The district is healthy. Vaccination postponed in some cases owing to skin disease; in others owing to the very bad weather.

**NEW ROSS; New Ross W.**—District healthy.

**WEXFORD; Broadway.**—There were six cases of enteric fever during quarter, all of which were removed.

WEXFORD; *Crossabeg*.—District generally healthy; considering dampness of weather very few vaccination defaulters.

WEXFORD; *Taghmon*.—Of the ten deaths registered this quarter seven were of persons aged respectively 82, 80, 80, 74, 73, 71, and 66.

#### Wicklow County.

BALTINGLASS; *Baltinglass No. 1 W.*—Primary vaccinations postponed in consequence of sickness amongst children in the district.

BALTINGLASS; *Kiltegan*.—Deaths were registered of persons whose ages were stated to be 93, 93, 85, 81, 80, 72, 64, and 62. A very healthy quarter.

RATHDOWN; *Bray No. 1*.—Births and deaths about the average.

RATHDRUM; *Annamoe*.—There have been three cases of scarlatina in this district during the quarter, but no death from it.

RATHDRUM; *Dunganstown*.—The district during the quarter was altogether free from epidemics, with the exception of whooping-cough among children, but in no case was it fatal.

SHILLELAGH; *Coolattin W.*—Several cases of scarlet fever in the district, which necessitated the closing of two schools.

### II.—PROVINCE OF MUNSTER.

#### Clare County.

BALLYVAGHAN; *Ballyvaghan W.*—Owing to the mildness of the weather, the deaths have been below the average.

CORROFIN; *Corrofin W.*—Notwithstanding the unprecedented wet weather, the health of district has been unusually good, with a very low death-rate.

ENNIS; *Newmarket*.—The district was fairly healthy during the past quarter; it was free from any form of zymotic disease, but the cold damp weather was accompanied by a considerable increase in bronchitis, &c.

ENNISTIMON; *Ennistimon W.*—The sanitary arrangements are satisfactory.

ENNISTIMON; *Roadford*.—District healthy.

KILLADYSERT; *Ballymacally W.*—Health of district good; eleven out of 24 deaths registered this quarter were 60 years and upwards.

KILLADYSERT; *Labasheeda*.—District healthy.

KILRUSH; *Carrigaholt*.—Health of district very good.

KILRUSH; *Kilkee*.—Sanitary state good.

KILRUSH; *Kilrush W.*—The health of district has been good during the quarter.

LIMEHICK; *Bridgetown*.—Owing to the extremely wet weather, vaccinations were fewer than usual.

LIMERICK; *Coolacasey*.—The district was very healthy during the quarter. One death registered, age 105 years.

SCARRIFF; *Annacarriga*.—There was one case of typhus, and one of typhoid during the quarter, but otherwise the district was very healthy.

SCARRIFF; *Feakle*.—District free from contagious or infectious disease. Sanitary condition of district fairly good.

SCARRIFF; *Mountshannon W.*—Of forty-two births registered by me, received only one successful vaccination certificate. District healthy.

TULLA; *Quin*.—The sanitary arrangements in district are fair.

#### Cork County.

BANDON; *Murragh*.—The death of a man aged 101 years was registered during the quarter, which was well authenticated. There was one case of cerebro-spinal fever, which proved fatal, and five of typhoid, one patient dying of the disease.

BANTRY; *Bantry W.*—Health of the district very good.

BANTRY; *Durrus and Kilcrohane*.—District very healthy; vaccination a little backward owing to wet weather.

BANTRY; *Glengarriff*.—District remarkably healthy, and in a fair sanitary condition.

CASTLETOWN; *Kilcatherine*.—Influenza beginning to make its appearance, district otherwise healthy; vaccination much retarded by inclement weather.

CLONAKILTY; *Timoleague*.—There were only 15 children vaccinated during quarter in consequence of the influenza epidemic, otherwise district healthy.

CORK; *Blarney*.—Scarlatina of a mild type somewhat prevalent in one village for the last month of quarter.

CORK; *Cork No. 1*.—Scarlatina present.

CORK; *Cork No. 4*.—Scarlatina very prevalent during the quarter.

CORK; *Cork No. 7*.—Scarlatina has been very prevalent during the quarter, but of a mild type. One death attributed to cerebro-spinal meningitis.

CORK; *Dripsey*.—Not much illness.

CORK; *Riverstown*.—Vaccination postponed in a number of cases owing to the prevalence of whooping-cough.

DUNMANWAY; *Dunmanway W.*—District healthy during the quarter; the case of fever came from Valencia and was sent to hospital.

KANTURK; *Kanturk W.*—Whooping-cough prevalent in portions of the district, in consequence of which a good many children were unfit for vaccination.

KILMALLOCK; *Charleville*.—The district is very healthy.

**KINSALE; Ballyfeard.**—Health of district fair. Bronchial diseases rather prevalent owing to the severity of the weather, though not of a fatal nature. One case of puerperal fever occurred with death.

**MALLOW; Ballyclogh.**—District free from epidemics during last quarter; but owing to the severe weather, I had to postpone vaccination, as children could not be brought out. Sanitary arrangements fairly satisfactory.

**MALLOW; Buttevant.**—Influenza of a mild type prevailed during the quarter, and delayed vaccination.

**MALLOW; Rahon.**—Measles has been very prevalent during the past quarter, no deaths have occurred from it; the epidemic is now almost over. Typhoid fever has occurred in one house.

**MIDDLETON; Aghada.**—This district has been very healthy during the quarter. There have been four cases of influenza, two of enteric fever, and one of scarlatina—all in the months of November (influenza), and December (enteric and scarlatina).

**MILLSTREET; Cullen.**—An epidemic of typhoid prevailed during the quarter—17 cases, and one death in hospital.

**MITCHELSTOWN; Kildorrery.**—Owing to an epidemic of measles, vaccination had to be completely postponed. One case of typhoid fever sent to Workhouse hospital.

**MITCHELSTOWN; Mitchelstown No. 1 W.**—Vaccination postponed, owing to scarlatina being prevalent in the district, also owing to the extremely wet weather.

**SKIBBEREEN; Skibbereen W.**—District free from diseases of an infectious nature.

**SKULL; Goleen.**—Sanitary condition of district very fair; four or five cases of measles of a mild type. District on the whole fairly healthy.

**SKULL; Skull W.**—Of the twenty deaths registered during the quarter, three were over 90, two over 80, and eight over 70. One case of scarlatina occurred in the district, but sharp steps were taken to prevent its spread, which proved successful.

#### Kerry County.

**CAHERSIVEEN; Caher.**—The sanitary condition of the district is good; there is no disease prevalent, nor any other circumstances affecting the public health which would require attention.

**CAHERSIVEEN; Derrynane.**—Sanitary condition of the district is fairly satisfactory but vaccination is neglected.

**CAHERSIVEEN; Emlagh.**—Sanitary arrangements fairly good. No vaccination in consequence of severity of the weather.

**CAHERSIVEEN; Glanbehy.**—Two died of bronchitis, 3 died of old age.

**CAHERSIVEEN; Valencia.**—Two of the deaths registered were 93 and 96 years old.

**DINGLE; Castlegregory.**—The district is in a healthy state.

**DINGLE; Dingle W.**—There have been a few cases of scarlatina in the district lately, otherwise it has been very free from sickness.

**DINGLE; Ventry.**—There have been several cases of scarlatina in the Electoral Divisions of Kilquane and Kilmakedar. Three deaths have been registered.

**KENMARE; Kenmare W.**—One case of scarlet fever came under my treatment, and was duly reported.

**KENMARE; Tuosist.**—District very healthy.

**KILLARNEY; Coom.**—Enteric fever was prevalent in the eastern portion of district during the months of October, November, and part of December. About 40 patients were removed to hospital, and 10 treated in their houses. No vaccination in consequence of this outbreak. Sanitary state of district good.

**KILLARNEY; Killarney No. 2.**—Four cases of diphtheria occurred in rural portion of district. One child died a few hours after I first saw it, and before anti-diphtheria serum arrived. The other three recovered under the anti-diphtheria serum treatment.

**KILLARNEY; Milltown.**—District healthy. Two cases of typhoid in private practice removed to Fever hospital.

**KILLARNEY; Molahiffe.**—District healthy.

**LISTOWEL; Ballyhorgan.**—Sanitary state of district good.

**LISTOWEL; Ballylongford.**—Notwithstanding three months of excessively wet and damp weather, the health of district was good. There was not a single case of infectious disease, either scarlet or other fever. Out of eighteen deaths registered for quarter ten were upwards of sixty years.

**TRALEE; Ardfer.**—I am instructed to state that the general health and sanitation of this district are good. No virulent or contagious disease prevail. There was one case of whooping-cough which, however, was not fatal. The vaccination is slack at this cold period, but is amply performed during the warmer quarters.

**TRALEE; Castlemaine.**—District healthy. No contagious or infectious disease prevalent. One case of typhoid in private practice removed to fever hospital.

**TRALEE; Tralee No. 2.**—District healthy.

#### Limerick County.

**KILMALLOCK; Bruff.**—Sanitary condition of the district good. No case of infectious disease during quarter.

**KILMALLOCK; Bruree.**—Influenza with bronchial complications was prevalent during the quarter.

KILMALLOCK; *Hospital*. — District healthy.

KILMALLOCK; *Kilfinane*. — District healthy.

KILMALLOCK; *Kilmallock W.*—No epidemic disease.

LIMERICK; *Annacotty*. — Sanitary arrangements fair. District healthy.

LIMERICK; *Limerick No. 3.*—District is now fairly healthy.

LISTOWEL; *Glin*.—The public health of the district has been satisfactory. Owing to the extreme inclemency of the weather the children were unable to be brought in for vaccination.

MITCHELSTOWN; *Galbally*. — A very severe epidemic of enteric fever arose towards end of October. There were 21 families affected, yielding a total of 33 patients. Three deaths have occurred from this epidemic—a National teacher aged 36 years, a farmer aged 65 years, and a farmer's son aged 10 years.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair.

NEWCASTLE; *Feenagh*.—Health of the district good.

NEWCASTLE; *Newcastle W.* — District healthy.

RATHKEALE; *Askeaton*.—During the past quarter the district was very healthy; latterly a few cases of pertussis (whooping-cough) has appeared amongst the children.

RATHKEALE; *Pallaskerry*. — The sanitary arrangements in the district are fairly good. Whooping-cough has been prevalent in the district during the past quarter.

RATHKEALE; *Rathkeale No 1 W.*—The only incident affecting the public health of the district for the quarter was a slight epidemic of diphtheria, from which 4 deaths resulted. There has not been a single case of any other zymotic disease. Two bad cases of diphtheria yielded to therapeutic serum. Those who died were moribund when first visited, and even if it were worth while to try antitoxine they died before it could be procured.

RATHKEALE; *Rathkeale No. 2.* — District was free from all contagious diseases during the quarter, with the exception of one of diphtheria.

#### Tipperary County.

BORRISOKANE; *CloghJordan*. — District is in a healthy condition as regards sanitary arrangements.

BORRISOKANE; *Terryglass*.—A few cases of scarlatina appeared during the quarter, otherwise the district is healthy.

CALLAN; *Mullinahone*.—The sanitary condition of district fairly good; no epidemic or endemic prevalent. A few cases up to middle of quarter of something like cholera or choleraic diarrhoea.

CARRICK-ON-SUIR; *Carrick-on-Suir W.* —The health of the district is particularly good. Two cases of influenza occurred some weeks ago.

CASHEL; *Killenaule*.—The district has been very healthy. Some cases of scarlet fever, which did not spread, and case of diarrhoea, which caused the deaths of two children, who were unattended by a medical man. The disease was very general all the country over.

CLOGHEEN; *Cahir*.—No cases of an epidemic character occurred in the district during the past quarter.

CLONMEL; *Clonmel W.* - A very severe epidemic of measles occurred during the quarter, and owing to pulmonary complications was fatal in several instances.

CLONMEL. —*Kilsheelan No. 1.*—Measles prevalent in and around the village of Kilsheelan. Two cases of facial erysipelas occurred during the quarter. No other infectious disease.

CLONMEL; *Marlfield*.—Vaccination well attended to. Sanitary condition of district satisfactory. About 20 cases of measles were attended during past quarter; type mild, and all recovered save one case that was complicated with convulsions. Outbreak has entirely ceased, not a case having come under notice for past three weeks.

NENAGH; *Nenagh W.*—No special form of disease prevalent.

NENAGH; *Neuport*.—District healthy. Sanitary arrangements good.

NENAGH; *Portroe*. — District very healthy notwithstanding excessive rainfall.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—The health of district during the above quarter was excellent, except in the case of three typhoid patients. Those three were distinctly traceable to Galbally, co. Limerick, where a very severe epidemic prevailed at the time.

TIPPERARY; *Tipperary W.*—The district is in a very healthy condition, and free from zymotic diseases.

URLINGFORD; *Kilcooley*.—With exception of one case of typhoid fever, which was removed to hospital, the district has been healthy during past quarter.

#### Waterford County.

CLONMEL; *Ballymacarbury*.—Epidemic of measles and whooping-cough which prevailed during early part of quarter has disappeared. One death registered, 83 years.

CLONMEL; *Kilsheelan No. 2.*—A few cases of measles during the quarter. No other infectious disease.

DUNGARVAN; *Dungarvan W.*—District healthy during the past quarter.

DUNGARVAN; *Seskinane.*—Of eight deaths registered during quarter five were of persons over 80, one of 92.

DUNGARVAN; *Whitechurch.*—District healthy and sanitary condition good.

KILMACTHOMAS; *Bunmahon.*—The sanitary conditions of the district are healthy, and the prevalence or fatality from any of principal zymotic diseases or others is totally absent.

LISMORE; *Ballyduff.*—General health of district very satisfactory.

YOUGHAL; *Ardmore.*—Measles prevalent during first month of quarter.

YOUGHAL; *Clashmore.*—Eleven out of the fourteen deaths registered were of aged persons, including five stated to have been 80, one 94, and one 101 years. There was one death of an infant from diarrhoea (uncertified).

### III.—PROVINCE OF ULSTER.

#### Antrim County.

ANTRIM; *Antrim W.*—Sanitary arrangements pretty good. Four cases of scarlatina occurred in the district during the quarter at different parts of the district, and having no connection, very hard to trace source.

ANTRIM; *Doagh.*—At present there is a widespread epidemic of measles over the greater part of the district.

ANTRIM; *Randalstown.*—Mumps, whooping-cough, and epidemic catarrh very prevalent during the quarter. Birth-rate extremely low.

ANTRIM; *Templepatrick.*—The sanitary arrangements of the district are fairly good. Five cases of typhoid fever have occurred in different parts of the district during the quarter; two deaths have been registered from this disease. There are also a few cases of influenza at present.

BALLYMENA; *Ballymena W.*—Town and district very healthy for so far, considering the season.

BALLYMENA; *Clogh.*—Some few cases of measles, but no death; never knew of this district in a healthier state than during last quarter. Sanitary arrangements fair.

BALLYMENA; *Glenwhirry.*—Typhoid fever prevalent, chiefly introduced from Belfast.

BALLYMENA; *Portglenone.*—Sanitary arrangements of the district on the whole fair.

BALLYMENA; *Toome.*—No infectious disease prevalent during quarter; deaths chiefly old people.

BALLYMONEY; *Dervock.*—An epidemic of measles prevailed throughout district during November and December. No fatalities have occurred, but vaccination has been hindered thereby.

BALLYMONEY; *Dirraw.*—Health of district satisfactory; sanitary arrangements properly looked after.

BELFAST; *Belfast Rural No. 4.*—A good many cases of measles, influenza, and enteric fever.

LARNE; *Ballycarry.*—Measles has been very prevalent in this district during last two months, mostly complicated with some bronchial trouble; cause of postponement of vaccination.

LARNE; *Carrickfergus.*—Measles prevalent during the quarter; eight deaths have been registered from this disease, which has now almost disappeared. There were a few cases of scarlatina of a mild type; no deaths from it.

LISBURN; *Dunmurry.*—The sanitary condition of this district good; no epidemic of any kind.

LISBURN; *Glenavy.*—Two cases of scarlatina occurred during the quarter—not fatal, and did not become epidemic; source of infection unknown. Weather very fatal to aged and those with chest affections.

LISBURN; *Knocknaona.*—The sanitary condition of this district is good.

LISBURN; *Lisburn W.*—Enteric fever, which was very prevalent last quarter, has almost disappeared.

#### Armagh County.

ARMAGH; *Blackwatertown.*—Thirteen or fourteen cases of enteric fever occurred in one part of the district, traced to the use of water from a well that had been contaminated; the well is now closed. The last case in the district has recently been sent to hospital.

ARMAGH; *Markethill.*—A few cases of measles of a very mild kind have taken place in the district, but did not call for medical treatment. The district has been very healthy during the past quarter. I registered the deaths of one man aged 95 years, and two over 80 years.

BANBRIDGE; *Tanderagee.*—Seventeen cases of diphtheria were treated by me during the quarter, and two deaths from this cause registered, one of which occurred in the previous quarter. All were injected with anti-diphtheria serum but this case.

LURGAN; *Lurgan, No 1 W.*—Seventeen cases of scarlatina were notified during the quarter, and four of diphtheria, also two cases of typhoid.

LURGAN; *Lurgan No. 2.*—Whooping-cough was prevalent, also diphtheria, and a few cases of scarlatina.

**LURGAN; Portadown.**—Whooping-cough prevalent; fourteen cases of scarlet fever were notified as having occurred in this district during the quarter.

**NEWRY; Mullaghglass.**—District on the whole healthy.

### **Cavan County.**

**BAILIEBOROUGH; Bailieborough W.**—District is in a very healthy condition.

**BAWNBOY; Swanlinbar.**—District healthy; no case of fever during past quarter.

**CAVAN; Arva.**—There is an epidemic of enteric fever in the district, with some deaths (only one of which has as yet been registered); otherwise the district is healthy.

**CAVAN; Killeshandra.**—Pertussis (whooping-cough) prevailed during the quarter; no deaths were registered from it. District healthy.

**COOTEHILL; Drum No 2.**—The winter for so far has been mild, and I have not anything of importance to note.

**COOTEHILL; Tullyvin.**—The sanitary arrangements of this rural district seem to be, on the whole, fairly satisfactory. There are no apparent symptoms of zymotic disease.

**ENNISKILLEN; Holywell No. 2.**—The district is fairly sanitary, with the exception of one village. One death was caused by puerperal fever, two deaths from cerebro-spinal fever, and one case of scarlatina, which was sent to hospital.

**GRANARD; Finnea No. 2.**—I had two diphtheria cases, one of which I sent to the union hospital.

**OLDCASTLE; Ballyjamesduff.**—District free from disease of infectious nature.

**OLDCASTLE; Virginia.**—District healthy and free from disease.

### **Donegal County.**

**BALLYSHANNON; Ballintra.**—Sanitary arrangements fairly good.

**BALLYSHANNON; Ballyshannon W.**—No prevalence of any zymotic disease. District fairly satisfactory as to sanitary arrangements, but vaccination neglected.

**DONEGAL; Donegal W.**—District free from infectious diseases.

**DONEGAL; Dunkineely.**—No case of infectious disease during quarter.

**DONEGAL; Mountcharles.**—There have been four deaths registered from influenza during the quarter.

**DUNFANAGHY; Crossroads.**—The district is in a very healthy condition at present.

**GLENTIES; Carrick.**—The district continues to be healthy generally. I am informed that some cases of small-pox, arising from a Glasgow case, have occurred in Dungloe district. I am prepared with lymph.

**GLENTIES; Doochary.**—District healthy.

**GLENTIES; Dunglow No. 1.**—There have been six cases of small-pox in this district. The disease was brought from Anderson near Glasgow. All the cases so suffering have been isolated in the fever hospital at Glenties. There is no indication of the disease spreading; otherwise the district is in a good sanitary condition.

**GLENTIES; Dunglow No. 2.**—An outbreak of small-pox in Dungloe No. 1 Dispensary District accounts for the large number of vaccination cases, most of them being adults; 70 are infants. Re-vaccinations are not included.

**GLENTIES; Killybegs.**—Owing to the severity of the weather during the past quarter the parents could not bring out their children for vaccination.

**INISHOWEN; Malin.**—District healthy.

**INISHOWEN; Moville.**—District healthy. One death registered at 103 years.

**LETTERKENNY; Church Hill.**—District healthy; no epidemic.

**LONDONDERRY; Burt.**—Though the weather was very wet and stormy, there was very little sickness.

**MILLFORD; Fanad.**—General health of district good.

**MILLFORD; Rathmullan.**—The birth and death-rate for the quarter is unusually small.

**STRABANE; Castlefinn.**—There have been some cases of whooping-cough in the district I am informed, but it has not been necessary to see them professionally.

**STRABANE; Raphoe.**—Sanitary arrangements well carried out.

**STRANORLAR; Cloghan.**—Sanitary arrangements satisfactory.

**STRANORLAR; Killygordon.**—The decrease in primary vaccination was owing to the inclement weather and change of medical officers.

### **Down County.**

**BANBRIDGE; Ballyward.**—The district is in a fairly satisfactory state at present.

**BANBRIDGE; Dromore.**—Vaccination is satisfactory throughout the district, which has also been free from epidemics of any kind. Sanitary arrangements are satisfactory.

**BANBRIDGE; Loughbrickland.**—The number of deaths registered was very small—only fourteen—and of these twelve were over 60, five were 80 or over, and one 103.

**DOWNPATRICK; Ballynahinch.**—There has been no outbreak of any epidemic disease during the quarter. The death-rate is about the average; one death was caused by diphtheria, of which disease there were a few localized cases.

**DOWNPATRICK; Clough.**—No epidemic, but some cases of influenza seen lately.

**DOWNPATRICK; Downpatrick W.**—We have had a great many cases of measles and mumps, but up to the present no death registered from either disease.

**DOWNPATRICK; Killough.**—Vaccination is somewhat in arrear owing to the presence of scarlat fever in certain parts of the district.

**DOWNPATRICK; Killyleagh.**—An epidemic of scarlatina has been reported from the Crossgar division of this district. No deaths have occurred from the disease. The school in the village of Crossgar was closed, and no fresh cases have been reported since.

**DOWNPATRICK; Strangford.**—An epidemic of measles of a severe type, accompanied with bronchitis, has been prevalent in the district; there have been no fatal cases.

**KILKEEL; Kilkeel No. 2 W.**—District is very healthy.

**KILKEEL; Rosstrevor.**—The ages of persons aged 60 and upwards whose deaths were registered during the past quarter were as follows:—60, 70, 71, 71, 84. One infant, aged three weeks, died from erysipelas of the navel. Scarlatina appeared in two families, but owing to precautions taken, did not spread further.

**LISBURN; Drumbeg.**—The district is in a fairly good sanitary condition; a number of workmen's cottages have been greatly improved during the past year. The health of district during past quarter has been good.

**LISBURN; Hillsborough.**—Health of the district particularly good, with the exception of several cases of mumps. Nothing of any infectious nature.

**LISBURN; Saintfield.**—The health of the district is extremely good, there being less sickness at this time of the year than usual. Of the deaths occurring one was aged 99 years and another 80.

**LURGAN; Moira.**—There has been an extensive epidemic of scarlatina in the district during the past quarter. The type was very mild, and there have been no deaths.

**LURGAN; Waringstown.**—One death was registered of a man whose age was stated to be 103 years, but the informant was not able to give me any evidence of this age. There have been some cases of measles, whooping cough, and scarlet fever in the district during the quarter, but I could not describe these diseases as prevailing in an epidemic form; they were confined to limited areas of the district.

**NEWRY; Donaghmore.**—District very healthy, sanitary arrangements good, one death registered 98 years.

**NEWRY; Rathfriland.**—Two cases of scarlatina (contracted in Gilford), one case of diphtheria, one case of typhoid (contracted in Belfast)—all convalescent.

**NEWTOWNARDS; Bangor.**—The sanitary arrangements of this district are good and receive constant attention. Typhoid fever is at present rather prevalent, but most of the original cases were imported from other towns. Only two fatal cases have been reported during quarter.

**NEWTOWNARDS; Comber.**—Health of district remarkably good and special freedom from epidemics, except slight whooping cough, and no infectious disease.

**NEWTOWNARDS; Greyabbey.**—Deaths below, births about, average; no epidemic in district. Owing to severe wet and frosty damp atmosphere, coughs and colds prevalent, and, to a certain extent, interfered with vaccination. Influenza to a slight extent present; two cases met with, some scarlatina signs, no albumen.

**NEWTOWNARDS; Newtownards W.**—There has been a number of cases of diphtheria in the town during the past quarter. I know of fifteen cases. No satisfactory direct source of infection from case to case could be traced in the greater number of cases. I am compelled to attribute, therefore, the outbreak to the general want of proper sewers through the town. No other disease has been prevalent. The consideration of the sewerage of the town still occupies the attention of the sanitary authority.

## Fermanagh County.

**BALLYSHANNON; Church Hill.**—The ages of persons, 60 and upwards, whose deaths were registered during the quarter were 72, 76, 78, 83, 85. No vaccination certificates received from the medical officer during the quarter.

**ENNISKILLEN; Enniskillen W.**—Sanitary condition of the district fairly good; no epidemic.

**ENNISKILLEN; Florencecourt.**—A few cases of pneumonia occurred during quarter. There are zymotic diseases in district; sanitation fairly satisfactory.

**IRVINESTOWN; Ederney.**—I have no doubt of the ages of the parties I have registered during the quarter, namely—90, 75, 86, 75, 60, 78, 100, 64, 70, 83, 64, 77, 85, and 75 years of age.

**LISNASKEA; Derrylin.**—A few cases of influenza have occurred during the quarter.

**LISNASKEA; Lisnaskea W.**—A few isolated cases of diphtheria in district during quarter, no other infectious disease prevalent.

**Londonderry County.**

**COLERAINE; Garvaghy.**—No epidemic of any sort. One case of typhoid fever (imported from Greenock); patient recovered.

**COLERAINE; Kibrea.**—District fairly healthy. Water supply abundant and of excellent quality. In the latter part of the quarter there were two cases of scarlatina in the same family in Kibrea, but the children are at present convalescent.

**COLERAINE; Portstewart.**—On November the 19th I visited a dispensary patient, a girl of 19 years, suffering from a mild attack of scarlet fever. I had her removed the next morning to the Union hospital, and the room, floor, and clothing disinfected. The patient made a good recovery, and no other case came under my notice since.

**LIMAVADY; Dungiven.**—Sanitary condition satisfactory. Measles confined to one family (isolated), contracted from a family in Carrickfergus, Co. Antrim; all convalescent. Vaccination considerably delayed owing to the recent inclement weather. Mortality principally among the aged and very young.

**LIMAVADY; Limavady W.**—The district has been free from zymotic disease, with the exception of one mild case of typhoid fever during the quarter. Of the twenty-two deaths registered one was aged between 60 and 70, eight between 70 and 80, three between 80 and 90, and two at the advanced ages of 98 and 99 respectively, both of whom I knew and have no doubt of their ages being correctly stated.

**LONDONDERRY; Claudy.**—District remarkably healthy; no case of infectious disease, so far as I know.

**LONDONDERRY; Waterside.**—A healthy quarter, nearly one-half deaths being over 60. In births, two-thirds were male.

**MAGHERAFELT; Bellaghy.**—The health of the district is good. The greater number of deaths during the quarter being those of aged people. No infectious disease present.

**MAGHERAFELT; Moneymore.**—District healthy. No case of infectious disease existing in it at present that I am aware of. The cases of enteric fever that occurred in one townland in five families are all convalescent, no death having resulted. Bad house drainage in one case, and impure drinking water in the others, seems to have been the cause. No fresh case has occurred since 9th November ultimo.

**Monaghan County.**

**CARRICKMACROSS; Donaghmoyne.**—Diphtheria appeared in district during quarter; there were five cases, two of which ended fatally. The first case (fatal, and occurring about six weeks before the other four) was due probably to overcrowding in an unsanitary house. In other cases the

disease may have spread indirectly from the first or originated from decayed vegetable matter deposited by the floods near the affected houses.

**CARRICKMACROSS; Raferagh.**—The death-rate is higher this quarter than during any quarter of the last five years. Eight deaths were caused by pulmonary diseases and three by cancer.

**CASTLEBLAYNEY; Ballybay.**—The district continues free from serious zymotic disease; some mild cases of influenza were treated. The number of vaccinations was well up to the average.

**CASTLEBLANEY; Castleblaney W.**—During the quarter deaths from phthisis and other pulmonary affections were very numerous; many of the houses are so damp and so badly provided with fuel as to be quite unhealthy. One case of enteric fever from defective sanitation occurred in the Cremartin, Electoral Division in November last. The patient was removed to hospital, the place disinfected, and the disease has not spread.

**CLONES, Clones W.**—Children not brought in for vaccination owing to the extremely wet season.

**COOTEHILL; Dawsonsgrove.**—The sanitary condition of the district is fairly good.

**MONAGHAN; Castleshane.**—District healthy.

**MONAGHAN; Kilmore.**—District healthy.

**MONAGHAN; Monaghan W.**—The sanitary arrangements of the district are satisfactory, and there have been fewer deaths during the quarter than for any quarter during the year.

**Tyrone County.**

**CASTLEBERG; Castleberg W.**—Sanitary state of district very satisfactory. Sixteen deaths—much below average; four deaths from croup, which I attribute to so much damp.

**CASTLEBERG; Drumquin.**—The sanitary state of the district is good, and the health of the people is excellent, with no epidemic of any sort.

**CASTLEBERG; Killeter.**—One death registered during quarter, 103 years. No epidemics.

**CLOGHER; Aughnacloy.**—Owing to measles most cases of vaccination were postponed.

**CLOGHER; Clogher W.**—Sanitary arrangements of district good. One death registered at the age of 104, but not authenticated.

**CLOGHER; Fivemiletown.**—Births below and deaths rather above the average, very little sickness during the last four and a half weeks, and the district at present quite free of any infectious disease.

COOKSTOWN; *Stewartstown*. — District very healthy.

DUNGANNON; *Caledon and Ballymagran*. — There were three cases of typhoid fever in one family—cases recovered—no extension. Sanitary arrangements fairly satisfactory.

DUNGANNON; *Clonavaddy*. — Sanitary arrangements good.

IRVINESTOWN; *Trillick*. — There were five cases of diphtheria and three of typhus. There was one death registered at the age of 106 years. The houses of the poor are still in the same wretched condition, some of them are not fit to shelter the lowest of the brute creation, and this is the cause of a great deal of sickness; 745 cases were treated during the past year at the dispensary and in their own dwellings. The sewers are not completed, the walls are not properly protected, and the water supply is insufficient.

OMAGH; *Drumquin*. — The sanitary arrangements are satisfactory, water supply good; none of the principal zymotic diseases prevalent.

OMAGH; *Fintona*. — The health of the district has been exceptionally good during the past quarter, and with the exception of a number of cases of measles, free from epidemic disease. The sanitary arrangements are good.

OMAGH; *Gortin*. — The water supply of the village is dangerously polluted with sewage. There is one case of typhoid fever, not definitely known how or where contracted.

OMAGH; *Omagh No. 1, W*. — District has been very healthy during quarter. Sanitary state improving. Public slaughter-house badly wanted.

OMAGH; *Omagh No. 2*. — District very healthy for the past three months; no epidemic of any kind.

OMAGH; *Sixmilecross*. — The district is in a very good state as regards the sanitary arrangements.

STRABANE; *Newtownstewart*. — No epidemic. District healthy.

STRABANE; *Plumbridge*. — District fairly healthy, with the exception of three cases of scarlet fever. However, I have isolated the cases, and am glad to say I have heard of no further outbreak of the disease.

#### IV. — PROVINCE OF CONNAUGHT.

##### Galway County.

CLIFDEN; *Innishbofin*. — No deaths occurred during the quarter.

CLIFDEN; *Roundstone No. 1*. — The district is in a healthy condition.

GALWAY; *Galway No. 3*. — District very healthy considering the time of the year.

GALWAY; *Oranmore*. — During the past quarter this district has been remarkably free from any sickness.

GLENAMADDY; *Williamstown*. — The district has been free from infectious diseases during quarter.

GORT; *Ardrahan*. — One case of scarlatina occurred in my district during quarter.

GORT; *Gort W.* — A few cases of scarlatina have occurred in my district during the quarter. Bronchial catarrh prevailed largely among the very young children, and practically stopped vaccinations.

GORT; *Kinsarra*. — The health of the district is good.

LOUGHREA; *Bullaun*. — Of the persons whose deaths were registered, seven were aged respectively 60, 75, 80, 80, 80, 81, and 88 years.

LOUGHREA; *Woodford*. — The public health has been strangely little affected by the practically uninterrupted run of more than two months of wet weather.

OUGHTERARD; *Cloonbur No. 1*. — Enteric fever has again appeared in district.

PORTUMNA; *Portumna No. 1, W*. — The district is in a most healthy state.

TUAM; *Abbey*. — The district is in a very healthy condition; a few cases of chronic bronchitis is all at present.

TUAM; *Headford*. — Vaccinations not up to usual number, owing to inclemency of the weather. Health of district good.

##### Leitrim County.

BAWNBOY; *Ballinamore*. — Sanitary state of district fair.

CARRICK-ON-SHANNON; *Jamestown W*. — There have occurred two cases of scarlet fever in the district during the quarter.

MANORHAMILTON; *Larganboy*. — Vaccinations had to be postponed owing to the inclemency of the weather. The sanitary condition of the district is fairly satisfactory.

MOHILL; *Carrigallen*. — The health of the district has been good during the quarter, with exception of some chest affections owing to wet season. The death from measles now registered occurred in the spring quarter. Of all the other deaths nearly all were of old persons. The sanitary state of the district is good.

MOHILL; *Mohill W*. — District is in a very healthy condition. There are seventeen deaths over 60 years. There are no contagious diseases prevalent at present.

MOHILL; *Rinn*. — The district is quite healthy and free from epidemic.

MOHILL; *Rowan*. — The vaccinations are nil, in consequence, I believe, of the inclemency of the weather—from wind and rain almost continuously during the quarter. The district is remarkably healthy.

**Mayo County.**

**BALLINA; Ballina W.**—There has been very little illness of any description in district for last three months.

**BALLINROBE; Cappaghduff.**—Sanitary condition a little improved. Weather being so bad the children could not be taken for vaccination.

**BALLINROBE; Hollymount.**—Births and deaths are rather under the average. Except for a few cases of influenza, the district was free from zymotic disease. There is one death registered at a hundred years.

**BELMULLET; Bangor.**—Since my taking up duty on November 28th it has been impossible, owing to the extreme severity of the weather, to proceed with the vaccination.

**BELMULLET; Binghamstown, W.**—Vaccination had to be postponed owing to bad weather.

**BELMULLET; Knocknallower.**—District healthy. Whooping-cough prevalent. Vaccination postponed owing to the latter and inclemency of the weather.

**CASTLEBAR; Balla.**—The case of accidental death was an inquest case.

**CLAREMORRIS; Ballindine.**—Manure heaps are placed too near the dwelling-houses, and cows are housed in the dwellings; yet no case of fever has come under my notice during the quarter.

**CLAREMORRIS; Ballyhaunis.**—Health of district good. One case of simple continued fever, now convalescent. Sanitation progressive. A further water supply for the town would be desirable.

**KILLALA; Killala W.**—The health of the district is satisfactory. There is no infectious disease.

**SWINEFORD; Swineford W.**—No contagious disease this quarter.

**WESTPORT; Achill.**—General health and sanitary state of district good. No epidemic present. Weather desperate—wet, wild, and cold.

**WESTPORT; Louisburgh.**—Health of district very good.

**Roscommon County.**

**ATHLONE; Brideswell.**—The health of district continues fairly satisfactory.

**BOYLE; Ballyfarnan No. 1.**—Vaccinations very slow in this district.

**BOYLE; Boyle No. 1 W.**—This district has been fairly healthy.

**BOYLE; Keadue.**—Sanitary arrangements fair. Vaccination not performed in proportion to the population. The health of the district very good during the quarter.

**ROSCOMMON; Athleague.**—The district healthy.

**ROSCOMMON; Eallyleague.**—District is in a healthy condition.

**STROKESTOWN; Strokestown W.**—Sanitary condition of district is good.

**Sligo County.**

**BOYLE; Ballyfarnan No. 2.**—Vaccinations got on fairly well in this district during quarter above quoted. Only one case of ill-defined fever, which did not spread—it is stamped out.

**BOYLE; Boyle No. 2.**—Owing to the very inclement season, it was very difficult for parents to send in children for vaccination.

**BOYLE; Gurteen.**—Inclement weather prevented children from being brought in for vaccination.

**DROMORE WEST; Skreen.**—Four cases of scarlatina (two families). No deaths.

**SLIGO; Ballymote.**—District healthy. Severity of weather militates against vaccination.

**SLIGO; Carney No. 1.**—The sanitary state of the district is fairly good.

**SLIGO; Carney No. 2.**—Vaccination postponed owing to the severity of weather.

**SLIGO; Collooney.**—Two cases scarlatina, one typhus and one enteric, during quarter. All recovered.

**TOBERCURRY; Coolaney.**—Sanitary arrangements fairly good.
